

Diseases are not cured by rhetoric, but by remedies.

during a paroxysm. By observing this advice in regard to diet and bathing the skin will be stimulated, and thus aid our medicines, by throwing off a portion of offending matter in the blood.

N. B.—Hot-water baths, in all chronic, skin and syphilitic cases, we recommend as a great help to our medicines. Taken twice per week. R. & CO.

#### Inflammation of the Bladder.

DR. RADWAY & Co.—*Sirs*: I have been using your RESOLVENT, and for some time, with great success, for the inflammation of the bladder. I have tried all the medical skill in the country, but to no avail. My water was by times slimy, then again bloody; the catheter would have to be applied four or five times a day, sometimes oftener. I am seventy-two years old. I used two bottles of your RESOLVENT with the PILLS, and find great relief; in fact, I think it will cure me. Some of your medicines can't be had; the druggists are out of your RESOLVENT, and I thought it best to order it for myself. Inclosed you will find \$5. Please send the RESOLVENT by express to Bedford, Pa.

Respectfully yours,

WEST END, BRADFORD CO., PA., March, 1870. MICHAEL A. STRAUB.

#### Inflammatory Rheumatism Cured. Worthy Testimony.

GARDNER INSTITUTE, 603 FIFTH AVENUE, }

REV. C. H. GARDNER, Principal. }

NEW YORK, July 14, 1880.

DR. R. G. RADWAY, 32 Warren street:

*My Dear Sir*—I have been afflicted with inflammatory rheumatism for the past two months, and have found greater relief from the use of Radway's Ready Relief than from all that the best physicians could do for me.

Very truly yours,

C. H. GARDNER.

#### A REPUBLICATION OF GOOD ADVICE.

TRY IT TO-NIGHT.—*"You will Sleep Well and be Better in the Morning."* You have caught cold another cough; can't raise the phlegm; irritation of the throat; a heavy pressure on one of the lungs; breath short; if you could only raise up that matter that sticks so tight, you would feel easy; a sharp pain every once in a while troubles you near the heart and sometimes pains in the shoulders and back. As soon as you lie down you have a fit of coughing; this is the experience of thousands at this minute. Now for relief, prompt, quick, immediate relief and assistance: Take at once a dessert-spoonful of SARSAPARILLIAN RESOLVENT—ah, yes, the obstinate phlegm is loosened; good! that is right, up with it, it relieves you; well, you feel much easier; now, then, rub the chest well for five minutes with RADWAY'S READY RELIEF; very good; the skin becomes reddened; you begin to perspire freely, and the soreness and pain are gone; now rub the back and shoulders with READY RELIEF a few minutes; pain gone; good! you feel like sleeping; very well, take twenty drops of READY RELIEF in some water—pleasant, stimulating, and tonic; now take six of RADWAY'S PILLS—then go to sleep. Morning—you look fresh, pleasant; no cough; have had a good, thorough operation, feel like eating a good hearty breakfast; no more cold, no sore throat or difficult expectoration. This treatment is simple, and sure to cure the worst colds between bed-time and breakfast. Try it to-night, all who have a cough from catching cold. Obstinate chronic coughs will in a few days be cured by this treatment.

CONSUMPTIVES, LOOK TO IT—New lungs cannot be made, but the SARSAPARILLIAN RESOLVENT will stop the decay and waste now going on, and repair the waste with new material, made from pure, strong blood. It will stop your cough, give you strength, and keep you alive.

#### DISEASES OF THE KIDNEYS, PANCREAS BLADDER AND URINARY ORGANS,

Involving Calculous Deposits, Stone in the Bladder, Albuminuria or Bright's Disease of the Kidneys, Irritation of the Bladder and Ureters, Diseases of the Prostate Gland, Retention or Incontinence of Urine (Hæmatopsis), Diabetes, Weakening Discharges of the Urinary Organs, Leucorrhœa, Female Weakness, Chlorosis, Resisted by the Certain Curative Power of Radway's Sarsaparillian.

Discolored menses indicate purgation.

The experiment of hardening should never be tried on the unsound child.

Bile is a secretion to the liver, and is the natural purgative of the system.
