

288850

Ottawa May 18, 1910.

Sir,-

It is observed that in your agricultural and industrial statistics for the fiscal year ended March 31st 1910 you state that 82 bushels of oats were sown. In your letter of August 17th you return 72 acres as the Indian crop and 23 acres on the home farm.

As 23 acres sown in wheat on the home farm are included in your statistical return it appears that you intended the sowing on the farm to appear in that return and if the oats on the home farm were included a discrepancy of 13 acres in oats sown seems to exist.

This may be due to remeasurements having caused you to revise your figures for the later return. Please state whether the acreage sown was 82 or 95.

Your obedient servant

Secretary

A. J. McNeill, Esq.,
Indian Agent,
Calgary, Alta.

Dept. of Indian & Northern Affairs, Letterbook, 28
13 May 1910 - 28 May 1910, (R.G. 10, Volume 5290)
