Poetry.

A RAIN DROP.

"There was a bright and sunny sky
Spread over a laughing land,
But one small vapour was floating by,
Where the wild waves kiss'd the strand,
And as it passed o'er the ocean swell,
A rain drop from the dark cloud fell.

"Alone" the limpid moisture sigh'd
As it clove the yielding air;
And whilst I perish in that salt tide,
Shall any unregarded there?
Mine is the fate to be there riven
From my glorious place 'mid the blue of heaven!"

"Down, down it fell; but ere the tide
Wonder'd the bright coral of the shore,
An oyster that thirsted, open'd wide
Its pearly encrusted door;
And by the soft breathing of the air,
The limpid drop was wafted there.

"There pass'd—and there a fisher came,
And from that oyster drew
A precious prize, whose wonderous fame
Through many a region flew;
The rain drop had become a gem,
The deck a monarch's diadem!"

WOMAN.

No star in yonder sky that shines
Can light like woman's eye imparts;
The earth holds not its all its mines
A gem as rich as woman's heart;
Her voice is like the music sweet
Poured out from airy harp alone;
Like that why a storm loudly beat,
It yields a clearer, richer tone.

And woman's love 's a holy light,
That brighter, brighter burns, for aye;
Years cannot dim its radiance bright,
Nor even falsehood quench its ray.
But like the star of Bethlehem,
Of old to Israel's shepherds given,
It marshalls with its steady flame
The erring soul of man to heaven.

Mason's Patent for Preserving Fruits Raw Meats, &c.—We copy the paragraph which appears below from the *London Commercial Record*. If the statements are correct, the patent is valuable:

The solution of a problem which has hitherto baffled the researches of chemists and puzzled the wisest of heads, is now before us. The preservation of raw meat over a prolonged period of time is now a veritable fact; it remains only, in the practical application of the process, to prove how long, and under what special conditions, the meat thus preserved can be kept. At a meeting held some few days since, at which were present several leading shipowners and others distinguished for their scientific attainments, a table of joints was displayed which had been preserved for five months, intermingled with fresh joints from the butchers; the result must have been highly flattering to the patentee and his friends—the difference in the two descriptions of meat could not be detected by the nicest palate. Our own testimony is to the same effect; the meat we tasted had nothing of its flavor or its freshness, and the joint presented in the beginning of December last, had experienced no change of outward appearance, and the marrow of the leg of mutton was sweet and pleasant. The meats had lungs than the ordinary time after being taken out of the tin.

Should these demonstrations, and we have no reason to doubt it will, that the discovery is applicable for intermediate periods of time, and under all varying circumstances of climate, the world will justly hail it as one of the greatest boons to humanity, and as a means of obliterating for ever from the dark pages of mortality that most dreadful of all scourges, sea and land scurvy. Indeed, had the process been known and adopted only two years ago, many thousands of our brave soldiers in the Crimea would have been spared a lingering and unknown death. The process is at once simple, easy and efficient; it preserves the meat in all its primitive nutritious, without the least deterioration in appearance, taste, nutritive principles and properties; and the joint when cooked keeps sweet the ordinary time of fresh cooked meat.

Our shipping and mercantile friends will do well to visit the establishment of Messrs. Clark and Mason, 30 Botolph-lane, and by a personal inspection judge for themselves; for our part, we believe the process to be as complete in principle as it will be found invaluable in application, particularly when brought into use in passenger vessels going a long or short voyage, as it avoids the necessity of carrying live stock, and secures the full efficient services of the crew. The discovery is applicable to a vast variety of purposes, some of which will undoubtedly suggest themselves to our readers.

Old Trees.—Old apple trees that have ceased to bear, should have the soil, removed from the roots, the old limbs to taken off, and the tops thinned out. The soil about the roots should then be to replaced by an equal bulk of compost formed of the following materials, and in the following relative proportion: One cord good muck, one fourth of a cord finely pulverized clay, two casks unslacked lime, two ditto gypsum, two ditto unleached wood ashes, and one ditto salt. After filling in over the compost up to the collar of the tree, with straw, and confine it by a few flat stones. Then with an old hoe, scrape off the rough bark from the trunks and larger limbs, and apply after washing thoroughly with a solution of potash water, of ashes and soft soap, a mixture of sulfur (Scotch yellow,) and lard.

Black Warts on Cherry and Plum Trees.—Cut out the excrescences with a sharp knife and burn them. Wash the trunks thoroughly and apply salt above the roots. If the bark is rough, scour it thoroughly with a mixture recommended above.

Millet as Fodder.—The mode of culture is simple and easy. The ground should be rich, or at least in good condition, finely pulverized, and sow the seed about the first of June, using eight quarts to the acre; we have never used more than this amount, and found it amply sufficient. When sowed as late as the tenth of June, it is not necessary to cut it until after the rye and wheat crops are harvested, and the press of work is over. It is somewhat difficult to cure it, as it is a heavy, succulent plant. Cut it when the blossoms are closing and make it as clover hay is usually made. Hay caps may be used to great advantage in securing this crop, as it is necessary that it should be cut three nights. A few square rods left to ripen will furnish an abundance of seed for another year.—*New England Farmer.*

Sowing Grass Seed.—Yesterday I met with a friend who has had as much experience in the growth of timothy hay as any man in the United States. I asked him how much timothy seed to sow upon an acre. He replied that he always sowed one half bushel to each acre; that there would be at least a half ton per acre more hay, and the hay would be worth $2 per ton more in Cincinnati market, as it would be fine and soft for the stock.—When one eighth to one fourth of a bushel is sown, the hay is coarse and hard, and not be good for stock. He cuts 200 to 300 tons of hay per year, which is sold in the market.—*Ohio Cultivator.*

The editor of the New England Farmer says that he has used muriate of lime on wheat with excellent results, from five to 20 barrels per acre.

☞ *Holloway's Pills* astonishingly efficacious in Liver and Stomach Complaints.—Mr. Anthony Aldridge, of Chatham, Miramichi, suffered from a child with a sluggish state of the liver, and bowels were always in a very bad state, and he was afflicted with general ill health, he tried a variety of medicines which were recommended him by friends and the faculty, but notwithstanding this, his malady sadly increased, and ultimately he became in such a state that he was unable to attend to any active pursuits. At last, he commenced using Holloway's celebrated Pills, which soon performed their part upon this suffering being, and after he had taken this inestimable medicine for eight weeks he was thoroughly restored to health.

Trial Bottles, 25 Cents Only!

VERY LARGE "BOTTLES" 75 CENTS.

We assert with Confidence that—

J. RUSSELL SPALDING'S

ROSE MARY

AND CASTOR OIL

Is decidedly the nicest and most useful article in the world for the Hair. The oldest chemists who have examined it testify that as an agent for preserving the Hair and promoting its growth it surpasses any other article.

After a long series of experiments, Mr. SPALDING succeeded, by an illitrate process, in freeing the Castor Oil used in this preparation from its peculiar odor and all greasiness, and in blending it with the ROSEMARY, &c., in such manner as to form the cheapest and best OIL OF WASH Ever made, for which all who desire to preserve a good head of Hair until late in life, will be grateful.

The Sale of the Article has been immense; and its Success Astonishing—as all of your friends.

1st. To beautify the hair.
2d. To curl the hair elegantly.
3d. To remove dandruff effectually.
4th. To restore the hair to bald heads.
5th. To give the whiskers a beautiful appearance.
6th. To prevent the hair from falling off.
7th. To cure all diseases of the scalp.
8th. To dress false hair richly.
9th. To cure the headache.
10th. To kill hair eaters.
11th. To keep the hair from turning
12th. To dress children's hair beautifully, and lay the foundation for a good head of hair.
13th. If you do not wish to grease and soil the bonnet, cap, hat, pillow, and everything coming in contact with the hair, use SPALDING'S ROSEMARY, and be sure to get the Genuine of the manufacturer and proprietor.

December, 1854.

J. RUSSELL SPALDING,
Chemist and Apothecary.

Wholesale and Retail Depot at No. 21, corner of 23, Tremont row, directly opposite the museum, Boston Mass.

All Genuine will have his Signature.

N. B.—Remarkable terms given to dealers, who buy to sell again; and no dealer should fail to have this GOOD AND STAPLE ARTICLE.

CAUTION.

Be sure you get the Genuine with the Signature of—J. RUSSELL SPALDING.

Sold in St. John by appointment by S. L. TILLEY, and THOS. WALKER & SON, who will supply Dealers on favourable Terms.

December 1, 1855. 1y.

YOUNG'S BOARDING HOUSE,

NEAR THE KING'S SQUARE.

THE Subscriber wishes to inform the public that he has moved to the premises formerly occupied by J. K. Campbell, nearly opposite Country Market, which he has fitted and furnished in a superior manner, and where the best of attention will be paid to all who may favour him with a call.

N.B.—The Stabling attached to the premises needs no comment, being the best in the City, with careful grooms always in attendance.

22d June, 1855.

DANDALION COFFEE.

A Novelty! A Rarity!! A Luxury!!

THE virtues of DANDALION have long been held in high estimation, but the difficulty of obtaining it in all seasons of the year, has impeded the wishes of the public in extending and promoting its more general use.

The above preparation is therefore offered to the public with confidence, as possessing all the properties of the plant, and when used according to direction, it forms a most agreeable drink. It is also used to improve the flavour of Coffee and Cocoa. Sold in packets at 1s. 3d. and 2s. 6d. sterling, by FELLOWS & CO.,
July 26. Opposite Lower end Market-Street

Dr. Keeler's Invigorating Balm.

THIS admirable preparation is the most effectual remedy known for Baldness and falling off of the Hair, giving it a rich glossy appearance, unequalled by anything of the kind. It contains no alcohol or alkaline substances, (as all the washes do which are now used,) and will restore the natural colour after those articles have deprived the hair of it. We can refer enquirers to persons, both old and young, many of them who have been bald several years, and have had their hair started by this preparation. It acts by assisting nature and will in no way prove injurious. Prepared and Sold by FELLOWS & CO.
Germain-street.
October 5. opposite west end of country M'kt.

The Subscribers having been appointed Agents to the above Company for St. John, N. B., are now authorized to grant Policies of Insurance against the risks of FIRE AND LIFE ASSURANCE. The large Capital of the Company, and the well known influence of the Directors, will enable the Agents to offer the most eligible Offices, either as to Premium or Policy, with respect to the advantages offered to the Public.

Fire Branch.

Persons Assured by this Company are not subject to any conventions of calls to make good losses which may happen by the neighbours or others, but they insure to any amount, guaranteed fund or capital, the Capital Stock of this Company being as much responsible security to the Assured in case of Loss or Damage by Fire.

Life Branch.

In addition to the many eligible methods of Insurance, the Company grants Assured Loans on any of the following combinations:—

Seven Years, or any other definite term.
Half the whole Premiums, during Life.—The Premiums cease, after a limited number of Annual Payments.
For Two Joint Lives.—The sum assured to be paid on the death of either.
On the longest of Two or Three Lives.—The sum assured to be payable at the death of the last survivor; or,
The Survivorship.—To secure the payments of the sum assured, if the A die before another life B.
For a sum to be payable at age 60, or at death.
Premiums on Credit.—A portion of the Premiums on Credit. Endowments may be effected in various ways, and commuted, to meet the convenience of parties.
The important advantages offered by the Combination of the Life Branch will include the following:—
The Guarantee of an ample Capital, and Extinction of the Assured from liability of Partnership.
Moderate Premiums.
Large Participation of Profits by the Assured amounting to Two-thirds of its net amount, which may be exercised at the option of the party effecting the Assurance:—1st. By the immediate payment of the sum as apportioned.—2nd. By an equivalent increase of the sum assured.
Small Claims for Management.—The expenses of the Office being borne in due proportion by the two Branches.
Liberal Settlement of Claims.
Parties injured by non-payment of the Premiums may be restored within three months, by paying the premiums with a fine of 10s. per cent. on the production of evidence of good health, to the satisfaction of the Directors of the good health of the life assured.
The Company will always be prepared to Purchase the Policies of this Office at their equitable value or will grant a New Policy in that Branch without any further payment of Premiums, for a sum to be agreed on.
Extra Premiums, suitable to special circumstances, will be accepted to cost to a party possessing a Policy on the life of another to guard against the possibility of its being vitiated by the Life departing beyond limits, or by any other cause.
Thirty Days are allowed for the Payment of Premiums after the day on which they respectively fall due.
Additional Advantages offered to Lives Assured with this Company at St. John, N. B.
I.—Residence.—Persons assured for the whole term of life will have permission, without the payment of extra Premiums, to reside in any part of Europe, or in any place in North America to the north of 38 degrees of North Latitude, but not to the westward of the Mississippi River.
II. Voyages.—They will also, if not sea faring by profession, be allowed, without any extra charge—
To cross and re-cross the Atlantic Ocean, in steamers or first class sailing-vessels;
To pass from any part of Europe to any other, or from any part of North America to another, within the limits above specified; also,
To pass to and from, but not to reside in any place which shall not be farther south than 36 degrees of North Latitude, but not to the westward of the Mississippi River.

☞ Office, in Wiggins' new Brick Building, Princess Street, immediately above the Office of the Electric Telegraph Company, and nearly opposite the General Post Office, St. John.
