McCormick Manure Spreaders

YOU are interested in the results you get from a spreader, rather than in the features. Still, the only safe way to be sure of getting results is to know for yourself the purpose of every feature on the machine. McCormick manure spreaders have all the important, necessary spreader features, therefore when you know McCormick spreaders you know them all. In a spreader you want a machine that will break up manure into small particles and spread it evenly, and that, finally, will last long enough to pay for itself. You don't need a spreader to haul manure in; your wagon will do that.

Spreading manure is heavy work. To begin with, manure itself is heavy. It takes both power and strength to tear it up and scatter it. Power and strength require strong wheels and trucks, a stiff frame, heavy bearings. Your spreader, then, had better be a little too heavy than a little too light. That little extra weight makes it stiff and strong, keeps the bearings in line, prevents warping and jamming of the apron, cuts out all necessary friction and wear, adds nothing to the draft of a loaded spreader, but adds years to the efficient life of the machine.

Don't wait until you are ready to buy, but begin now to study McCormick spreaders. See the machines at the place of business of the McCormick local agent who handles them. Write to us for information that will help you to get the biggest value for your spreader money.
