clearing is undertaken in the present day. The stump pulter should be of simple construction, strongly built It generally consists of a drum, a wire cable, and a sweep to which a team is hitched. Powder has been used in all clearing operations for several years, and all methods, except that of burn-ing the stumps below the plow, are de-pendent upon it to loosen the stumps so that they may be taken out. It is said that a cheap explosive that would do this work would go a long way to-ward solving the problem of reclaim-ing the logged-off land." Donkey Engines Used.

Stump-Burning Machine "A machine used for burning stumps-consists of a gasoline engine, a blower a distributor and several lengths of hose with short lengths of pipe at one end. "The air from the blower is divided into twelve or sixteen equal parts by the distributor, to which are connected the several lengths of hose, some of which are long and some short. "A hole is bored in the stump at the ground line or, better still, the earth is dug away and the hole bored from six to tweive inches below the surface. "A piece of iron heated to a white heat is then dropped into the hole and a biast of air turned upon it by insert-ing a pipe attached to the end of a hose which is of less diameter than the hole bored in the stump. The large diameter of the hole permits the gases to escape. "As the menu stumps can be burned at

Western Canada Wood Pulp & Paper Co., Ltd. HEAD OFFICE, 638 VIEW STREET, VICTORIA, B.C.

Henry Young & Co.

Plant under course of erection at Quatsino Sound, Vancouver Island.

ASSETS

1223 Government Street

ASSETS The company have acquired 55,669 acres of Pulp Land on Quatsins Sound, Vancouver Island. WATER POWER In addition to the vast Pulp Limits acquired, the company have also secured a 20,000-inch water record on Marbie creek, at Quatsino Sound, capable of developing from 10,000 to 15,000 h. p. This creek derives its source from three lakes, 20 miles in length, and is thus per-manent the year round. CAPACITY OF PLANT

feeling that it is the best industrial stock ever offered for subscription in Western Canada. At present it is impossible to buy stock in the majority of the operating paper mills of Canada and there is no ques-tion but that inside of 18 months the stock of this corporation will be selling at a handsome premium. Remember, the time to buy stock in any corporation is six months before a wheel has been turned, not after it is in operation. **PROFITS IN PULP AND PAPER MANUFACTURE** No industry, not even mining itself, has yielded as large and per-manent dividends as the manufacture of wood pulp and paper, and there is no reason why the mill which we are now erecting should not pay at least 25 per cent annual dividends. Under much less favorable

a interesting and the second of the second of the second of the second second and the second of the

The plant when fully complete will have a capacity of 800 tons of news and wrapping per week, and feel confident that we will have the pulp plant with a weekly capacity of 100 tons in operation by Decem-ber 1st of this year. COST OF MANUFACTURE

With our tremendous pulp limits which enable us to secure our phip wood at a nominal figure and splendid water power, the cost of manufacture of news and wrapping paper should not exceed \$30.00 per ton; at present news is jobbing in British Columbia at \$60.00 per ton. The freight rate in carload lots from Ontario and Quebec being \$17.00

per ton. LOCAL MARKETS The local market of the company extends east a thousand miles to Moose Jaw and tributary region. Within the above territory the an-nual consumption of paper is estimated at a thousand tons exclusive of that used by printers and newspapers. The five daily papers of Victoria and Vancouver alone consume over 100 carloads of paper per

year. FOREIGN MARKETS The foreign markets of the company consist of China, Japan, New Zealand, Australia, Hawaii and the Philippines. In 1908 the above countries imported over \$10,000,000 worth of wood pulp and paper, principally from Norway, sweden, Germany, Eastern United States and Eastern Canada. FREIGHT RATES TO ORIENT FREIGHT Constant from the secured from

FREIGHT RATES TO ORIENT A freight rate from \$8.00 to \$5.00 per ton can be secured from British Columbia to China, Japan, New Zealand and Australia, on wood pulp and paper, as against a rate of \$7.00 to \$15.00 per ton on the same commodities from Eastern Canada and Europe; being from 3,000 to 5,000 miles nearer the Oriental market than Eastern Canada or Euro-pean mills, we not only are able to secure a much lower freight rate, but also a lower insurance rate.

NATURAL ADVANTAGES OF BRITISH COLUMBIA

NATURAL AUVANIAGES OF BRITISH COLUMBIA News and wrapping paper are manufactured principally from Spruce, Heniock, Balsam and Larch wood; one ton of chemical wood pulp requires approximately two cords of four-foot wood. At present Spruce and Hemlock wood is worth from \$6.00 to \$9.00 per cord in Eastern Canada; our facilities enable us to secure it at less than \$3.00 per cord. In 1908 the American mills were obliged to pay from \$9.00 a \$15.00 per cord.

per cord. In 1908 the American mills were obliged to pay from e.cot to \$15.00 per cord. PROGRESS OF WORK We are proceeding as fast as possible with the work. The erection of the plant has been placed under the exclusive supervision of Mr. Chas. B. Pride, of Appleton, Wis. one of the most distinguished au-thorities on the erection of pulp and paper mills in the United States, having built more than 50 of the leading mills of the country, and he is confident at being able to have the pulp mill in operation by Decem-

ber 1st of this year. SALE OF STOCK

In offering the preferred stock of this corporation, we do so with a
