## WEEK-END CROP REPORTS SENSE WHEAT UP AGAIN

**Chicago Pit in Nervous Condition, With Trade Inclined to Bull Position--Climatic Conditions Paramount Feature--Corn and Oats Higher.**

CHICAGO, May 26.—On account of complaints from Nebraska that rain was needed, and because the drought in western Kansas had only been broken in part, wheat-to-day showed unexpected strength. Wheat closed firm, 1/2c to 1/4c above last night. Latest trading left corn varying from 1/2c decline to 1/4c advance; oats up 1/2c to 1/4c, and provisions unchanged to 1/2c increase in cost.

Wheat specialists first believed that the rainfall in Kansas was confined to eastern and central portions of the state, where moisture was not required, and that dryness still plagued the western plains, where the crop and better looking brown. A buying movement here received much impetus before word was received that the downpour had extended a considerable distance into Northwest Kansas. The break that ensued carried the market a little below last night's level, but prices could not be budged any further, and soon rallied, helped by statements that many thousands of acres in Nebraska were in danger, if rain did not come quickly.

**Irregularity in Corn.**  
Corn closed at intermediate prices, after having been lowered alternately by the wheat strength and by a forecast of fine weather and of larger receipts. The country again sold quite freely to arrive.

Cash houses led the buying of oats. Offerings were small and the wheat strength inclined shorts to cover. Outside limits touched for July proved to be 50c and 1/2c.

Provisions averaged firmer as a result of miscellaneous buying, due to the general upward tendency of grain.

**Northwest Receipts.**  
Receipts of wheat at northern primary points, with usual comparisons, are as follows:

Chicago	12,150	12,150	12,150
