ping at all stations from Brigus

Junction to Carbonear. Return-

ing will leave Carbonear at 11

p.m. C. L. R. Band in attend-

ance. Tickets \$4.00, can be had

from members of Band and at

Bright Mining Out-

look for the Country.

From intelligent and reliable sources

we are pleased to announce that the

mining outlook for the country is

very bright at present, and affords the

best hopes for great developments in

the very near future, for many of our

mineral deposits, and we hope very

shortly to be able to make some

pleasant announcements as to this

subject. For the present sufficient to

say that more than one wealthy syn-

dicate has become favourably interest-

ed in our offer and more precious

metals such as gold, silver, lead, cas-

bestos, mica, and last but not least

our assured copper deposits. We

might also remark in passing, that the

work of developing the silver and lead

deposits at Verran's Island, Placentia

is progressing favourably, and that

within a few days operations will

commence on two other such deposits

in Placentia District. We understand

that the whole territory around Silver

Cliff and La Manche has been taken

up by local interests, and it is beyond

doubt that both localities contain the

regal metal-gold, as well as silver and

lead, in splendid percentages. During

the early part of next month a staff of

eminent mining engineers with their

principals are visiting the country in

connection with these matters, and

will likewise proceed to parts of Notre

Dame Bay, where it is said a few cop-

per properties in that section are to

change hands, but we are authorized

to say these properties are not little

ones.

Latest model Halliwell Gas-

Electric Hair Dryer. Heaviest

head of hair dried in ten min-

Shipping Notes.

S.S. Cabot arrived from the south-

ern shore Saturday night, bringing

several passengers.

Schr. Admiral Drake, (tern) three

days from Sydney, arrived Saturday

evening with coal to the Newfound-

land Coal and Trading Co.
