REV JOSEPH OLARE TO D International Representative to Pro-

vincial Convention.

Rev. Joseph Clark, D. D., is the son of the late Samuel W. Clark, who for more than thirty years was the general secretary of the New Jersey Sunday School Association. His mother for twenty-five years has been the onored president of the New York City Primary Union. A generation ago she was one of the foremost primary workers in America, and is familiarly known as the "mother" of the primary union. Dr. Clark, therefore comes naturally by the qualities which destined him to become the general secretary of the state of Ohio, to succeed Marion Lawrence, upon his

election as international secretary.

He has been identified with the Organized Sunday School Work from his youth. As a boy of fifteen he was the special page of Dr. Henry Clay Trumbull, one of the secretaries of the historic National Sunday School Convention, held in Newark, N. J., in 1869. At seventeen, after his high school career, he was a clerk for a year in the Sunday School Bazaar, conducted by A. C. VanLennep, in New York city, which, in 1871, was a

conducted by A. C. vanLennep, in New York city, which, in 1871, was a Mecca for Sunday school workers from all parts of the United States. As early as twenty-one he was officially identified with the Essex County Sunday School Association in New Jersey. In 1880, in his twenty-fifth year, he removed to Denver, Colorado, where in 1881 in commany with Hon P. H. Gills 1831, in company with Hon. R. H. Gil-more and others, he organized the state and became its secretary, which position he held until his return to

the east, six years later. his thirty-fourth year, was engaged in his thirty-fourth year, was engaged in the printing and newspaper business. At thirty-four he responded to the call of God to preach—a call which has followed him from his youth. He became a member of the Ohio conference of the Methodist Episcopal church in 1888, and in ten years rose to the pastorate of one of the vigorous Methodist churches of Columbus, the capital city of Ohio.

Dr. Clark is the author of the famous "Timothy Stand-by" Letters. He has created a character which is to the Sunday school world what the Peroleum V. Another Cotton Manufacturing Crisis at Hand.

Lumber and Fish Markets.

(From Our Own Correspondent.) BOSTON, Oct. 2.-Another of the toofrequent crises in the cotton manufacturing industry appears to be at hand, with Fall River, the greatest mill town in North America, the storm centre. This time the issue is not a threatened reduction in wages, but an Iron Works and the Bourne mills, the only two cotton manufacturing concerns outside of the manufacturers' association, voluntarily raised the wages of their 4,000 employes five per cent. The textile unions of Fall River, representing about 27,000 employes of the thirty-seven corporations in the association, concluded that an advance was due them also and them advance. was due them also, and they accordingly petitioned the manufacturers to that effect. Yesterday the demand was refused, and the union leaders recommend to the several organizations that the operatives stay out of the nills after next Saturday afternoon unless the advance is given. Business men are making efforts to avert a strike, and strong influence is being brought to bear on the unions to vote against stopping the machinery at this time. The Fall River mill owners lay their troubles at the door of M. C. D. Berden, the New York millionaire, who controls the Fall River Iron Works Mills, the largest cotton making cen-cern in the spindle city. Mr. Borden has thwarted the other manufacturers time and again, and while he is the hero of the mill workers, he is not exactly popular with the former at the present time. The other mill towns in New England are closely watching the situation, and if the Fall River men are compelled to grant an advance similar demands will be made of out-

side corporations,

**** LETTERS FROM THE PEOPLE !

------THE GLOBE AND THE BOER WAR.

To the Editor of the Sun: Sir-The Globe editor, like some STEM preached last Sunday evening at the other people, has peculiar views of his St. James street Christian church own about the Boer war. Six or seven weeks ago he laid all the blame H. C. Salisbury and H. W. Cross of of its prolongation upon the British St. John, L. B. Hunt of Summerside, government, which he accused of St. John, L. Boers after Majuba. He also seems to imply, though he does not say it in so many words, that Mr. Chamberlain ought to imitate that wisdom by surrendering to them now. It is difficult to see upon what foun-

dations the Globe editor has built these remarkable opinions. He must surely be acquainted with the leading facts and details of the war, and it is hard to see how anybody possessed of as far as outward appearances go, such information, excepting an infuri-seems to be in excellent health and ated crank or a besotted partisan, can seems to be in excellent health and spirits.

The national triennial convention of the Episcopal church was opened at San Francisco today. Unusual interest is manifested in the convention, as it is expected to adopt legislation practically prohibiting the remarriage of divorced persons by priests of the church, to take important action on work in the new American possessions, to vote on a preposition of the creation and the profusion against England and her troops, that ant action on work in the new American possessions, to vote on a proposition to change the name "Protestant from foreign military officers. These Episcopal church" to the "American Catholic church in the United States" and to act on a plan to have the country of their profession far too well to echo this stupid and hypocritical try divided into ecclesiastical pro-vinces, with an archbishop at the head of all. It is thought action on stance that England has introduced

However that may be, the new experiment has clearly not succeed so well as to encourage other nations to imitate it in the to 20 for large spruce frames, there are few mills in a position to take orders at any price. Was Closed Friday Morning With Small Balance on Hand.

The Transvaal Contingent fund was practically closed on Friday morning at a meeting of the committee in the mayor's office. Col. Markham presid-

ed. The supplementary report of the treasurer was received. In presenting his supplementary report the treasurer, H. D. McLeod, said that the statement of account rendered April 18, 1901, showed that \$26,353.14 had been subscribed and in payments the sum of 24,657.89 had been made. The account as requested was referred to an audit committee, which has reported to his worship the mayor. A supplementary statement is now rendered, showing the total amount received to Sept. 30, 1901, \$26,426.03 and in pay-

ments, \$25,820.39 made, leaving a balance of \$605.64. This statement has been submitted to the auditors to whom the first statement was referred and they have made a report to his worship, the mayor. After setting aside \$386.60 to pay allowances, which have not yet been called for, but liable to be at any mo-

AN OLD SON OF TEMPERANCE.

Jacob I. Kierstead of Collina, Kings Co., N. B., says in the course of a letter to Forward, the maritime organ of that great temperance organization: The writer has fond recollections of the third day of August, 1860, when he was in the Sons of Temperance procession on the occasion of the visit of H. R. H. the Prince of Wales to the H. R. H. the Prince of Wales to the city of St. John, and now, after the lapse of a little more than forty-one years, he expects soon to unite with thousands of others in the same city in extending a welcome to the Duke of Cornwall and York, second son of him whom we so long ago looked upon —now King Edward VII. We may not, as Sons of Temperance, take part on the coming occasion; but as citi-zens and loyal subjects, we hope to give as hearty a welcome as any other portion of our fair dominion to him who is heir apparent to the throne of an empire "greater than has been."

HARDWOOD THIS WINTER. When coal went up to almost famine prices last winter, hundreds of St. John householders, who had rarely if ever before consumed hardwood, fell back on that New Brunswick staple, with such agreeable results that they would fain continue its use this year.
They are now, however, face to face
with the fact that hardwood will be dearer than ever. St. John river farmers, who might have made good money by catering for this demand, let the opportunity slip, or else wanted such big prices for cutting that dealers would not make contracts with them. Quite a quantity will come on rail from Kings, Albert and Westmorand counties, but the river supply will seemingly be below last year's figure. What little is offering at In-diantown is eagerly snapped up.

THE MYSTERY OF CANCER.

I do not envy the Princess of Schaumburg-Lippe the life ownership of Friedrichshof. Cancer sticks to a house. The statistics of the disease show this. Some doctors were disposed to think that cancer time from trees; but statistics of that disease taken in Paris show that it can and does break out in streets where there are ne trees. It might possibly, but not probably, be brought in by the wood of a cancerous tree. The gall nut is now supposed to be a form of vegetable cancer, and the oak on which it grows is most used in France for floors; but this seems so far ferched that I hardly like to put it forward. However, I do not hesitate to call attention to the great danger of living in houses where there have been cancerous patients. Not long ago attention was called at a stiting of the Academy of Science to a house where there were seven successive tenants, the families of six furnished a victim apiece to the fell disease and one family two victims. The infection, was evidently in the bouse. The apple tree is obtaining a had repression as buttle to cancer, and the elm a worse case. I have been shown the boles of elms that look quite cancerous. Normandy is the part of France where most people die 4 cancer in the stomach. It is also the one in which most cider is drunk and the soil is heaviest.—London Truth.
