FRY'S

Pure Concentrated Cocoa

A delightful beverage for breakfast or supper.

A New England man has invented a railway car-brake, operated by electricity, which is claimed to be as effective as the air brake.

For clinical work a Frenchman has devised an exceedingly delicate and quick-reading electric thermometer, capable of showing a variation in temperature of one-twentieth of a degree centigrade.

The soubriquet "Evergreen State" has been adopted by many people in the State for Washington, and its fitness is demonstrated by the following report of the weather for the year 1892, from observations made at Fairhaven, Washington, within twenty miles of the 49th parallel of latitude, or as far north as Newfoundland: Sunshine, 193 days; cloudy without rain, 82 days; slight rain some parts of two days. During the cloudy days and of two days. During the cloudy days and days with slight rain, sunshine often intervened.

"Egg-albumen," much used for cooking purposes is manufactured from the whites of the eggs of certain sea fowls, which are found in large numbers near Iceland, Greenland, Labrador and the Hebrides, and also in the Northern Pacific. It is sent to market in a dry state looking very much like glue.

Since Darwin's investigations on so-called "carnivorous plants," a great deal has been written on the habits and powers of these remarkable organisms, but the question, how flies, etc., were dissolved and digested seems to have remained unsolved. It is now maintained that digestion in the case of carnivorous plants is due to the activity of certain micro-organisms, which are always present in the sap of the mature plant, and that their secretions are favourable to the development of such minute organisms.—Knowledge.

Many a Young Man.

When from overwork, possibly assisted by an inherited weakness, the health fails and rest or medical treatment must be resorted to, then no medicine can be employed with the same beneficial results as Scott's Emulsion.

An insurance journal publishes the following statistics of the death rate of the entire globe. It is fair to assume that all told 83,000,000 die annually. This is equal to 91,554 deaths per day, 3,730 per hour, and sixty-two per minute, or one in less than every second of time. One-fourth of all people born die before arriving at the age of seven years; one half die before the age of seventeen. The average duration of human life is thirty-eight years. Of 10,000 persons one attains the age of 101 years, one out of five hundred attains the age of ninety-one years, and out of 100 only one will live to be sixty years old. Of 1,000 persons having attained the age of seventy years, forty-three were clergymen or politicians, forty agriculturists, thirty-three workmen, thirty-two soldiers, twenty-nine lawyers and civil engineers, twenty-seven professors, and twenty-four physicians.—Chicago Graphic.

THE PARTING OF THE WAYS.—Wilkins and Watkins were college chums and close friends. They had been hard students and had taken little out-door exercise. When they shook hands and said good-bye, at the end of their college career, they were in impaired health. Both had dyspepsia, liver troubles and troublesome coughs.

Wilkins had plenty of money, and decided to travel for his health. Watkins was poor. "I must go to work for my living," said he, "but I'll try the remedy that Robinson talks so much about—Dr. Pierce's Golden Medical Discovery."

In less than two years, Wilkins came home in his coffin. Watkins, now in the prime of life, is a bank president, rich and respected, and weighs 200 pounds. "The 'Golden Medical Discovery' saved my life at a critical time," he often says. "Oh, if poor Wilkins had only tried it!" For weak lungs, spitting of blood, all lingering coughs, and consumption in its early stages, it is an unequalled remedy.

Minard's Liniment cures Colds, etc.

Unlike the Dutch Process
No Alkalies
