Sailors Complained That Food Was Not Satisfactory-Chinese Court Has Promised to Introduce Reforms.

Berlin, Oct. 5.-The most lively topics of the week here have been the question of the return of the Chinese astronomical instruments taken from Pekin; the pr posed crossing of Unter der Linden by an electric railroad; the reported prote of the Hungarian premier, Loloman Shell, against the proposed German t iff, and the cruiser Gazelle incident.

The whole press practically agr

that the astronomical instruments w illegally carried off. Even the K Zeitung criticizes the action of the petrators undoubtedly acted in goo faith, but that does not settle the affair. The least that can be done is to deduct the value of the instruments from the Chinese indemnity." The statement that the instruments were purchased and not booked for some three weeks ago is not officially refuted. The Neuste Nachrichten says it is not sufficient to offer to transport them back to China and replace them at Germany's expense, on the spot from which they were taken, if China is unwilling to do so, and deduct the amount from the indemnity. The Yorwartes triumphantly explains that China is unwilling to do so, and deduct the amount from the indemnity. The Vorwartes triumphantly explains that China intends to leave the illegally acquired goods in Germany as a continual remembrance of how Germany respects international law, and says that the honor of Germany demands that the in-

THE CORONATION.

Be Worn.

London, Oct. 5.-There is a flutter in high society to-day owing to the fact that the Earl Marshal has issued the rules and regulations governing what is to be worn at the coronation of King Edward next year. The whole document breathes of the middle ages when distinctions in dress were considered so essential, and the quaintness of the phraseology in which the attendance of the nobility of the United Kingdom is required "at the solemnity of the Royal coronation of their most sacred Majesties," and describing regulations in regard to dresses and head-dresses, is distinctly mediaeval. There is a curious graduation in the fur trimmings of the robes which emphasizes the fine distinction existing in the ranks
