The Demon Dyspepsa—In olden times it was a popular belief that demons moved invisibly through the ambient air seeking to enter into men and trouble them. At the present day the demon, dyspepsia, is at large in the same way, seeking habitation in those who by careless of unwise siving invite him. And once he entersa man it is difficult to dislodge him. A phonograph that is placed on a floor of some big store and that even in the dead of night, with not a living soul in the building , calls up the central telephone office in case of fire is the newest use this taking machine is put to, It is the happy idea of E. H. Kaufmann of Wizard Edison's firm, a little, keen-eyed German with the hooked nose of the inventor and a fair moustache that curis up like the Kaiser's. The inventor told of its workings at the Rossin House last night. The building or floor where the phonograph stands is furnished with wires, which, when heated, set the machine talking over the wire to the telephone office. Besides being automatic, the phonograph on each floor tells its own story and the fire department, before arriving, know just on what floors to run their hose in. The new system is alleredy working in Kansas City and is to be introduced at New Orleans.
