Adulteration of Milk. Mrs. Charles E. Williams of Westfield

Adult cration of Milk.

There is a stattory standard of milk in New York and some other states. The New York law provies for the confiscation and destruction of milk, if that fluid contains "more than eighty-eight per cent of water or other fluids, or less than twelve per cent of milk solids which shall contain not less than three per cent of fat." Milk not up to this standard is pronounced "adulterated." This adulteration is produced in two or more ways. First, by removing a portion or all of the cream, which is a direct fraud upon the consumer's pocket by depriving him of nourishment for which he has paid, and upon his health if he is living upon a milk diet of a given strength. A second mode of adulteration is by the addition of water, and with the water, of some substance to restore the color, and remove the "sky blue" appearance, as anatto or rice flour. blue" appearance, as anatto or rice flour. Chalk has gone into "innocuous desuetude." The water adulteration is also a robbery of the consumer, and may be the means of causing sickness by the introduction of disease germs. The source of water supply is rarely regarded by those who mix this fluid with mills and whotever contamination in with milk, and whatever contamination is in the pump or well is sure to find a new field of harmful operation among the milk

The New York law is very rigidly enforced in New York city, as milk venders often find to their great detriment. No skim milk is allowed to be sold, and the inmilk is allowed to be sold, and the in-spectors make frequent and unexpected raids upon incoming milk trains, upon the supplies of venders, and upon the carts of distributors, and thousands of gallons of condemned milk are annually turned into the gutters. Examination of the customs in regard to milk production, and the mar-keting of the same, in the milk region from which New York draws its chief supplies, will show that the farmers are not amenable to the charge of adulteration in either of the to the charge of adulteration in either of the methods above mentloned. The milk as yielded by the cow is honestly sent to market, and the adulteration occurs in the thousands of petty shops from which the poorer people draw their petty supplies.— American Agriculturist.

M. V. LUBON'S SPECIFIC No. 8 CURES The terrible consequences of Indiscretion, Exposure and Overwork. YOUNG, MIDDLE-AGED, AND OLD MEN

Young, Middle-Aged, And Old Men

Who are broken down from the effects of abuse will find in No. 8 a radical cure for nervous debility, organic weakness, involuntary vital losses, etc.

Symptoms for which No. 8 should be used:—

Want of energy, vertigo, want of purpose, dimness of sight, aversion to society, want of confidence, avoidance of conversation, desire for solitude, listlessness and inability to fix the attention on a particular subject, cowardice, depression of spirits, giddiness, loss of memory, excitability of temper, spermatorrhem, or loss of the semimal fluid—the result of self-abuse, or marital excess—impotency, innutrition, emaciation, barrenness, palpitation of heart, hysteric feelings in females, trembling, melancholy, disturbing drennus, etc., are all symptoms of this terrible habit, oftentimes innocently acquired. In short the spring or vital force having lost its tension, every function wanes in consequence. Scientific writers and the superintendents of insane asylums unite in ascribing to the effects of self-abuse the great majority of wasted lives which come under their notice. If you are incompetent for the arduous duties of business, incapacitated for the enjoyments of life, No. 8 offers an escape from the effects of early vice. If you are advanced in years, No. 8 will give you full vigor and strength. If you are broken down, physically and mentally, from early indiscretions, the result of ignorance and folly, send your address for Lubon's Treatise, entitled "Chronique Scannaleuse." an account of follies and vices. This book will be sent sealed and secure from observation upon receipt of two 3c estamps.
