

The Story of Stearns Wine

¶ If we could only *show* you just how Stearns Wine is made, you would at once recognize that it must be the most rational alterative and reconstructive tonic. We would take step by step from the livers of the fresh cod to finished product.

¶ Unless Cod Liver Oil was always a therapeutic fraud, Iron medication a delusion, and pure, sound Wine never an effective stimulant and tonic, then Stearns Wine *from its very nature must be worthy* of your confidence. *Wherever Cod Liver Oil or Iron* are indicated there you can prescribe Stearns Wine and *get the results* you desire.

Quite miscible with synergists as the exigencies of each case may suggest.

Stearns Wine is *marketed on ethical lines.*

Let us place literature and samples before you, or better still, prescribe it and note results.
