View of Underneath Feed.

The best Fountain Pen yet invented.—*New York World.*

## LEADING POINTS OF SUPERIORITY.

The ink being fed to both top and underneath parts of the pen, it NEVER FAILS TO MARK. By an ingenious combination of atmospheric pressure and capillary attraction, the "flooding" at one time and "skipping" at another—common faults in fountain pens—are obviated. Each holder is fitted with the finest quality of Gold Pen of any grade of point. There are absolutely no complications or possibility of its getting out of order. Any good writing or copying ink may be used.

## CAW'S STYLOGRAPHIC PEN

Is one of the most perfect pens yet invented.

### THE PRINCIPAL FEATURES OF EXCELLENCE ARE:

Its simplicity and absolute certainty of action.  
 The Needle-point is attached to a SLIDING YOKE of pure silver which can be adjusted by the writer and acts also as a cleaner to the stylus point when it becomes clogged.  
 A supply of ink can be carried in the handle to write from fifty to sixty pages of foolscap paper.  
 The point is a circular tube of gold, tipped with an alloy of iridium and platinum, making it almost as hard as a diamond.  
 Any good ink can be used without fear of corrosion.

The prices of the "The Dashaway" range from \$3.00 up and the Stylographic from \$1.75 up, leaving a handsome profit to the trade.

As a CHRISTMAS PRESENT these pens will prove most acceptable.

The trade supplied at Manufacturers' Prices.
