EXD

L.H.B.
OTTAWA- Caughnawaga Que.
June 4th. 1947.

Director, -

Re proposed - Second Transmission Line -
Quebec Hydro Electric Commission.

Reference is made to Report dated June 3rd. 1946;
Letters dated June 17th. 1946; August 1st. 1946.

At the outset the Commission proposed a new Right of
Way, and made Survey for location. Owners of the prop-
erties were supplied to Mr. Farmer Transmission Engineer.

The matter has rested in abeyance during the winter
months.

Under date of March 21st. 1947 R.W. Farmer, Trans-
mission Engineer advises, by letter (Copy herewith),
that due to changes in original plans they would con-
struct their second line on the Southern side of the
Right of Way purchased under authority of P.C. 1141
(1930) as suggested in Report dated June 3rd. 1946.

The Commission has started clearing the right of
way to its full width of 192 feet, and hope to erect the
power transmission line, or at least part of it during
the present season.

C. H. Taggart
C. H. Taggart.
Commissioner.
