

THEIR NAME IS LEGION'

but actually there are only two kinds of cream separators—the De Laval and Others.

The De Laval is the original, and Others merely an imitation of past or present De Laval patents.

Every stage of separator improvement and development has been attained through De Laval inventions.

All cream separators made to-day, regardless of the names by which they are known, are built upon discarded or abandoned De Laval patents, and the best of them are scarcely equal to the De Laval machines of twelve years ago, while the advent of the

The New Improved De Laval Separator

has immeasurably widened the gap. Imitation is the subtlest flattery but never equals the genuine, and every intending separator buyer owes it to himself to secure the free trial of a New Improved De Laval separator before purchasing any other.

The Famous Rayo

Does Not Strain the Eyes

Don't use a small, concentrated light over one shoulder. It puts an unequal strain on your eyes. Use a diffused, soft, mellow light that cannot flicker, that equalizes the work of the eyes, such as the Rayo Lamp gives, and avoid eye strain.

The Rayo is designed to give the best light, and it does.

It has a strong, durable shade-holder that is held firm and true. A new burner gives added strength. Made of solid brass and finished in nickel. Easy to keep polished. The Rayo is low priced, but no other lamp gives a better light at any price.
