

WEDNESDAY MORNING

burg Will Establish Factory-Hospital Rates Increased.

2

HAMILTON, May 31.-(Special.)-Representatives of the National Firzproofing Co. of Pittsburg, which has purchased a 125-acre site on the Hendrie farm, across the bay, for its Can-adian plant, will be here this week to confer with Publicity Commissioner Mulliss and complee arrangements .or the erection of buildings. The company expects to have its plant in operation by Jan. 1, 1911. It proposes spending a million dollars, and to begin will give employment to probably 500 hands. The National Fireproofing Co. is said to represent practically a consolidation of all the big plants in that line of in-dustry in the United States.

The Canadian Club to-night elected C. R. McCullough, president; F. H. Whitton, vice-president; Hugh Heanessey, second vice-president; George C. Coppley, third vice-president; (. Grey, treasurer; C. E. Kelly, secretary; J. M. Teiford, assistant secretary; J. M Williams, literary correspondent; G Smith, Dr. T. H. Husband, J. Ste-phen, J. L. Jolly and C. Peebles, committee. F. H. Whitton reported receipts of \$1157.20, and expenditures \$981.77. Hugh Hennessey reported the membership 598, an increase of 75. The secretary was instructed to send 3 congratulatory cablegram, thru Hon. Charles Murphy, to the United States depth. of South Africa.

average of about \$2 per week. The cost of maintenance has gone up by about 33 per cent. since 1900. Dr. Tyler of Montreal was favored as the new pathologist, and his name will be for-Falls Park Commission. Let them

IMPHUVEMENTS Continued From Page 1. it is the only place professing to have a harbor he ever heard of where a vessel couldn't tie up at a public do.;k The system of private ownership by corporations of wharves is one which is altogether out of accord with the best modern systems, and one which

has been demonstrated and is being demonstrated every day right here in Toronto to be foreign to the best interests of the city at large. In the other large ports on the great lakes, the docks are either owned by the municipality or operated by private cor-porations under franchises by which adequate facilities must be given at regular rates.

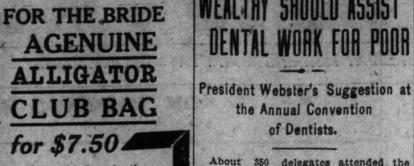

The Remedy.

The only way to insure a harbor for Toronto which will be sufficient to meet the requirements which the city will against from time to time, is to be up put in an up-to-date system of docks of modern construction, and to do it right away. By extending the line of wharves out a hundred feet past those at present standing, it would be possible to get into water 25 to 30 feet in depth. The Dominion Government has standardized its wharves, canals and entrances at 23 feet, and Toronto must at least meet this in its harbor. The present city wharves are anything from four to twelve feet in

About 250 delegates attended the pening session of the combined convention of the Canadian Dental Association and the Ontario Dental Society yesterday afternoon in the new Dental College building. Dr. A. E. Webster, president of the Canadian Association, in his annual address referred to the great expansion and broadening out of the dental pro-

THE TORONTO WORLD

ession. He spoke of the necessity for perfect sanitary conditions in every dental office. Even boiling water will not kill a large percentage of the germs. A great mistake was often made by many dentists in using what they consider to be a disinfecting mouth-wash in the cleansing of their instruments. No mouth-wash was good enough to disinfect any instru-ments used in operating on vital tis-sues. Formaldehyde and water in a solution from three to ten per cent. was an excellent disinfectant.

was an excellent disinfectant. "Less than 25 per cent. of the people of this country," said the president, "are in a position, financially, to con-sult a dentist. I understand that an Englishman has given \$1,000,000 in as-sisting the poor and middle classes to obtain the necessities of skilled den-tistry. If the men of our profession in this country were to bring the matter, before some of their wealthy friends, I feel assured that a sum sufficient for I feel assured that a sum sufficient for the purpose could be obtained." Dr. H. A. Clark, president of the On-tario Society, referred to the necessity

for compulsory examination of the teeth of school children. He urged that some concerted move be made at this convention to, in some way, interest both governments in the necessity for such action. Reference was made to the terrible condition of the teeth of the patients in the asylums, who receive no professional attention in this

line whatever. Dr. Clark considered that a doctor should be kept by the government at all such institutions to look after the inmates, and pointed out the relative condition of the teeth and mouth on the general health. Dr. R. J. Reade explained the Miller memorial fund. The money collected is to be deposited in a German bank.

The interest accumulated annually is to take the form of a diploma, a medal and a sum of money, for the student who has done the greatest work and made the deepest research in dentai problems.

### NO PROTEST MADE.

OTTAWA, May 31.-(Special.)-In re-OTTAWA. May 31.—(Special.)—In re-gard to statements made in a section of the press to-day that the brush Government has formally protested against the new immigration regula-tions adopted by the Canad'an Govern-ment. The World is officially informed that no such protest has been received. the people. There has been some correspondence in which the home government asked for information as to the regulations, but there has been nothing in the nature of a protest, a proceeding which would be most unusual and rare in British practice.
