## Meetings.

#### ONTARIO BANK

Proceedings of the Twelfth Annual Meeting of the Stockholders of the Ontario Bank, held at the Banking Honse, Bowmanville, on Monday, the 7th day of June, 1859.

The chair was taken by the Hon. John Simpson, President, who read the following Twelfth Annual Report of the Directors to the Stockholders. The business transactions of the Bank for the

year have been large, and the profits quite equal to the average of former years ; while the losses, so far as ascertained, are less than usual.

The harvest of the past year was below an average, with perhaps the single exception of wheat. The extraordinary prices realized by our agricultural community for all their productions in the past, placed them in a position of comparative ease, and in many cases of affluence; the rapid decline in the prices of breadstuis has not therefore seriously affected their position; and having but little indebtedness, they have been able to withhold from market a large proportion of the last year's wheat crop. The effect of this is, that the decline has been felt mainly by the producers, which, but for the fact already stated, would have been borne by the produce dealer, and would have entailed upon this class of the Bank's customers serious if not embarrasing consequences.

The prospects of an abundant harvest are everywhere indicated; and when the balance of last year's crop shall be brought to market, in addition to that now on the ground, a great impetus must be given to those branches of trade and commerce which are now in a somewhat languishing condi-While shrinkage in values have been going on in most of our cereals, the timber and sawn lumber interests-in the latter of which your Bank is largely interested-are in a healthy and flourishing condition; and your Directors are happy to be able to state that the present year promises to be more proitable than the past.

The renewal of the Reciprocity Treaty, on a fair and equitable basis, we trust may be effected during the present year ; when, doubtless, this and other important branches of Canadian industry will be greatly stimulated.

Your Directors may, without exceeding their legitimate sphere, refer to a few facts in connection with our manufactures and importations. Canada requires, and must seek, new outlets for many articles now manufactured in the Dominion, (if our industries are to be continued or extended.) Prominent amongst these may be placed the productions of our woolen mills, the minited demand for which has not absorbed the supply. The impor-tations of the past two or three years have been largely in excess of the consuming mpacity of the country ; these over importations, and the engerness evinced to find purchasers therefor, have induced a large number of persons to engage in mercantile pu suits, many of whom were not possessed of sufficient capital, and lacked the business training : n i -xp rience so necessary in these days of iceen compitition, to lead them on to success. The general utiliness in trade has left many with stocks of goods on hand, for which they have been unable from their own resources to pay; and being pressed for remittances, has led a great number

to go into bankruptcy, as the readiest way to ge rid of their financial embarrassments. Your Direc tors would call the attention of importers and wholesale dealers to the necessity of looking more their closely into the affairs of debtors, when estates are being disposed of, as a means of pre-venting fraud and over-trading. The ease with which discharges have been obtained, has in-duced traders and others to avail themselves of our bankrupt laws, who, with more energy and economy, might have honourably met all their engagements. It is hoped that the Bill now be-fore Parliament will effectually check the facilities at present so readily availed of, and deter many at present so readily availed of, which they have from entering into persuits for which they have no natural or acquired ability, and in which too many are already engaged. The result of this no natural or acquired addity, the result of this general over-trading has led to the withdrawal of a large amount of labor from agricultural pursuits, wherein it might have been more profitably direc-ted, for their own advantage and the general good.

All the Bank Charters expire next year, and the question of their renewal is now engaging the arnest attention of Parliament and the earnest attention of Parliament and the country. If the Government scheme becomes law, the sys-tem now in existence, which has been productive of so much benefit to the country generally and untry. particularly to the Province of Ontaro, will be so changed as to limit to a large extent the facilities

changed as to limit to a large extent of the Bank now afforded to the public. A large number of the Stockholders of the Bank having expressed the conviction that their in-terests, as well as those of the public, would be better subserved by removing the Head Office to better subserved by removing the Head Office to one of the large commercial centres in Ontario or Quebec, petitions have been presented to Parlia-ment, and a Bill will be immediately introduced, asking for a renewal of the present Charter, an also authority to be given to the majority of the Stockholders present in person or by proxy, to determine whether such removal shall be made, and if so, to what point; such meeting to be called

specially for that purpose. Your Directors determined last fall to close the Hamilton Branch. This is now being done, and this office will be finally closed within a few weeks. The Cashier, Managers, and other officers of the Bank, have discharged their respective duties with zeal and ability, and are, in our opinion, entitled to your thanks. The profits of last year, after the payment of all current expenses, and making provision for interest on deposits, and dis .\$221,873,90 U. S. funds, is. To which add balance at credit of pro-

25,240 82 fit and loss from last year ....
