

Dream Pictures

Suddenly, in the glow of the evening lamp, a presence appears—a great artist, with violin in hand; who at our bidding, draws from the strings a thrill of joy, a sob of grief, a sigh of love.

And under the enchanting witchery of music, we are transported back to the old-time rest and comfort of happier days.

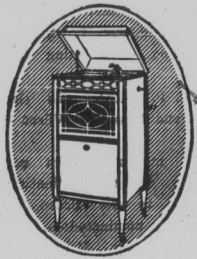

Gradually the dream picture dissolves, the presence fades, and we behold the most marvelous of all musical instruments—

The NEW EDISON

"The Phonograph with a Soul"

Let Edison dream pictures enrich your days. Let the life-like Edison Re-Creations round out your life, broaden your outlook, bring you the consolation, the contentment, the solace, of beautiful music.

We will gladly place a New Edison in your home long enough for you to appreciate what an ever-ready and inexhaustible fountain of mental refreshment it is.

POURED IN GLASGOW

To Prevent Repetition of Friday's Disorders—Bolshevik Doctrine.

Glasgow, Feb. 1.—Thousands of troops have arrived here and sentries with fixed bayonets are stationed at strategic points about the city. Everything is quiet this forenoon. Councillor Shipwell, one of the strike leaders in the Clyde district, was arrested this morning.

London, Feb. 1.—There was serious rioting to-day in the mining district of Lanarkshire, particularly at Bell's Hill, where much damage to property resulted. The police clubbed the rioters.

London, Feb. 1.—Branches of the Society of Engineers resolved last night to strike Feb. 6 and to continue the strike until a working week of 40 hours was granted them. The decision of the engineers came as a surprise, as a week ago the London district accepted 47 hours as a week's work, and was regarded as immune from the influences of the Belfast and Glasgow workmen.

Several speakers at a meeting urged a movement for a national strike, declaring the time had arrived for the workmen to demand control of industry. An amendment to the main resolution, in favor of linking London with the Clyde strike and stopping every industry in London, was defeated by a large majority.

Belfast, Feb. 1.—The strike committee announces that it contemplated trying to extend the strike to the whole of Ireland.

Replying to an appeal from Joseph Dwyer, member of Parliament, that he intervene in the strike, Premier Lloyd George replied that the British Government did not control the hours of labor and that he was in complete agreement with the reply of Andrew Bonar Law, lord privy seal, to the protest at Glasgow, declining to intervene in the strike there.

The premier added that this reply applied with equal force to Belfast.

London, Feb. 1.—The administration of Belfast from Artisans' Hall, by self-constituted rulers, continues, the organization of a police force of three hundred, special constables by the strike committee having been effected. The force is co-operating in perfect harmony with the city police, and window smashing and other disorders have virtually ceased. The entire city has accepted the rule of the committee, which prohibits extreme agitators and Sinn Féiners from speaking. Anybody with a grievance must obtain permission from the committee before airing it publicly.

The strikers' newspaper did not appear on Friday, but it has been announced that an eight page paper will be issued on Saturday, each day, to take the place of the usual afternoon papers, which have been entirely stopped. Many advertisements have already been received, and the editorial staff has been appointed.

Football matches, dances and concerts, at which strike leaders will be star performers, have been arranged for the week-end. There is one trouble however, which comes from the wives of some of the workers. They grumble because they are obliged to continue working in the textile factories while their husbands are idling. Steam fitters at Lisburn, six miles southwest of Belfast, struck yesterday.

FROM HUGE GUNS TO BADGES AND RECORDS

Great Variety of Trophies Taken by Canadians.

The Commission on Canadian War Records and Trophies, composed of Sir Bryon Walker, Dr. A. G. Doughty and General E. A. Cuthbert, will make a report to the government this week, which report will contain recommendations as to the collection and handing of the trophies captured by the Canadians during the war, as well as the invaluable records of service given and success attained by the troops from the Dominion.

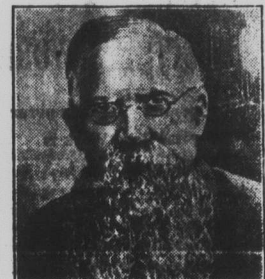

"The trophies captured by Canadians form a most interesting and practically invaluable collection," said General Cuthbert, Tuesday. "They include practically everything from huge German guns of the heaviest type to badges and records. Some of these trophies have already reached Ottawa and are stored here, still in the boxes in which they were shipped, but by far the greater portion of the collection is still to come across the sea. There will be several ship loads in all, judging from the information we have received so far."

The order who deals largely in quotations speaks volumes.

When some men think they are thinking they are only killing time.

A CRIPPLE FOR THREE YEARS

Helpless in Bed With Rheumatism Until He Took "FRUIT-A-TIVES".

MR. ALEXANDER MUNRO

R.R. No. 1, Lorne, Ont. "For over three years, I was confined to bed with Rheumatism. During that time, I had treatment from a number of doctors, and tried nearly everything I saw advertised to cure Rheumatism, without receiving any benefit.

Finally, I decided to try 'Fruit-a-tives'. Before I had used half a box, I noticed an improvement; the pain was not so severe, and the swelling started to go down. I continued taking this fruit medicine, improving all the time, and now I can walk about two miles and do light chores about the place."

ALEXANDER MUNRO
50c. a box, 6 for \$2.50, trial size 50c.
At all dealers or sent postpaid on receipt of price by Fruit-a-tives Limited, Ottawa.

COST OF LIVING

COMING DOWN

The cost of some necessary food products show a tendency to climb down. In Quebec Tuesday beef cattle made a considerable drop, and strictly fresh eggs sold at 55 cents.

In Tillsonburg, Ont., there was noted last week the first decided drop in produce in four years, some of the prices being as follows:—Butter, creamery, 50; eggs, fresh laid, 45 cents; chicken, dressed, 30 cents per pound; cheese, 29 cents; beef 16 to 28 cents; pork, 25 to 30 cents; pasteurized milk, 10c. a quart delivered, or 9 cents per quart at the local office. Advertisements in the Montreal papers quote fresh veal at 22c. for choice cuts and other cuts 10c. to 18c. Beef, steaks, 25c. rib roasts 20c. Breakfast bacon 48c., Sunkist seedless oranges 35c., a dozen.

Citizens express the hope that these prices will shortly reach Campbellton.

26TH BATTALION MAY RETURN AS A UNIT

Mayor Hayes of St. John, has received a letter from Hon. F. B. Carvell, minister of public works, in which he expressed the opinion that the 26th Battalion would return home as a unit. His worship had asked him regarding arrangements for demobilization and Hon. Mr. Carvell replied that these matters rested entirely with the militia department but he believed that units now overseas would return to Canada as a whole.

An Eye for Main Chance.

"I am glad the Sunday gasoline ban has been lifted," said the cheerful-looking stranger. "It will help my business."

"Are you an automobile manufacturer?" asked Dobson.

"No," replied the cheerful-looking stranger, "I'm an undertaker."

WHEN OTHERS FAIL

Zam-Buk cures the most stubborn skin diseases and sores. This is because Zam-Buk's method of healing is entirely different and superior to that of ordinary ointments. When Zam-Buk is applied it does not remain on the surface skin, as an ordinary ointment would. Because of its unusual refinement it penetrates to the underlying tissues. This is where all skin troubles have their origin. The germicidal properties of Zam-Buk then destroy all germs and thoroughly cleanse the diseased parts. Having done this, the healing essence contained in Zam-Buk so stimulates the tissues that a healthy skin is quickly produced. The result is a complete and permanent cure of the sore or injury. Zam-Buk is best for eczema, ringworm, scaly sores, boils, pimples, itching rash, ulcers, abscesses, running sores, "barber's rash," blood-poisoning and piles. As a first-aid, too, Zam-Buk is indispensable. It stops bleeding, ends pain, draws out sores, and infection, prevents blood-poisoning and heals quickly. All dealers sell the box. FREE SAMPLE—Send name of this paper and 1c. stamp to Zam-Buk Co., Toronto, and we will send you free trial box.

HALIFAX MAN'S WAR INVENTION

Tremendous Effect of "Hines Double-Action Submarine Shell."

Halifax, N. S., Feb. 1.—Controller John J. Hines, of the Halifax city government is the patentee of an artillery shell that may figure effectively in wars of the future—if there are to be any. The shell, leaked out recently through the announcement from Washington, that the United States had granted the Controller a patent on the shell. Mr. Hines had been keeping the matter dark; in fact it is understood that he had advised from high quarters during the time of the war that it was desirable that the matter should be as quiet as possible. But this official announcement of issue of the patent is a release of the secrecy.

Controller Hines had 25 years service in the volunteer artillery in years gone by and naturally when he thinks of warfare it is from the artillery standpoint that he views it. On either side of a fireplace in the parlor of his residence are two large shells as ornaments and it was while these shells were under his eyes one evening early in the war he thought and thought over the great struggle and tried to figure out how he could do his bit. He was not quite young enough to get by the recruiting officers, he admitted, so re-joining the artillery uniform for active service overseas was not open to him. And as he thought he endeavored to plan something by which he could help to fight for justice and humanity.

His attention finally was given wholly to the shells at the residence and he went over the make up and mechanism thereof with which he had familiarized himself in the old volunteer days. The next evening he spent in the same grove of thought, and many other evenings following. Gradually there came to him the idea that a double action shell, one that when fired at a ship would explode either on striking the object or immediately on being immersed in the water. This gave him food for thought for more evenings, until finally there came to him a plan for a shell that would do what he wished it to do. And that was the origin of the Hines double-action submarine shell, which has now the U. S. patent, and for which patents in England and Canada have been applied for.

Plan after plan was drawn by the Controller and sketches made until he was satisfied as to completeness of every detail. Then a model was made and off it went with the applications for patents with an intimation that the Allies could take advantage of the invention in the great world war, in though whether or not the offer was called off before the armistice came is not yet known here.

The shell, as its name indicates, is a double acting one. Explosion may be meeting an object, say a craft, in the water, but should the Hines shell a little wide or short of the mark, the submarine action causes explosion as soon as it is immersed in the water. The submarine explosion action is governed by two small standing shafts which admit the water therein and the water rush releases a concussion pin which drops and brings the spark. The shell leaves the gun it is locked against explosion, but the air pressure and revolution of the missile does the unlocking and leaves the missile open for immediate explosion, either by striking an object above the surface, or by immersion in the water. It is claimed for the double-action submarine shell that exploding within twenty feet of a ship it would blow her to pieces. The Controller had in mind planning his shell the 17th, feeling that the submarine explosive shell would be an effective missile when a periscope was sighted.

DEMOLISHING CENTRE.

St. John will be the demolishing centre for the eastern and southern cities of the province, and Fredericton for the colonies of New Brunswick, Nova Scotia, and Prince Edward Island, according to official advice received from Ottawa this morning by headquarters. Demolition commences today. This resulted from a recommendation made that by demolishing soldiers of these counties in St. John, a considerable saving in transportation could be effected. Under the rule in force since Fredericton became the demobilization centre, even St. John men had to report there—Gleason.

DONATION TO PATRIOTIC FUND.

Mr. E. H. Montgomery of New Richmond has remitted to Sir W. T. White, Honorary Treasurer, \$100.00 for the Patriotic Fund from the County Council of the County of Beauséjour.
