Built From Petrolea to Sarnia.

[Special to The Advertiser.] Petrolea, Dec. 8. - Residents of this district are much interested in a rumor that the Merchants' Mutual Line and other lake package transportation freight companies are interested in plans for a railway route through Sarnia. The project is backed by London and Petrolea capitalists, and options for the right-of-way have already been secured on front farms in Moore Township. Hydromotive electric is the proposed motive power, and it is figured that the amount of freight handled at once will more than compensate the Provincial Government for the operation and quipment of the proposed road.

Fermentation

By a Stomach Specialist.

As a specialist who has spent many years in the study and treatment of stom-ach troubles, I have been forced to the conclusion that most people who complain of stomach trouble possess stomachs that are absolutely healthy and normal. The real trouble, that which causes all the pain and difficulty, is acid in the stomach, usually due to, or aggravated by, food fermentation. Acid irritates the delicate lining of the stomach, and food fermentation causes wind which distends the stomach abnormally, causing the full bloated feeling. Thus both acid and fermentation interfere with and retard the process of digestion. The stomach is usually healthy and normal, but irritated almost past endurance by these foreign elements—acid and wind, n all such cases—and they comprise over n per cent of all stomach difficulties the first and only step necessary is to neu-tralize the acid and stop the fermentation by taking in a little warm or cold water by taking in a little warm or cold water immediately after eating, a teaspoonful of bisurated magnesia, which is doubtless the best and only really effective antacid and food corrective known. The acid will be neutralized and the fermentation stopped almost instantly, and your stomach will at once proceed to digest the food in a healthy, normal manner. Be sure to ask your druggist for the bisurated magnesia, as I have found other forms utterly lacking in its peculiarly valuable properties,—F. J. G.—Advt.
