

Imperial Preference and Defence Need Study, Says Baldwin

PREMIER OUTLINES POLICIES AT LORD MAYOR'S BANQUET

Stability and Continuity to be Keynotes of New Government.

PRaises HERRIOT

Hopes for Early Entry of Germany to the League of Nations.

London, Nov. 10.—Great Britain's first Labor Cabinet did not hold of long enough to have the privilege of appearing at the time-honored Lord Mayor's banquet. Thus, Stanley Baldwin, the new Prime Minister, the principal guest at last year's banquet was again the guest of honor tonight at Guildhall when all the Conservative Ministers and their wives gathered together. The United States, Spanish, Italian and Japanese ambassadors and the Chilean Minister, were also present.

While the guests were assembling in the library it was observed that Austen Chamberlain, Secretary for Foreign Affairs, was in animated conversation with the Spanish Ambassador. Later Mr. Chamberlain, toasting the Foreign Ambassadors, emphasized the Empire's desire for peace. Alluding to the United States, he said:

"We rejoice at the co-operation of the United States and trust that that co-operation in whatever form might appear fitting to the President and Senate will not be withheld from us in the difficulties we have to face."

He also made reference to the great services rendered to humanity by the League of Nations. He was happy, he said, to couple with the toast the name of the Spanish Ambassador, to whom he paid warm tribute for his personal qualities, which had won him the regard of the British people.

Relations With Spain.

The Spanish Queen, the Foreign Secretary pointed out, was a Princess of the British Royal House, and Spain a country with which Great Britain was intimately associated by ties of peaceful industry and between Spain and Britain there existed nothing to disturb the harmony of their relations.

Some Legislators are Even Considering the Legalizing of Polygamy.

By A. L. BRADFORD
(United Press Staff Correspondent.)

Paris, Nov. 10.—(United Press)—The falling population of this country continues to strike fear to the heart of France.

Despite inducements of almost every imaginable sort to increase the population of France, the latest official figures published here show that instead of any apparent benefit from campaigns for increase of the birthrate, there has, to the contrary, been a distinct falling off in the number of children born in France.

The individualism of the French man and French woman, who do not want to have children unless they are in an economic situation to give their offspring every possible advantage in life, of course, is at the bottom of France's decreasing population. The economic aggravations of the post-war period, spring every possible advantage in life, of course, is at the bottom of France's decreasing population. The economic aggravations of the post-war period, spring every possible advantage in life, of course, is at the bottom of France's decreasing population.

League of Nations.

The British Government, continued the Premier, welcomed the opportunity recently given to Germany to enter the League of Nations in a manner consistent with her dignity, and he trusted that the admission of Germany would not be long delayed.

Referring to the Arabian difficulty, he asserted the Government had no intention of departing from strict neutrality in the struggle for the holy place of Islam, nor did they intend either directly or indirectly to put themselves forward as mediators.

KEVIN O'HIGGINS AS MINISTER HAD TO SEND BEST FRIEND TO DEATH DOES NOT LIKE LOOK OF THINGS IN IRAK AFFAIR

COLLAPSED AFTER SIGNING WARRANT FOR THE EXECUTION OF RORY O'CONNOR

(By MILTON BRONNER.)

Dublin, Ireland, Nov. 11.—I had come to Dublin to see the hero of one of the greatest stories ever told, and found very busy young man trying to do a hard day's work and anxious to avoid the spotlight.

He may not recall his name: Kevin O'Higgins, minister of law and justice of the Irish Free State.

But sure you will remember the story, for it is one of the great dramatic situations of all time. Every civil war has produced its families divide, brothers often fight brothers and friends strike death to friends, though their hearts be breaking.

And so it was with Kevin O'Higgins and Rory O'Connor.

The winter snows will soon paint white the black sod that covers the grave of the valiant great-hearted Rory. And the good folk will gather about the fires and recount the oft-repeated tale, first told by J. H. Thomas, colonial secretary in the late Labor cabinet.

This was the story: In all Ireland there were no better friends than Kevin O'Higgins and Rory O'Connor. In the long years of fighting between the Sinn Féin and England they were united. In each burned the same fires of struggle. When O'Higgins married, it was O'Connor who was his best man. But when the treaty with England was signed there came a parting of the ways. O'Higgins went with the new Free State and became its first secretary. O'Connor could see no middle course and followed the De Valera group. Still they remained friends.

When the "irregulars" held the Four Courts in Dublin it was O'Connor who led the Free State troops and O'Connor was captured. As a rebel he was sentenced to death. And as minister of law and justice the death warrant came before O'Higgins to sign.

When he lay upon his desk: the death warrant of his best friend.

Pressure was being brought from every side to save Rory.

But O'Higgins signed the paper! It is related that the minister did not leave his desk throughout the night.

At eight o'clock in the morning news was brought to him that the execution had taken place at daybreak.

Then O'Higgins collapsed! And, if this he not sufficiently dramatic, there is a sequel: when the death warrant came before the whole cabinet and we acted jointly. If I had to vote for the death of my friend in this instance there were other cabinet ministers who have had to do likewise. "Now there's the boundary question."

But there are those who will tell as long as there are listeners, the tale of how O'Higgins collapsed on the morning they brought the news of O'Connor's execution.

Daids, and others are being questioned by the procurator as to their parts in the scandal. In the meantime the assembly cannot settle on a new government.

This has held up reconstruction work in the Capitol. The programme, which was to have started late in September, has been delayed.

ENGLISH DEER Herds Date on Some Big Estates Back Hundreds of Years.

London, Nov. 11.—There are herds of deer in Great Britain going back over 400 years. In the 1924 register of the Deer Herd Book Society of Great Britain, just issued, a list is given of the ages of herds. It shows that:

George Brudenell's herd at Deane Park, Peterborough, has existed probably 400 years.

Lord Clifford of Chudleigh's herd of 300 at Lightfoot Park, Devon, has existed since the time of the Conquest, about 1066.

Lord Cobham's herd at Hagley Park, Worcester, was certainly extant in 1783, and possibly much earlier.

Lord Darley's herd at Cobham Park, Kent, is of "ancient formation."

Sir Robert Harvey, at Langley Park, has a mixed herd, the fallow of which have been bred at Langley since it was a royal park where Queen Elizabeth hunted. It includes 27 Swamp, 40 White-tailed, 20 Japanese, six Indian Hinds, and 15 Wapiti.

Of Lord Hastings' mixed herd at 300 at Lightfoot Park, Devon, has existed since the time of the Conquest, about 1066.

Captain Knatchbull has a herd of 150 at Mersham Hatch, Ashford, Kent, which was enclosed by royal charter in 1618.

Sir Richard Leighton's herd of 100 at Loton Park, Shrewsbury, is probably well over 200 years old, while the herd of B. C. Pearson at Parham, Pulborough, numbering 200, is said to be a remnant of the original wild deer of the district.

Sir John Shelley's herd at Shobrooke Park, Crediton, was probably formed 200 years ago, and Lieut.-Colonel Winch's at Boughton Monchelsea, Maidstone, 300 years ago.

O'HIGGINS

O'CONNOR

Authority on the Near East Sees Possibility of Soviet Machination.

LONDON LETTER

Topics of Interest in Bustling Metropolis of the Empire.

(Correspondence of Times-Star.)

London, Oct. 16.—In regard to the Iraq affair an exceptionally well informed authority on the Near East gives me the opinion that things look none too promising. Though the slim old soldier-diplomatist, Lemel Pasha, is appealing to the League of Nations, and smooth diplomacy rather than rough campaigning is at the moment suggested, the Turks have their military tails right up, and, having convinced themselves that we are not the power we used to be, their National Assembly may suddenly plunge Constantinople into dramatic adventures.

Moreover, argues my level-headed informant, we must not overlook the urgent possibilities of Soviet machination. The instant Moscow realizes that Britain will not, after all, agree to finance Bolshevikism on agreeable terms, we must expect repercussions in many quarters where Soviet agents hold important political strings. These will be skilfully pulled against us wherever possible, and the Iraq affair, in the present boastful temper of the Turks, presents exceptional opportunities. Moscow's big dream is to sit at Britain through the Near and Middle East. Iraq might be worked in conjunction with Egypt and India.

German Ships For Sale.

When the long-hoped-for shipping revival takes place it is not at all unlikely that a considerable portion of the attenuated German mercantile marine will be offered to British shipping companies. The time is coming near when the German companies will be re-valued their fleets on a gold mark basis, and it is practically a foregone conclusion that they will be sold at a great part of the new tonnage of the German shipping will be seen in a very unfavorable light. Already I hear from friends in the city who are well informed that a great part of the new tonnage of the German shipping will be seen in a very unfavorable light. Already I hear from friends in the city who are well informed that a great part of the new tonnage of the German shipping will be seen in a very unfavorable light.

Aerial Development.

One result expected from the international air conference at Paris is a more progressive attitude in aerial development on the part of those nations, such as Spain, Portugal, Sweden and Russia, which have hitherto lagged behind the modern times. New routes are to be opened up east and west and existing ones improved and extended. Commander Burney still has his faith in airships for practical and commercial purposes, and points to the Z.R.-3, as a superb model of up-to-date mechanism. The fact that when last best Zep was going under the U. S. flag, caused great bitterness in Germany. We are benefitting already to the extent of an order for one big airship for Spain, a fact which by no means reconciles Germany to the Versailles ukase against Friedrichshafen.

New Generation at Cambridge.

A lecturer at one of the women's colleges at Cambridge tells me that the new term just started has proved very interesting to those who have studied the effects of the war on the physique and constitution of children. For the first time, she says, the college has received a batch of girls who obviously did not suffer in the war. The girl who was between the ages of nine and 11 in 1914 is stamped with the war. More often than not she is anaemic, nervous, and seems to lack stamina. The generation now coming up to Cambridge is going under the U. S. flag, caused great bitterness in Germany. We are benefitting already to the extent of an order for one big airship for Spain, a fact which by no means reconciles Germany to the Versailles ukase against Friedrichshafen.

A lecturer at one of the women's colleges at Cambridge tells me that the new term just started has proved very interesting to those who have studied the effects of the war on the physique and constitution of children. For the first time, she says, the college has received a batch of girls who obviously did not suffer in the war. The girl who was between the ages of nine and 11 in 1914 is stamped with the war. More often than not she is anaemic, nervous, and seems to lack stamina. The generation now coming up to Cambridge is going under the U. S. flag, caused great bitterness in Germany. We are benefitting already to the extent of an order for one big airship for Spain, a fact which by no means reconciles Germany to the Versailles ukase against Friedrichshafen.

Not a new generation at Cambridge.
