### The Garden City Feeder

BECAUSE—

It governs **Automatically** without regard to the speed of the cylinder, and delivers the grain to the separator in a continuous stream uniform in thickness and volume, regardless of how it is piled upon the feeder, allowing the cylinder to get **All** it can handle and **No More**; thus a **Normal** and **Steady** motion of the machine is maintained with the **Least** consumption of **Power**; and **Further**—there are **No High Speed** knives or distributors which require **Extra** power to maintain at threshing speed.

THEREFORE—

The **Garden City Feeder** requires **Less** power and is the **Only** feeder that can **Successfully** feed a small separator, when driven by gas or kerosene tractors of limited power, as well as the larger machines with unlimited power.

We will cheerfully give you the benefit of our twenty years' **Experience** in the threshing business, and give you an **Unbiased** opinion as to the advisability of placing a new feeder upon your separator.
