Help the Y.M.C.A. Finish its Work For Soldiers

Help the "Y" Construct the Manhood that will Re-construct Canada

ALL the world now knows that the Red Triangle of the Y.M.C.A. was the "Sign of Friendship" to thousands of your brothers, sons, nephews, cousins and neighbours' boys in the last four and a half years. Wherever the Canadian Soldiers went, the "Good old 'Y'" went too. And now it is coming back home with them!

For the support which has made possible the war work of the Y.M.C.A. we thank you. Your money has been well expended. We have rendered full account.

We ask now your continued sympathy and support for Red Triangle Service for our Soldiers during demobilization, and for Y.M.C.A. work for Canada generally during the Reconstruction period. The Annual Red Triangle Campaign will be held throughout Canada May 5th to 9th, 1919. The objective is \$1,100,000.

The Y.M.C.A. will keep its chain of Service unbroken till the end.

For Our Men Returning

For the soldiers and their dependents, returning from Overseas, we have provided as follows:—

1. A Red Triangle man on board every ship when it leaves Great Britain, with a full equipment of games, gramophones and records, magic lantern, literature and writing materials. Where possible, also a piano or an organ. Lectures, concerts, sing songs, instruction re Government repatriation plans, and Sunday Services.

2. Red Triangle comforts and facilities for the men on arrival at Halifax, St. John, Quebec and Montreal, including coffee stalls, with free drinks, free eatables, cigarettes, candies, etc.

3. Red Triangle men on every troop train to provide regularly free drinks, eatables and cigarettes, organize games and sing songs, and furnish information.

4. Red Triangle free canteen service, information bureau, etc., at each of the 22 Dispersal centres in Canada.

5. Red Triangle Clubs in the principal cities of Canada in the shape of large Y.M.C.A. hostels to furnish bed and board at low rates and to be a rendezvous for soldiers.

6. Seventy-five Secretaries to superintend Red Triangle service in Military Hospitals, Camps and Barracks throughout Canada.

7. Tickets entitling soldiers to full Y.M.C.A. privileges for six months at any local Y.M.C.A. furnished.

In addition to our work for the returning soldiers, we have to maintain the Red Triangle service to the full for the soldiers in Siberia, as well as the work of special secretaries in Northern Russia, Palestine and Poland.

For Canada's Manhood

The Reconstruction program of the Y.M.C.A. includes the following vitally important developments:—

1. An increased service to 300,000 teen-age boys in the Dominion—the development of Canadian Standard Efficiency training; Bible Study groups; summer camps; conferences; service for High School boys, for working boys, in the towns and cities; for boys on the farm and for boys everywhere, who have lacked opportunity for mental, moral, physical or social development.

2. Inauguration of Y.M.C.A. work in the country, and the smaller towns and villages lacking Association buildings and equipment, on a plan of county organizations. This will include the establishment of Red Triangle centres for social, recreational and educational work among boys and men, in co-operation with the churches.

3. The promotion of Y.M.C.A. work among Canada's army of workers in industrial plants, both in Y.M.C.A. buildings and in the factory buildings, organizing the meetings, entertainments, games and sports.

4. The establishment of the Red Triangle in isolated districts where lumbermen, miners and other workers hold the front trenches of industry.

5. Besides these main fields of increased activity for 1919, we have to provide for enlarged work among railway men, college students and for our campaign to encourage physical and sex education. Under all our work we place the fundamental foundation of manly Christianity.

Red Triangle Campaign
\$1,100,000 May 5 to 9
Canada-wide Appeal

Y.W.C.A.

For the wives and children Overseas, dependent upon Canadian soldiers, and for Y.W.C.A. work in Canada generally, a sum of \$175,000 from the Red Triangle Fund will be set aside for the Dominion Council of the Y.W.C.A., which is caring for the soldiers' women folk, and their little ones on the long journey, from Liverpool to Canada, and is also extending its work for Canadian girls.

For their sake also be generous when you make your contribution.

FOR the sake of our victorious soldiers and their dependents, and the happiness of their home-coming; for the sake of our future citizens, our teen-age boys; for the sake of rural life in Canada; for the sake of the social betterment of the toilers in factory and workshop; for the sake of lonely men and boys in our mines and forests; for the sake of Christian Society and Canadian manhood—we appeal to you. Give us your contribution, little or big. Be as generous as you can.

Hand your contribution to the canvasser when he calls, or if you live where it is difficult for him to call, send it by check, money order or registered letter to the National Treasurer, Red Triangle Campaign, 120 Bay Street, Toronto.

Please Note:

We are not asking for money to carry on our work Overseas, with the Army in Great Britain, France or Belgium. That work will continue at its maximum for some months, financially provided for by the liquidation of our assets Overseas, and will not terminate till the last man has sailed for home.

National Council, Young Men's Christian Associations of Canada

The Red Triangle Campaign is being conducted under the distinguished patronage of His Excellency, the Duke of Devonshire, K.G., G.C.M.G., G.C.V.O., P.C.

INSTRUCTIONS FOR PLANTING

(Continued from page 3)

tramp down firmly; fill loosely, to proper depth. Where water is not available proceed as described and refer to paragraph "Where water is not available."

Roses for hedge purpose are planted in precisely the same manner as "hedges" except that they are planted in single rows while hedges are planted in double rows.

ROSES—Planted in beds—If stable manure is available excavate to a considerable depth, 18 inches to 22 or 24 inches. Fill in the excavation with manure, spread evenly over the bottom until, after it is tramped down, you have a layer of manure from 4 to 6 inches deep; fill in with good soil; if difficult to obtain proper depth, on account of rocks, or hard pan, you can mound up the bed, elevating it above the general surface of garden or lawn; if you plan to use artificial manure a less depth of digging will do but not much less than 1 foot. Roses always have, apparently, poor roots; that is, roses have fewer roots than most other plants; remember this and do not be disappointed when you open your rose bundle, and, on this account, roses require very severe cutting back, do not leave more than four or five buds on the strongest; plant three and some times even two, are better; cut them back and give roses plenty of food and

you will get a moderate amount of bloom the first year they are planted. Plant as directed in above instructions, either with or without water.

Vines and Climbing Roses—These are often planted close to buildings where the soil is very poor, where this is the case we use

BOX PLANTING—All there is to this is to use a bottomless box, or tub, and sink it a little, very little, deeper than the surface of the surrounding soil. Fill this bottomless box with the best earth you can get, and where practicable, follow instructions as given for planting with water. Otherwise as instructed for dry planting; water occasionally, be careful here, not too much water, and by the time the contents of the box are exhausted, the plant will be established in the surrounding soil.

PROTECTION—All roses must be protected through the winter if you wish them to do well the following summer; it is neither a very difficult nor a very expensive job. Wait until the ground freezes, then cover the ground with litter of any sort that will keep the frost in; stable manure is excellent if there is sufficient straw in it; after you have done this cover with evergreen boughs or anything else that will not blow away and which will protect the tops from wind and sun shine. In the spring do not remove covering until

there is no danger of repeated freezing and thawing. Rambler, and other climbing roses, are best protected by removing from trellis and laying down on the ground; or you can so arrange that trellis and rose attached can be laid down; they will flower much better if covered like other roses.

Vines, the first year or so, require much the same protection as roses. This is especially true of the Ampelopsis Veltheim, Japan or Boston, Ivy but all newly planted vines, are the better for protection during the first winter.

These instructions are issued more especially for the benefit of our city and urban patrons; our country trade is, usually, pretty expert in the care and culture of all kinds of trees. We are glad to afford any needed information to our country customers if they will apply for it.

STRAWBERRY PLANTS—Strawberry plants are generally shipped in boxes, packed in moss; they will heat if left in the boxes too long; if you cannot plant at once remove the plants from the boxes and place in shallow trench cover the roots with earth but not covering the crown, put in a bunch at a time, not separate plants, water after you have them trenched out and place a board over them to keep off sun and wind, raise the ends of the board enough to allow a circulation of air; brush will do if boards are difficult to get. In

planting be sure not to cover the crown and be sure to cover all the roots; do not put roots into the ground in bunch, spread them out. If ground is dry, water by punching a hole, along side each plant and fill the hole with water. Cover this hole with earth. Once watering in this way, usually sufficient.

A Health Saving Reminder

Don't wait until you get the Spanish Influenza.

CONSTANT PAIN AFTER EATING

The Tortures of Dyspepsia Corrected by "Fruit-a-tives"

St. MARTIN'S, N. S.
"For two years, I suffered to from Severe Dyspepsia. I constant pains after eating; down the sides and back horrible bitter stuff often came in my mouth. I tried doctors, but they did not help me. But as soon as I began taking 'Fruit-a-tives', I began to improve and this medicine, of fruit juices, relieved me everything else failed."
