SHOWS STRENGTH ure. Dealings in Vacuum Gas stock appeared again. The opening price at 23 was 3 points above the last previous

Steady Buying of the Shares Advances the Price and Gives Firm Closing.

With the exception of Dominion Steel there was little resilience shown in the Toronto stock market yesterday. Dominion Steel made a steady response to what has has undoubtedly been good buying, some of which has developed from a forecast of last year's business fesults. The shares advanced from 63 to 65 and closed bid at the high price. This stock is not heirg bought for its war profits so much as for its prospects as a peace such as for its prospects as a peace suity. The war has materially at the company's finances and put the erection of a nickel refinery war loan, 1921. much as for its prospects as a peace security. The war has materially aided the company's finances and put it into a premier position to take care of large future operations when cost of production and natural situation will place the company at an advanting with other of its competitors. Maple Leaf made no response to the aunual statement except a desire to liquidate holdings, and stock was oftered at the close at 108 without bids. Altho last year's business was satisfactory it is felt that the company is straining its resources in the payment of the present dividend. With the New York market less buoyant less encouragement was offered to local speculation, and transactions in most issues involved only fructional changes. The Toronto market so bidly in need of new buying power, and without this advances will oe slow, if even if they occur at all.

DOMINION IRON STRONG.

There was pominion from was the feature of today's market and closed very strong. Reports were in circulation that a bonus avoid medicated at today's marking and closed very strong. Reports were in circulation that a bonus avoid medicated at today's marking and closed of the company's plants has been continuous and the results satisfactory results.

GOOD CROP REPORTS

Bid. Prospect of Abundant Yield in America Affects Prices.

Chicago, May 29.—Grain prices today developed material weakness after an earlier show of strength. The short interest had been greatly reduced while the temporary bulge was in progress. When longs attempted to unload further, they found little demand. The wheat market depended largely on the action of coarse grain, and was unsettled at the finish with July at \$2.03 and September at \$1.83½. Corn closed %c to 2½c down, and oats off %c to 1%c. In provisions the outcome was an advance of 42c to 35c.

and oats off %c to 1%c. In provisions the outcome was an advance of 42c to 85c.

Bearish influences, which had an independent effect on wheat, were chiefly favorable crop reports. A leading expert sent word that continued cool, showery weather was bringing out the Kansas crop wonderfully, and that yields were likely to be much larger than had been expected. An estimate was also furnished that the Missouri crop would be four and a half million bushels larger than in 1916, with Idaho, Oregon, and Washington also increased three million bushels. Besides, the growth in Canada was said to be better now than in any other year at this time of the season, and farmers were said to be expecting a record crop.

Trade in corn was large, especially while shorts were covering on a sharp reaction from yesterday's big break in prices. Unexpected scantiness of offerings from the country had caused temporary anxiety on the part of shorts. When their wants had been supplied, however, leading houses became active sellers and forced a setback in prices. Crop prospects remained good and shipping demand slow. Oats swayed with corn. Assertions of a revival in export call were not confirmed.

Foreign inquiries for offers of meats and lard had much to do with the advance in provisions. Offerings were light.

WINNIPEG GRAIN MARKET.

Winnipeg, May 29.—The movement of wheat prices was practically nominal again today. Business was confined within the narrowest of limits, and quotations shifted much in sympathy with the southern markets. Some steadiness was afforded as a result of continued unfavorable weather over western Canada. The temperatures are unseasonably cold, and many districts are in need of good, heavy rains. Reports indicate a good increase in the Canadian acreage, but drynness is impeding growth. The opening was slightly softer, but light offerings of coarse grains brought all cereals forward. The market was stagnant in every division. Winnipeg, May 29.—The movement

The market was stagmant in every division.

Winnipeg October wheat gained 1/5c; basis contract prices dipped 4c to 5c per bushel. Oats lost 11/5c, 1/5c and 1/5c. Flax broke 51/5c and 6c. Barley advanced 2c. Considerable headway has aiready been made in the effort to get prices readjusted on a basis of new crop prospects. Winnipeg October wheat today showed a decline of 54c from the high level of \$2.45. In the cash grain department today, the allied governments and private interests were buyens of all straight grades of wheat down to No. 5. The demand, tho was not so keen as yesterday. Private buyers were responsible for some enquiry for tough, seedy and smutty grades. Spreads were unchanged. Offerings were liberal. Oats were quiet, the bulk of stuff going against future contracts. All grades of barley were in good demand. Flax was duli.

CHATHAM TEACHERS **OBJECT TO MOVIES**

Urge Board of Education to Curtail Children's Attendance, and Give Reasons.

Special to The Toronto World.

Chatham, May 29.—While not condemning moving picture theatres, teachers of the local schools strongly believe that moving pictures have a bad moral effect on school children. A resolution has been passed by the Chatham city teachers club to the board of education, urging that steps be taken at once to control the juvenile attendance at local picture theatres.

The resolution states that the prin-

ile attendance at local picture theatres.
The resolution states that the principal objections are:
"That the pictures are generally uneducative, often objectionable, and sometimes positively injurious to morals; that the physique of the child is endangered by the bad effects on the nervous system, due partly to the exciting nature of the entertainment and the curtailing of the child's sleeping hours; and injures the eyes."

The resolution adds that the constant dependence on an outside factor for entertainment leads a pupil to be incapable of entertaining himself, and finds the mental effort for school work irksome.

A further resolution to the board of education advocating periodical medi-cal and dental inspection in local schools was also passed.

FRENCH AND RUSSIAN SOCIALISTS CO-OPERATE

They Will Attend Conference of International Socialist Organization.

Paris, May 29. — The decision of the French Socialist party to associate itself with the Russian Socialists who have been called for a plenary conference of the International Socialist organization has been communicated formally to the Council of Workmen's and Soldiers' deputies in Petrograd. The following telegram was sent to the council today by Moute and Cachin, the two Russian delegates who were sent to France to explain the Russian position:

"We announce to you with joy the international touncil, after the explanations we have given to the Socialist party of France, has unanimously accepted the invitation we brought, to take part in the international conference convoked by the Russian revolution for the purpose of discussing conditions of democratic peace upon the basis fixed by you.

"Having faithfully and happily conveyed your message to French Socialism, the latter assures you that it is entirely with you against wars of imperialism, for the reconstruction of the internationale, for the defence of the rights of peoples and of the liberty of nations.

"We do not doubt that there will be

ty of nations.

"We do not doubt that there will be a double effort on your part—of the internationalists and the military—which can bring us to a common and."
