

10. One thing about which it is good to be "cranky" is adherent prepuce. Let no such pathologic condition escape you unrelieved. In convulsions of children, male or female, the prepuce should always be examined. Ten good digits in two good minutes suffice to overcome the resistance of the most adherent prepuce that was ever hung to a boy.

11. A 10 per cent. solution of antipyrine is a sovereign remedy for vesical hemorrhage. From four to eight ounces may be allowed to remain in the bladder for thirty minutes.

12. Don't be too quick to promise a perfect result after dislocation at the shoulder. The circumflex nerve passes closely around the surgical neck of the humerus, and often takes serious and lasting offense at the traumatism. Paralysis of the deltoid prevents abduction of the arm, permits gradual elongation of the capsular ligament, and recovery from it is usually slow and incomplete; hence the wisdom of a lagging prognosis.—*The Atlantic Journal-Record of Medicine.*
