Westmorland Laboratories Inc. is a small company located in Sackville, New Brunswick which was formed specifically to develop, manufacture and market a Microwave Plasma Defroster for thawing fresh blood plasma in hospital laboratories and blood banks. WesLabs is licensed to use a patent covering work done previously by the National Research Council and the Canadian Red Cross. The company has a 4200 square foot building, erected in 1987. The WesLabs Microwave Plasma Defroster has received acceptance from the F.D.A. in the United States, and the unit is certified by the Canadian Standards Association. It also meets the FCC radio frequency requirements. Currently the products are exported to the United States, Sweden, Denmark, Norway, Finland, The United Kingdom, Ireland, Spain, Taiwan, Israel, Qatar, Italy, Malta, Greece, Iceland, Pakistan, Afghanistan, Holland, Brazil, Australia and Saudi Arabia. Foreign distributors are the preferred marketing channel for their products.
