TREMENDOUS TASK TO CLOTHE ARMY

An Industrial Romance of The War

Buying as a Science

British Policy, While Securing Equipment and Supplies for Army of Millions, Prevented Inflation of Prices

In a general way everyone has realized that the mere recruitment of men and the supplying them with arms and ammunition was only a part of the work required of the War Office to put the new British army in the field, but not one person in a thousand realized the enormous task and the multitude of incidents which go into the equipment of a force capable of taking its place in the field under modern war conditions. The War Office has been faced with the necessity of providing everything from socks to uniform buttons, from mess spoons to greatcoats, for an army grown in 24 months from less than 200,000 to more than 4,000,000. And the success with which this situation has been met is one of the industrial romances of the war, says the New York Herald.

Keeping Down Prices

Figures, as a rule, tell little, but the government has compiled some statistics behind which can be seen the feverish industry, the unceasing toll, which has permitted the men at the front to take their places as an effective fighting machine beside the French and the Russians and the Italians; the labor which made possible the development of the little contingent which crossed to France in August, 1914, to the greatest volunteer army in the history of the world. These statistics are based on reports up to April 1. To avoid unduly enhanced prices for necessities, not only to the war office, but to the population at large, the government carefully guarded all information which might indicate in the earlier days of the war the real extent of the army's needs. Some prices have advanced, but considering the huge additions to the output of clothing, equipment, tools, drugs and all other stores needed by the armed forces, there has been virtually no increase in prices. The buying by the government has been done on a definite principle that has kept the widest resources and requirements of the empire always in view.

Woolen, Flannel and Cotton

During the first twenty months of the war the amount of woolen cloth required for the army has been 90,000,000 yards, which would suffice to put a girl twice around the earth. Shirts, flannel has been bought to the total of 84,000,000 yards. These figures, it must be remembered, represent solely the army's needs. Here in a table is a comparison of the war office's needs in textiles in peace years and in war-time in yards:

	Average in Peace 1914, to years April 1, 1916	August 1916
Woolen and worsted cloth	1,149,000	117,000,000
Flannel	1,284,000	84,000,000
Cotton cloth	682,000	194,000,000

DANDRUFF GOES! HAIR GETS THICK, WAVY, BEAUTIFUL

Save your hair! Double its beauty in a few moments Try This!

Hair stops coming out and every particle of dandruff disappears

Try as you will, after an application of Dandruff or falling hair and your scalp will not itch, but what will please you most, will be after a few weeks' use, when you see new hair, fine and downy at first—yes! but really new hair—growing all over the scalp.

A little Dandruff immediately doubles the beauty of your hair. No difference how dull, faded, brittle and scraggy, just moisten a cloth with Dandruff, taking one small strand at a time. The effect is immediate and amazing—your hair will be light, fluffy and wavy, and have an appearance of abundance; an incomparable lustre, softness and luxuriance, the beauty and shimmer of true hair health.

Get a 25-cent bottle of Knowlton's Dandruff from any drug store or toilet counter, and prove that your hair is as pretty and soft as any—that it has been neglected or injured by careless treatment—that's all.

Dandruff is to the hair what fresh showers or rain and sunshine are to vegetation. It goes right to the roots, invigorates and strengthens them. Its exhilarating, stimulating and life-producing properties cause the hair to grow long, strong and beautiful.

A TALK ON RHEUMATISM

Telling How to Actually Cure This Common and Painful Malady

This article is for the man or woman who suffers from rheumatism who wants to be cured, not merely relieved—but actually cured. The most rheumatic sufferer can hope for in rubbing something on the tender, aching joint, is a little relief. No lotion or liniment ever did or can make a cure. The rheumatic poison is rooted in the blood. Therefore rheumatism can only be cured when this poisonous acid is driven out of the blood. Any doctor will tell you this is true. If you want something that will go right to the root of the trouble in the blood, take Dr. Williams' Pink Pills. They make new, rich blood which drives out the poisonous acid and cures rheumatism to stay cured. The truth of these statements has been proved in thousands of cases throughout Canada, and the following cure is a striking instance. Mr. Henry Smith, St. Jerome, Que., says: "For upwards of a year, I was a victim of rheumatism in a most painful form. The trouble was located in my legs and for a long time I was so bad that I could not walk. The suffering which I endured can only be imagined by those who have been similarly afflicted. Of the latter more than twenty-six million have been required for field and training wear, apart from the further huge total needed in the hospitals. The great clothing contractors of London, Leeds and other cities were called on, and with the adjustment of the new army clothing the work of keeping the new army clothed was thoroughly systematized. This table will show some startling figures:

Some Staggering Figures

Articles	Annual Average in Peace Yrs.	Total for 29 Mths. of War.
Boots, pairs	227,000	21,750,000
Service jackets	78,000	11,480,000
Service trousers	92,000	11,000,000
Khaki drill frocks	58,000	1,184,000
Khaki drill trousers	73,000	1,157,000
Pantaloons	18,000	2,907,000
Greatcoats	34,000	4,836,000
Service dress caps	222,000	11,088,000
Socks, pairs	980,000	54,684,000
Vests	8,555,000	8,555,000
Jerseys	77,000	7,535,000
Drawers	194,000	23,144,000

The new situation in regard to boots is especially interesting. In the vast total noted in the table ordinary marching boots alone are considered, and the millions of pairs of canvas shoes and hospitals are not included. About one-sixth were supplied to the army, but the figures are exclusive of 7,000,000 pairs of boots made for Russia. Summarizing the clothing statistics, the government finds that the army's needs in twenty months increased between seven and eighty times the normal requirements. And to the clothing figures must be added property between nine and ten million pairs of woollen gloves and 13,000,000 "cap comforts."

MINERS ASK INQUIRY INTO DEAR FOOD AND EMBARGO ON EXPORTS.

Peoria, Ill., Nov. 17.—A resolution addressed to President Wilson, asking a federal investigation of high food prices and suggesting an embargo to prevent shipments of foodstuffs to foreign countries, was adopted unanimously by delegates to a special convention of the Illinois division, United Mine Workers of America, meeting here today.

The resolution says the convention represents 82,000 miners.

CHRISTMAS TRADE AT TORONTO CRIPPLED BY FREIGHT HANDLERS' STRIKE

Toronto, Nov. 17.—A strike of 165 freight handlers in the Canadian Pacific Railway sheds here has created a serious situation, and merchants complain that unless a settlement is reached they will be badly crippled in their Christmas trade arrangements.

Already the congestion is becoming serious.

WOMEN TO DRIVE CARS AND TAKE BAGGAGE IN PARIS

Paris, Nov. 18.—Motorwomen on the Paris street railways will soon be a reality. Prefect of Police Laurent has issued an order authorizing the employment of women. They will first undergo training and then be placed on lines in the city where traffic is lightest.

This is only one of several steps necessitated by the war for the employment of woman labor. Women are now also replacing baggage men at some of the railroad stations, notably the Paris, Lyons and Mediterranean stations. All trade arrangements.
