At Boiestown on May 19 the people held a banquet in honor of Dr. W. H. Irvine, who is about to remove to Fredericton. The doctor is a native of St. John, a son of Mr. William Irvine of Millidgeville. Rev. F. Ramsey was chairman and Councillor J. S. Pond read an address, couched in the most eulogistic language, to the doctor, and concluded by presenting him, on behalf of the populace, with a beautiful travelling case, with cut glass appointments. The doctor made a fitting reply, thanking the people for the honor done him.

Seven more cases of smallpox have developed in the infected houses at the corner of Maine and Steadman streets. The patients now include Jos. King and wife and four children, who lived in the corner house, and Vetal Bourque and wife, who lived alongside. The secretary of the board of health was kept busy yesterday having the patients removed to the isolated hospital on Union street. The patients were taken out in an old unused hack which was left on the hospital premises. The driver was a Mr. Richard, who arrived in the city yesterday morning with his daughter to take care of the smallpox patients. Nearly all the cases are of a mild type and it is thought that owing to the promptitude of the board of health in quarantining the houses visited by the man Mercerall, by whom the disease was brought here, the disease may be checked there. It has been suggested that inasmuch as there is likely to be a case of smallpox cropping up occasionally that it might be good economy for the city to have a man in its employ who could go into the isolation hospital at any time and take care of the patients.—Moncton Times.

Right Trusses

There should be no guess-work about trusses. They have an important mission. They must do what they should or they are worse than none. Many are sacrificing comfort and safety by wearing ill-fitting trusses. Others who might be cured by a rightly fitting truss are using none. Those we carry are, we believe, the right ones. Can be fitted perfectly and exert a steady, even pressure. Wear well and can't easily get out of order.

The Mission of Toilet Soap.

A toilet soap should cleanse the skin—it should do this and nothing else. A safe soap is the one made from vegetable oils, with alkali and oil perfectly combined. Excess of oil means imperfect cleansing; excess of alkali means a roughened skin.

While cheapness in soap often means badness of quality, you need not pay high prices in order to get good soaps. We are careful in buying, and as a result of our carefulness we are able to furnish worthy soaps at little prices.

Style is a Consideration.

You don't want to buy a carriage and then find it the same as your neighbor bought a couple of years before.

We make it one of our strong points to put on our goods anything in the way of improvements that is of value.

You'll find a lot more novelties as they are called, on some others but you will also notice these same novelties discarded after a season.

All is not gold that glitters, (so it is reported.) Neither is a lot of Nickel the Earmark of a good Carriage.
