

23. The production of a certificate by a ship's surgeon, called "a protection card," and his testimony under oath verifying the truth of such certificate, may be taken by a quarantine officer as evidence of such vaccination and protection. Such quarantine officer shall, however, from time to time, make personal examination of holders of such certificates to satisfy himself of the manner in which they have been issued.

24. Any person not having shown satisfactory evidence of having been vaccinated, or of having had small-pox, shall be vaccinated by a quarantine officer; or in the event of refusal shall be landed at the quarantine station, subject to detention for observation, and the expense of the maintenance of such person during such detention shall be a charge against the vessel;

(a.) A vessel arriving at any quarantine station in Canada will be less liable to detention if the vaccination of all steerage passengers not showing proof of vaccination within seven years is insisted on before embarkation. The ship's surgeon should satisfy himself of such fact in the case of every passenger early during the voyage, or at the time of embarkation if possible, in order to be able to answer the questions put to him by the quarantine officer.

25. In the event of small-pox having occurred on any vessel every person on board not showing satisfactory evidence of having been vaccinated within 7 previous years, or of having had the small-pox within that period, shall be vaccinated by or under the supervision of the quarantine officer; or in the event of refusal, shall be landed at the quarantine station, subject to detention for observation, and the expense of maintenance of such person or persons during such detention shall be a charge against the vessel.

#### EXAMINATION.

26. The quarantine officer shall examine the surgeon or any officer of any vessel, under oath, touching the state of health of such vessel and of every person on board, in the form of the questions appended to these regulations.

#### ISOLATION.

27. Every vessel provided with an isolated hospital for men, and another for women, on the upper deck, ventilated from above and not by the door only, shall, in the case of minor quarantinable disease, if the quarantine officer is furnished with satisfactory evidence that such hospital accommodation has been promptly and intelligently made use of, be allowed to proceed after the landing of the sick and the disinfection of such hospital as has been used; any vessel, however, arriving with any infectious disease, without having such special isolated and ventilated hospital accommodation, or if having it, without satisfactory evidence that it has been promptly and intelligently made use of, shall be liable to be detained for disinfection at a quarantine station.
