

All Figure Jobs Are Burroughs Jobs

Machine adding—just simple adding and listing—is a Burroughs job just as truly as modern ledger posting is a Burroughs job. In each case the Burroughs equipment assures time saving—automatic accuracy—reduced costs. The wise business man of today is building for the future—building on a solid foundation of FACTS. He must have accurate, up-to-the-minute figures on sales, stock, mark-up, profits, expense and scores of other things that go to make up business, if he hopes to manage his affairs intelligently. This kind of work demands speed and accuracy. Burroughs Machine of the type pictured below makes it possible to obtain this information cheaply, regularly, easily and quickly.

More Speed

The Burroughs prints ciphers and punctuation marks automatically. As more than 40 per cent of the figures handled in ordinary work are ciphers, this means a material time saving by use of the Burroughs.

Fewer Mistakes.

Items remain set in the keyboard until the machine is operated. In case of uncertainty or error, the operator thus can prevent a mistake by eliminating the inaccuracy before the amount is printed and added.

Fullest Satisfaction.

Every Burroughs Machine will last a business lifetime. Our more than 30 years' experience in

building adding, bookkeeping and calculating machines is responsible for the perfection which our product has attained.

Full Visibility.

The Burroughs full keyboard always shows the amount that is being entered; the paper roll shows the amounts previously entered; the dials show the grand total.

A Model For Any Business.

The standard Burroughs line embraces machines for Adding, for Bookkeeping and for Calculating—among them a model which will fit into any business, large or small and repay its cost in an exceedingly short time.

Burroughs Adding Machine of Canada, Limited Windsor, Ont.
