There are thousands of people to-day, thoughtlessly enduring the first There are thousands of people to-day, thoughtlessly enduring the first symptoms of some serious malady and without the slightest realization of the danger that is before them. They have occasional headaches; a lack of appetite one day and a ravenous one the next, or an unaccompanied by nausea and attribute all these troubles to the old idea of 'a slight cold' or malaria. It is high time that people awoke to a knowledge of the seriousness of these matters and emancipated themselves from the professional bigotry which controls them. When this is done and when all classes of physicians become liberal enough to exclude all dogmas, save that it is their duty to cure disease as quickly, and as safely as possible; to maintain no other position than that of truth honestly ascertained, and to endorse and recommend any remedy that has been found useful, no more quarreling among the doctors, while there will be great rejoicing throughout the world."

had frequently asked me about the remedy, and I had hearded remarkable cures effected by it, but like many others I hesitated to recommend its use. A personal friend of mine had been in poor health for some time and his application for insurance on his life had been rejected on account of Bright's disease. Chemical and microscopical examinations of his urine revealed the presence of large quantities of albumen and granular tube casts, which confirmed the correctness of the diagnosis. After trying all the usual remedies, I derected him to use this preparation and was greatly surprised to observe a decided improvement within a month, and within four months, no tube casts could be discovered. Referring to the advertisement of this association in The World of Tursday last, it may be explained that the much larger sum called for by the valuation made by Professor Cherriman, under the government standard for Canada, than is required by the valuation made by Mr. Homans on the standard for the STATS of New York, arises solely from the greater severity of the Mortality Table of the Institute of Actuaries of Great Britain as compared with the "American Experience" Table of Mortality, as the same rate of interest was used in each case.

The reason why the valuation made by this Association's own actuary Calls for A STILL LARGER RESERVE than even that required by Professor Cherriman's valuation arises from the fact that the directors consider THAT SECURITY TO THE FOLICY-HOLDERS is the FIRST thing, and, therefore, not content to provide simply as in other companies, they add an additional TEN per cent. to the liability under all BONUS ADDITIONS and PAID UP ASSURANCES as well as those being paid up, such as TEN and FITTERN payments
