A Grand **Kidney Medicine**

"Pruit-a-tives" Cured Bim When Every-thing Else Failed.

Ulverton, Que., March 17, 1908. I wish to place on record, for the aske of others who may be suffering in the same way that I suffered, that no medicine I ever took did me so much real good as "Fruit-a-tives" did.

I suffered for many years with Kidney Trouble, with bad pain in the

I was advised to try "Fruit-a-tives" and did so—and this medicine cured me when everything else falled.

I used altogether fifteen boxes of "Fruit-a-tives," and from the outset I used altogether fifteen boxes of "Fruit-a-tives," and from the outset they gave me relief and I am now practically well again; no pain, no distress, and all symptoms of kidney disease has entirely left me. I am very thankful to be once more well, and I freely make this statement for the sake of others who may suffer as I did. To them, I say try "Fruit-a-tives," as they are a grand kidney medicine.

ime-Worn Complaints Seem to be Gathering New Force and Committees Are Active Against "Grabbers"

RIOT RECENTLY AVERTED NARROWLY

Dublin, May 3—A conflict between the police and a large crowd of demonstrators seems to have been narrowly averted the other day at Clonakenny King's county. Under the auspices of the United Irish League a public meeting was to have been held in connection with the anti-grazing agitation, but on the previous evening notices were issued procelaming the assembly. The proclamation forbade any meeting at or near the dwellings of certain specified persons, against whom, apparently, the procedings were to be directed. Nevertheless upwards of a thousand persons assembled, a procession was formed, and in defiance of the authorities the crowd marched to Clonakenny, accompanie by the procession proceeded towards to and revolvers, but after a short parley the procession proceeded towards to and revolvers, but after a short parley the procession proceeded towards to and revolvers, but after a short parley the procession proceeded towards to and revolvers, but after a short parley the procession proceeded towards to an erovolvers, but after a short parley the procession proceeded towards to an erovolvers, but after a short parley the procession proceeded towards to an erovolvers, but after a short parley the procession of a dfairned or the extreme Right in the duma, who had a long interview with the Emperor on Thursday, stated today that there was now no question of a dfairs early never where the dwellings of certain specified persons, against whom, apparently, the ordered persons, against whom, apparently, the definition of the continuation of the subject of the continuation of the continuation of the contin

Meanwhile, what may be termed the "campaign by resolution," continues, and, despite Government warnings against the publication of intimidatory notices, no difficulty seems to be experienced in securing for the decrees of the league the widest possible publicity. Every week, usually after mass on Sunday, branch meetings are held all over the country, and reports of the proceedings are supplied by the secretaries to the local Nationalist newspapers. These documents throw an interesting light on the wide range of the league's activities. One report announces that the committeemen will call on every householder in the parish before a certain date. "Judging by the earnestness and enthusiasm of the committee," one report reads, "this branch will, this year, be second to note. Cranks or criticisms will not deter us from doing our duty, and we'll send all the graziers and grabbers to Connaught or hell." The strike in the Crow's Nest country are losing \$10,000 a day. the International Coal and Coke Company, whose mines are closed down at present by the strike, which extends as far east as Taber with the exception of the properties at Frank and the Crow's Nest Company's properties which are being operated.

Prospects for a settlement are better than they have been for some time, however, Mr. Flumerfelt says, and his company is awaiting developments before carrying out extensive improvements at Coleman and the Royal Collieries. The former mine has already developed 2,000,000 tons of coal.
