## Frost Lock

So simple, it makes you wonder why it wasn't invented a hundred years ago. So great, it makes the "Frost" the best wire fence in the world.

Frost Wedge Lock LOCKS running and upright wires together. Does not bend, knot, crimp or kink them. Simply locks them so they can't sag, bend, rub or hang. It's the only device yet invented that locks two hard wires without injury to either. Galvanized to prevent rust.

A wire fence that is put together with small, soft tie wires is just as strong as those soft wires, and no stronger. A lock that needs a crimp or bend to make it hold, weakens the whole fence. When the horses or cows get to cutting up, and ram into the fence, those weak spots snap like a bursted bubble.

## Frost Wire Fence

is high carbon coiled spring steel wire, and every strand is capable of bearing 2,000 pounds weight. Uprights are large and strong, and the Frost Lock holds uprights and running wires into one compact whole that even Texas steers can't break down.
