1. IRISH NATIONAL MAPS. (a)	Width. Depth. £ s. d.		(a) These Maps are on a scale sufficiently large to show, with a peculiar boldness, the boundaries of the different countries. The courses of the rivers and the mountain ranges are so prominently marked, that at one view the attention of the pupil is directed to this important branch of the study; the introduction of only such names as are of importance, gives to the Maps a distinctness which cannot fail to be appreciated.
