Beer Ruins the Stomach

The best medical authorities to-day, and men of science, condemn the use of beer. It induces disease, rots the fibre and dulls the intellectual and the moral senses. It feeds the sensual and beastly. It will not cure dyspepsia. Exercise is the best cure for that. Working hard for Local Option is a good exercise.

POSTAL AUTHORITIES READY.

Deputy Postmaster George Ross is rapidly getting the suburban free delivery system into good working order. In Toronto Junction, where the plan has been in operation since June 15, a month, general satisfaction is expressed.

As yet there is only one delivery a day in the forenoon, and two collections. In East Toronto the postal department were prepared to undertake the work before the town had satisfactorily completed the work of numbering the houses and changing the names of the streets, some of which corresponded to those in the city. This now seems to have been satisfactorily adjusted, and the delivery, which is now confined to the southern portion of the town, will be extended to the northerly limits.

"The inauguration of the system," said Mr. Ross yesterday, "has required great care to avoid confusion. The Norway district south of the G. T.R. tracks will be the next to claim attention.

At Monday's meeting of the York Township Council, the question of numbering the houses in the congested districts bordering on the city was under discussion, but no definite action was taken in the matter.

Broke His Own Instructions When Ordered Off the Nipissing Property.

COBALT, Ont., July 21.—(Special).—Three weeks of determined fighting between the union and mine owners and not the slightest disturbance. This condition, remarked Magistrate H. R. C. Brown yesterday, was unprecedented and greatly to the credit of all concerned.

A jolt came, however, when President James McGuire made a trip to the property of the Nipissing the other day. He was engaged in some missionary work that failed to appeal to the mine owners, and when Officer McMullin ordered him off the premises he became aggressive. The evidence at the trial disclosed that McGuire used some nasty language. On a charge of trespass and assault McGuire was fined \$100 but allowed to go on suspended sentence.

From the beginning of the strike McGuire has occupied a prominent position in the interests of order and has urged upon the strikers that an orderly strike must be conducted. The magistrate reported that the prisoner, nevertheless, warmly commended his previous conduct of the strike.

Neither in fact, can they make out how the secret leaked out, and so the interest over the failure or success of the remaining plans to be examined and pronounced upon by the appointed judges is lively in the extreme, as the proposed expenditure on these two magnificent buildings will not be less than \$2,500,000.

The judges appointed to examine and report on the plans are Messrs. Ewart (architect of the public works department at Ottawa), Chause (the department building) and three gentlemen being well up in their profession in their respective localities.

The government has offered four prizes of \$800, \$400, \$200 and \$100 respectively, although they refuse to guarantee that the award will be made to the first prize. The two buildings whose construction is now offering so much interest to the architects throughout the Dominion will be about 1200 feet in length and 250 feet wide. Justice building to be three storeys high and the departmental block five storeys.
