I consider Paine's work is done, simply because the inferior | celery compound an invaluable remedy, goods pay larger profits than the world- and will always be pleased to say a word

Mr. J. H. Gervan, of 261 Albert St. that Paine's Celery Compound always Ottawa, Ont., writes about his son's cure as follows:-

"I wrote you some time ago in reference to the case of my boy George, aged mind that there is only one medicine 16 years, who has suffered for the past that "Makes people well," and that only seven or eight years from inflammatory rheumatism. A year ago last May he could not bear to stand on his feet; and having heard so much about your Paine's celery compound, I decided to try it. During last summer my boy used sixteen bottles, and continued it occasproof enough to convince the people of | ionly during the winter. I am happy to the whole North American continent, say that during the past seven or eight months he has been free from pain and

weather. "I may add, I have had salt rheun myself for nine years in my hands. of their souls they sing its praises every- often I have been unable to write. 1 used several bottles of Paine's celery compound in the summer of 1892, and dear ones, their friends and neighbors last winter I was almost free from the

Southern Republic Given Lots of Time to Make Reparation to Britishers. .

Washington City, March 28.—The ultimatum issued by Great Britain to Nicaragua was given out here last night. It is addressed to Senor Barrios, minister of Nicaragua, and contains among other things the following statement:

"Her Majesty's government has care fully considered the voluminous documents enclosed in your note of Novem ber 22 last, which you have communicated to me in justification of the proceedings of the Nicaraguan government in regard to Minister Hatch, British proconsul, and certain other British subects who were arrested in August last in the Mosquito reservation, imprisoned and expelled from Nicaragua, not only without any form of trial, but without any comagainst them, so as to afford an opportunity of absolving themselves. Before proceeding to the examination made of those documents, I may observe that although Minister Hatch was not, strictly speaking, an officer in Her Majesty's consular service, it might have been expected that the Nicaraguan authorities who carried on a correspendence with consular capacity whenever and so long officers, but under the new law all comas it suited their convenience to do so, munications are supposed to be of a lotwould, as a matter of ordinary courtesy, have communicated to Her Majesty's government before resorting to so extreme a measure as the arrest of that gentleman"

The document then gives a historical resume of the event, principally as printed in the English and American newspapers during the last six months. The document says: "With regard to the conduct of Mr. Hatch, Her Majesty's government is satisfied with the report of her Majesty's naval officers that it was perfectly correct during the time that he acted as British pro-consul."

Continuing, the document says: "I do not know that there are any other points in the document that you have communicated to me of sufficient importance that should specially notice them. I have only to request that you will without delay, inform the Nicaraguan government that Her Majesty's government cannot admit that any adequate or reliable evidence has been produced to justify the arbitrary and violent action taken

against the queen's subjects." "They hold the Nicaraguan government responsible for these procedings and they must require them to pay the sum of \$15,000 on account of their action in arresting, imprisoning and expelling the British subjects; further, to cancel unconditionally the decree of exile issued against them, and to agree to the constitution of a committee to assess the losses sustained by them in their property or goods in reserve, owing to the action of the Nicaraguan authorities. Such commission is to be composed of a British representative, a Nicaraguan representative and a jurist not a citizen of any American state, to be selected by agreement between the Nicauaguan and the government of Her Majesty, and failing in such agreement, by the president of the Swiss republic. The finding of the commission to be by a majority, and the awards to be final and to be paid within three months of the conclu-

sion of their labors. "Besides the cases of British subjects arrested in the Mosquito reserve, there are those of others who have suffered at the hands of the Nicaraguan authorities, namely, Arthur E. Sykes, of Sheffield, England, who had been working in the mosquito reserve as an engineer, and was serving in that capacity on board the Buena Ventura, when on the night of July 30 he was forced at the point of the bayonet by Nicaraguan soldiers to get up steam and take a party down the giver to the Bluefields bluff, and was, on the arrival there, fortunately released by the captain of the United States steamer Marblehead; also Joseph A. Galea, a Jamaican, settled in Great Corn island, who, early in 1894, was beaten with the flat of a sword for refusing to perform military service and then made to serve, There is further unwarrantable seizure of the British schooner Angelia by the government of Corn island and the detention of her owner and citizen. These outrages Her Majesty's government must also have satisfaction for, and they

require that £500 be paid as indemnity. "In previous letters which I have addressed to you I have explained that Her Majesty's government is not prepared to discuss any question with regard to the treaty of Managua and the recent proceedings in the Mosquito reserve until this matter of arrest and imprisonment of British subjects has been disposed of. So soon as the demands which I have made in my present note be satisfied, I shall be prepared to receive and consider in a friendly spirit any representations of those questions which the Nicaraguan government may desire to make to Her Majesty's government. I am. sir, with highest consideration, your humble and
