

	PAGE
Way, its aspect	428
the telescope	108
es of Venus	396
lites of Jupiter	344
Milky Way	480
asteroids	300
er of Neptune	369
ate voyage	183
to Chill	176
ossible cause	247
y of light	216
y the ancients	106
.....	48
transatlantic longitude ..	161
ewly discovered	48
ed by Newton	74
.....	31
all masses	81
on of the planets	93, 103
Malbourne telescope ..	134
.....	349
lites of Mars	330, 331
ecular accel. of moon ..	95
in 1715	308
his comet	339
of transit of Venus	173
ecular acceleration	97
.....	194
um of the corona	363
coric shower	400
scopes	133
Uranus	302
tes of Uranus	303
ea	473
he universe	480
thesis	507
telescope	130
transatlantic longitude ..	161
ves motions of planets ..	40
.....	486
tes satellites of Uranus ..	305
of stellar parallax	305
ves transit of Venus ..	177
ance of sun's surface	243
ars in line of sight	489
nebulæ	450
new star	447
the way for gravitation ..	73
gs of Saturn	350
.....	73
planets, supposed	103, 297
servations of	303
.....	100

	PAGE		PAGE
Janssen analyses solar protuberances ..	360	Meteors and shooting-stars	306
photographs of the sun	244	how caused	306
Jupiter, the planet	339	combustion of, by motion	309
appearance of surface	340	orbits of	406
elements of orbit	340	relations to comets	403
light and activity of	343	Metonic cycle	48
rotation of, on axis	343	Milky Way described	428
satellites of	344	Möller, motion of Faye's comet	390
.....	474	Month, origin of	63-67
Kant, structure of the universe	474	Moon, revolution and phases	31
founds nebular hypothesis	505	acceleration of its motion	96
Kepler investigates motions of planets ..	68	unexplained changes of motion	96
first two laws of planetary motion ..	69	path among the stars	23
third law	70	nodes, motion of	36
structure of the universe	473	eclipses of, how caused	34
.....	477	gravitation of, found by Newton	76
Lamblay, appearance of the sun	243	investigations of the ancients	45
heat of the sun	243	atmosphere	330
on the sun's constitution	286	surface described	317
Laplace, cause of moon's acceleration ..	96	distance and magnitude	313
nebular hypothesis	507	figure, rotation, and libration	313
Lassel, his great telescopes	133	changes of surface	323
discovery of satellites	364, 372	light and heat of	323
Latitude, how determ. astronomically ..	150	effect on the earth	325
Leverrier investigates motion of Mercury ..	103	Music of the spheres	4
discovery of Neptune	347		343
Libration of the moon	313	Nebula, appearance of	403
Light, motion of	313	views of	400, 403
time of coming from sun	315	distribution	403
velocity of, measured	317	great, of Orion	457
Lipperhey an inventor of the telescope ..	100	gaseous nature of	459
Lecher analyzes sun's protuberances ..	361	Nebular hypothesis	505
Longitude, terrestrial, how found	153	reached by reasoning back-	
the transatlantic	161	ward from the present	511
Leomis, periodicity of the aurora, etc ..	325	conclusions respecting	506
Leverrier, periodicity of the aurora	325	Neptune, history of its discovery	303
Lyman investigates atmosphere of Venus ..	300	elements of orbit	540
.....	336	physical aspect of	573
Mars, the planet	327	satellite of	573
aspect of	327	Newall, his great telescope	140
elements of orbit	340	Newton (H. A.), meteoric showers	403
maps of	330, 339	Newton (Sir I.), his work	74
rotation of	338	laws of motion	75
satellites of	341	theory of comets	413
Machisyn, attraction of mountain	85		353, 384
Maxwell, theory of Saturn's rings	368	Orbits of the planets	540, 543
Mercury, the planet	359		167
elements of orbit	540	annual	173
ancient theory of	40	solar, measures of	173
aspect and rotation	360	from transit of Venus	177
motion of perihelion	102, 393	most probable value	302
transits of	391	list of papers on	550
Meridian circle described	154	stellar, efforts to find	304
Meteoric showers	303		401
.....	401		407
radiant point of	401		407
produced by comet	407		407
