WISLED & CO., 142 ST. PATRICK

street. Reserve Sydney in stock.
Phone 2145-11. Ashes removed promptly.

Advance in Salmon.

According to the statement of a To-
ronto wholesale grocer, quotations on sa-
lmon are fully twenty per cent. higher
than they were this time last year. Quan-
tities of salmon available are not heavy,
and the only quality on the market is
what is known as "pinks." The British
Buying Commission has taken a large
proportion of this year's supply, and the
disposal of the balance has not been as
yet distributed. It will be a few weeks
yet before it begins to come forward,
but owing to the scarcity, and particu-
larly of the better grades, prices are
bound to be considerably in excess of last
year.

FLYING AT NIGHT.

Wind Pressure and Speed of the Ma-
chine Determined Beforehand.

Before leaving on a long distance night
raid the airman prepare their maps with
great care, marking on them the detailed
course from the airframe to their ob-
jective.

By means of a small balloon, whose
speed direction and height is recorded by
an instrument on the ground, the force
and direction of the wind at different
altitudes is discovered, and the compass
course, allowing for wind-drift, is marked
beside the course on the maps. The
compass course for the return journey
is also marked. The speed of the ma-
chine is calculated and on the line of the
course a series of points is marked, show-
ing where the machine should be every
ten minutes, thus enabling the airman
to check his progress and to know his
approximate position if he gets lost.

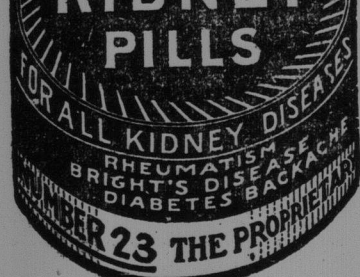

He watches the country below for
landmarks. He sees by his map that a
river should appear in a few minutes.
His watch shows that he has been flying
forty minutes and near the forty-five
minute mark on his map is a twisted pale
blue line. He looks ahead and sees in
the moonlight a silver streak and he
knows he is making good time. When
he is over the river he compares its out-
line with his map, and sees that he is
crossing it at the right place.—Exchange.

Smaller Orders in U. S.

In order to check over buying of mer-
chandise by retail dealers, American
trade associations are advocating small-
er orders and shorter terms so that the
merchants will not be overstocked with
goods that may decline in value owing
to the cessation of the war. This is just
the reverse to the policies of two and
three months ago, when the associations
were advising their members to place
larger orders and thus avoid the inevit-
able increases in cost.

Great Exports of Meat.

United States exports of meat and
dairy products during 1918 will reach
the great total of \$1,000,000,000. This is not
only double that of the highest year re-
corded, but is actually four times as
much as in any year prior to the war.

The Christmas Spirit Pervades This Popular Shoe Store

Truly have the Shoe Manufacturers worked hard to outdis-
tance each other in making attractive Footwear for the Christmas
season. Never before has such a showing taken place as this
popular Shoe House affords. Something here for every member
of the family—Father, mother, grandma, grandpa, wife, sister, or
baby brother—all are taken care of. And, of course, the Wiesel
Cash Price holds sway.

A few of the many attractive offerings are mentioned below:

HINTS ON HEATING

The prolonged mild weather has help-
ed very materially to lighten the "coal
situation." Those people with a scanty
coal supply have managed to eke it out
in a way they could not have done had
the weather been as cold as last Novem-
ber, and even those who are unfortunate
enough still to be without coal have not
suffered as much as they anticipated, al-
though doubtless during the influenza
epidemic the lack of coal caused many
of the deaths.

To derive the greatest amount of heat
and use the least amount of coal is the
object most of us have in view this win-
ter. There are several points to re-
member in doing this:

Moist air retains the heat much long-
er than dry air, hence the amount of
coal needed to keep such air sufficiently
warm is less than when the air is dry.
Moisture adds the glowy warmth, the
cheery touch of comfort to the home,
leaves coal, improves health and increases
our power of resistance.

The question is how to get the re-
quired humidity. Here are some simple
rules recommended by the fuel adminis-
tration:
