all Advances in Chicago Exchange Efter a Nervous Erratic Session-Corn and Oats Follow Wheat.

CHICAGO, Nov. 1.—Wheat reboundading buil clique. Reports of flour sales at Toledo helped to cause the rally. Closing figures wer

wide attention, in view of the fact that at the lowest point of the session the market had broken nearly 2c from lest night and almost 3c compared with ten days ago. Between the opening and the close December fluctuated from 94 5-8c to 96 1-2c, with last sales at 96 1-4c, a decline of 1-4c net.

Corn Decidedly Active.

Corn followed the same general course as wheat, and was decidedly active, tho not in such a semi-hysterical way as the more expensive cereal. Cold weather, the best possible for the conditioning and marketing of new corn, furnished reason enough for a decline, but the lower prices led to lively reinstating on the part of longs. In consquence, the market recovered the loss and a triffe more besides. December closed a shade up at 63c to 63 1-8c.

Oats was relatively quiet. A prominent elevator concern bought while the market was declining with other grain. Accordingly, buils took heart again. Upper and lower levels touched by December proved to be 46 3-8c and 45 3-8c to 45 1-2c, with the close 46 1-4c, a gain of 1-8c over last night. Estimates tending to show a big decrease in the world's lard supply turned the provision market upward, despite a large run of hogs west. When the pit was cleared, pork had risen 27 1-2c to 35c, lard 15c to 22 1-2c and 25c and ribs 15c to 17 1-2c.

World's Visible Supplies.
Bradstreet's figures show that during the past week the world's visible supply of wheat increased 6,029,000 bushels; corn decreased 630,000 bushels, and oats increased 659,000 bushels.

is reported in Australia and offers from there were on a more liberal scale at a decline and Russia continues to offer rather freely. Argentine offers are steady and private predictions are for lighter world's shipments this week other than America. During the morning there was some covering by early sellers and prices showed an advance of %d from the low with shorts nervous. At the close the market was %d to %d below last night.

John Inglis wires from Winnipeg: Sassitoon, Regina and Winnipeg light snow flurries, but threshing progressing rapidly. Saskatchewan about 50 per cent. and Manitoba, 30 per cent. threshed. Yield exceeding expectations, farmers piling wheat in fields.

> Denominations: \$100, \$500 and \$1,000 with Sterling equivalents

Bonds issued in coupon form with privilege of registration of principal and in fully registered form. Coupon and registered bonds are interchangeable.

NATIONAL TRUST CO., LIMITED, TORONTO

The legal opinion of Messrs. Blake, Lash, Anglin and Cassels, Toronto-will be furnished.

We emphasize the following sahent points of this issue:

(1) Value of assets as of July 1st, 1911, \$5,600,000—Consisting of Real Estate, Buildings, Plant and Goodwill, \$3,837 911.94, and Net current quick assets in excess of current liabilities, \$1,162,088.06. included in current assets is the sum of \$734,909 invested in Municipal and other bonds.

(2) Average annual net earnings for past four years (1907-1910) \$291,719 or practically 3% times the interest on the present bonds.

(3) An annual Sinking Fund beginning July 1st, 1916, sufficient to retire the present issue prior to maturity at a maximum price of 105 and accrued interest.

The Company has outstanding \$1,500,000 7%. Cumulative Pre-ferred Stock and \$2,000,000 Common Stock, both of which are listed upon the Toronto and Montreal exchanges.

The present capacity of the plant which may be said to comprise everything required for the building of the most modern and up-to-date locomotives, provides for a yearly output of seventy five engines, but as each year many satisfactory orders have been declined owing to the inability of the Company to make the deliveries required, it has been decided to proceed immediately with such enlargement of the works as will increase their future output to at least double their present capacity. Therefore, it may safely be assumed that a corresponding increase in the earnings of the Company will be assured.

At the present time, the Company has a sufficient number of orders on its books to keep it fully employed for about a year, and if negotiations for additional contracts now pending are successful, the Company will

bave abundance of work until the early months of 1913.

The excellent management of the Company has been further strengthened by the acquisition of Mr. As W. Wheatley as its General Manager.

Mr. Wheatley is one of the foremost locomotive manufacturers in America, having, previous to joining this Company, been the General Manager of the American Locomotive Company's plant at Dunkirk, N.Y., the second largest locomotive works on this continent.

BONDS A NON-SPECULATIVE

There is no element of speculation in the purchase of a Bond. This does not mean that the value of your holdings cannot increase; it means that the element of risk and the chance of loss are practically climinated. Many, in fact most, of the Bond Issues we have offered our customers in the past have appreciated in value. The demand for a certain bond, paying a good rate of interest and of unque clonable security, forces the price up in the same manner as an increasing demand forces up the price of any commedity.

We would like to send literature to anyone interested in this safe and profitable form of investment.
