

Faculty of Forestry of Toronto University. A co-operative arrangement has been made, under which the first part of the study is hereby made upon the limits of the Laurentide Company, Limited, whose forester, Mr. Ellwood Wilson, is co-operating in the field investigations. It is expected that similar studies will be made in other sections of the pulpwood forests of Canada during succeeding years. The results will undoubtedly be of the greatest interest to all who are directly or indirectly concerned in the perpetuation of this great industry. —From article by "C. L." in "Conservation."

The Case for the Lumber Exporter
Continued from Page 1217
 trade or industry has been the subject of the most thorough and efficient organization, that branch surely is the export lumber trade of Canada. I venture to say that the firms engaged in the export lumber business of the Dominion keep themselves thoroughly well posted and have done so for years, as to lumber conditions existing in Europe, especially in the United Kingdom." Mr. Hawkins believed the critical assertions of Captain Weir's article had no application to the firms represented in the Canadian Lumbermen's Association.

YALE UNIVERSITY FOREST SCHOOL
 NEW HAVEN, CONNECTICUT, U.S.A.

Yale University Forest School is a graduate department of Yale University. It is the oldest existing forest school in the United States and exceeds any other in the number of its alumni. A general two-year course leading to the degree of Master of Forestry is offered to graduates of universities, colleges and scientific institutions of high standing, and, under exceptional conditions, to men who have had three years of collegiate training including certain prescribed subjects. Men who are not candidates for the degree may enter the school as special students, for work in any of the subjects offered in the regular course, by submitting evidence that will warrant their taking the work to their own advantage and that of the School. Those who have completed a general course in forestry are admitted for research and advanced work in Dendrology, Silviculture, Forest Management, Forest Technology and Lumbering. The regular two-year course begins the first week in July at the School camp, Milford, Pennsylvania.
