Fred C. Smith, New Hamburg, Ontario.

NOTICES.

SEPARATOR AWARDS.—The De Laval Separator Co., which reports no less than 300,000 machines in use, send us in pamphlet form an attractive history of the cream-separator awards made at the great competitions of the Chicago, Paris, and Buffalo Expositions, which is certainly an interesting record.

CANADIANS APPRECIATE CAUSTIC BALSAM.

Berkeley, Ont., Nov. 26, 1901.
The Lawrence-Williams Co.,

Cleveland, O.
I have been selling GOMBAULT'S CAUSTIC BALSAM for a number of years and it is giving my customers the best of satisfaction. I have also used it myself on different ailments with the best of results. Too much cannot be said in its favor.

W. T. PRICE.

THE FARMER'S FURNACE.—The Hilborn wood furnace, manufactured by Clare Bros. & Co., Preston, Ont., and Winnipeg, Man., is especially adapted for heating farmhouses, as it is provided with large doors and great radiating surface, and will take in large rough wood which cannot easily be split. This will be found a great advantage where first-class wood is scarce or dear. The same firm manufacture the Hecla furnace, which will burn any kind of fuel, coal, wood or peat, and a patent fused joint used in its construction renders it gas, smoke and dust tight, providing also for ventilation, and only first-class material is used in their make-up. Parties interested should note the advertisement and write the firm for further information.

MUSIC HATH CHARMS.—And good music is nowhere better appreciated nor more helpful than in the modern farm home. Our readers will therefore be interested in the advertisement, elsewhere in this issue of the "Farmer's Advocate," of that old and deservedly popular firm of musical-instrument makers, the Mason & Risch Co., of London, Ont. Note what they have to say regarding the Vocalion, and write promptly for one of their instructive catalogues and prices.

MUSIC AT HOME AND ABROAD.—The Doherty organ, of Clinton, Ont., has won an enviable reputation, and now enjoys a marked degree of preference both in Canada and Great Britain and the Continent of Europe, where, during recent years, thousands of these instruments have gone. The reason for this undoubtedly exists in their durability, musical excellence and artistic design. Public taste has become educated and critical in such matters, but the Doherty organ stands the test. Before selecting an organ for parlor or church, careful enquiries regarding this instrument should be made.

FLEMING'S SPAVIN CURE.—One forty-five minute treatment of the above cure takes off most of the bad spavins. Splint, ringbone, curb, etc., just as easily cured by the same remedy. These statements are made boldly by eminent chemists, Fleming Bros., 36 Front St., West, Toronto, Ont., after thousands of cases have been treated and cured by this remedy. Their assurance in the efficacy of their spavin cure is attested by their agreement to refund the price in case of failure to cure. Have also poll evil cure and cure for lump jaw. A postal card sent them calling for Catalogue Q will place in your hands full information of this valuable remedy.

GOSSIP.**THE AMHERST VILLA JERSEY SALE.**

The character of the Jersey cattle to be sold, on May 28th, at the public sale from the herd of the late Mr. Chas. Lautz, at Amherst Villa, Williamsville, N. Y., near the City of Buffalo, may be expected to be of a high class, when it is remembered that three typical Island-bred sires of the ideal modern type have been in use in the herd in the last few years, among these being the noted bull, Great Name, who, with his great mother, Nameless, are illustrated on another page in this issue, and will be conceded to be of the most approved pattern, the dam being a cow of model dairy form, with a perfectly-formed udder of great size and capacity; and the son a worthy one, full of character and constitution, and well fitted to reproduce the excellencies of his ancestors. The sire of Great Name is Great Scot, P. S. 2153, H. C., son of Golden Lad, out of Belle Brodie, 29536, imported by Wm. Rockefeller, in whose herd for 1901, in her twelfth year, she milked 8,001 pounds milk, her best record for one day during 1901 being 41 pounds. Great Scot is considered by some a better sire than Golden Lad. Nameless has been declared by competent judges one of the best cows ever produced on the Island of Jersey. In a letter concerning her from a leading Island breeder, he says that in her prime she is said to have yielded 24 quarts of rich milk and 3 pounds of butter in one day, whilst her progeny left nothing to be desired, all her offspring being prizetakers and dairy animals. She would milk well up to her time of calving.

A careful comparison of the pictures of Nameless and her son, Great Name, will show that, no matter how comely the appearance of a dairy cow may be, Canadian breeders are not satisfied unless they can be assured of her performing qualities at the pail and churn, and her power to transmit those qualities to her offspring. We have quoted authorities of the highest character in attestation of the fact that Nameless and her progeny breed on, handing down to succeeding generations their exceptional capacity for large production at the pail and churn. In our next issue we shall present a splendid portrait of the bull, Golden Blyth 2nd, another of the noted stock bulls used in the herd, together with the record of his dam and other ancestors. In the meantime, we counsel Jersey breeders and dairymen to note the advertisement and write for the catalogue to Estate of Chas. Lautz, 704 D. S. Morgan Building, Buffalo, N. Y., mentioning the "Farmer's Advocate."

DALGETY BROS.' IMPORTATIONS OF CLYDESDALES.

Among the enterprising men who have catered to the active demand for high-class heavy-draft sires and mares, in the last few years, probably none have shown better judgment and skill in their selections and importations of typical Clydesdales of the approved stamp, combining size and quality, than have Dalgety Bros., of London, Ont., whose enlarged advertisement in this issue of the "Advocate" sets forth their advantageous position for securing the best class of horses in Scotland, bringing them out in the best condition, and placing them where they are reasonably sure to give good satisfaction. With one or more of the firm on the ground in the Old Country to make selections (who know the history and homes of all the good ones), and one at this end to receive and place them, this firm is exceptionally well prepared to supply the trade. As evidence that they bring out first-class horses, it is only necessary to state that the first-prize three-year-old stallion at the Canadian Horse Show at Toronto in the spring of 1900 was one of their importation, and also the first prize three-year-old at the Toronto Industrial Show the same year, and in 1901 the first-prize horse in the aged class at the spring show there was imported by them, while in 1902, Strathcona, the first-prize three-year-old and sweepstakes stallion of the class at the Toronto spring show, was one of their last importation and was only a few weeks in the country when he made this proud record in a strong class. This is a record unequalled in recent years, if ever, by any one firm of importers at the leading Canadian shows, and speaks volumes for the judgment and care exercised in their selections. In their last importation came also the horse, Young Potteath, coming three years old in June, which won at the Guelph spring show first in the three-year-old class and also in the aged class and the sweepstakes. Messrs. Dalgety have sold since the first of September last 38 imported Clydesdale stallions, six of which went to the United States and the others to various districts in Ontario, Manitoba and the Northwest Territories. They purpose making another extensive importation in September, for which Mr. James Dalgety, who makes his Canadian headquarters at London, will cross and breeders desirous of securing first-class stallions or mares will do well to correspond with him.

BUY A SEPARATOR UNTIL
YOU HAVE SEEN THE

National.**EXAMINE**

The simplicity of the design.
All wheels and bearings protected, being perfectly safe in the hands of a child.

It has anti-friction ball bearings.
Few parts to wash—only two pieces inside the bowl.

The National is made by The Raymond Mfg. Co. of Guelph, whose success with the celebrated Raymond Sewing Machine is sufficient guarantee of the high finish and workmanship.

In 1901 five machines a day were manufactured. For 1902 the capacity is increased to 25 machines per day, showing the satisfaction given by the National in the past two years.

The 1902 National contains all the strong points found in other separators, and is placed on the market with the guarantee of being the best and most up-to-date machine in every particular offered to the Western farmers to-day.

The National will well repay investigation by intending purchasers.

National No. 1, capacity 330 to 350 lbs. per hour.

National No. 1 A, capacity 450 to 500 lbs. per hour.

AGENTS WANTED IN UNREPRESENTED DISTRICTS.

GUELPH, ONT.

WE ALSO MAKE GOOD SEWING MACHINES.

**THERE IS A DIFFERENCE**

between the fruit sprayed with a common spray pump and one that is not. There is a still greater profit from fruit sprayed with the SPRAMOTOR. Why is it the entomologists get such bounteous returns while the average grower fails? Why do these experts who have used the Spramotor recommend it? Why does the Spramotor kill the San Jose Scale and let the tree live, while the ordinary spray pump kills the tree?

The SPRAMOTOR

will apply soap and oil, or bordeaux and oil and water, or any combination of them in the right proportion. The Spramotor will paint your barns and buildings with oil or Spramotor Water Paint. The Spramotor was winner of the Canadian Government Spraying Contest, and the Gold Medal at the Pan-American Exhibition. Send for 80-page Copyrighted Treatise, "A Gold Mine on Your Farm." It tells about the uses of fruit trees and their remedies. It's free.

SPRAMOTOR CO.,

Buffalo, N. Y.

London, Can.

On April 17th, at Indianola, Iowa, Messrs. Brown & Randolph held a highly successful sale of Shorthorns, when an average of \$584.50 was realized for the 49 head sold, the 42 females averaging \$637.85 each. The highest price, \$3,500, was paid by N. A. Lind, Rolie, Iowa, for the cow, Victoria of Village Park 3rd and her bull calf. Imp. Gazelle, sold for \$2,105, and three others brought from \$1,000 to \$1,275.

Mr. A. B. Armstrong, breeder of Yorkshire swine and utility breeds of poultry, Codrington, Ont., in ordering change in his advertisement, writes: "We are making many sales since the cuts of W. Wyandotte and B. P. Rock cockerels appeared in your paper, and the desire to furnish only first-class stock, so that we can deal again with customers, has led us to spare no pains in trying to give satisfaction. In Yorkshires, we are particularly strong this season, and are in a position to supply any number of first-class youngsters of the right bacon type."

AN EXPERIMENT TRIED BY A SHEEPMAN IN INDIANA is interesting. Half his lambs he dipped in the fall and the other half he allowed to go undipped. The dipped ones weighed several pounds more than the undipped at shearing time, and actually yielded three-quarters of a pound more wool each. The value of dipping was conclusively illustrated by this experiment. Cooper Dip was the preparation used, and its cost was repaid a hundredfold.
