

BUTTER

The quality of Butter coming forward so far this season, shows quite an improvement over former years. This is caused largely by farmers having more cattle and therefore producing a larger and more uniform quality than they have formerly been able to make from smaller dairies. We are pleased to note that very few Boxes are being used this year, and we hope that merchants who are receivers of Butter at country points, will use their influence to induce farmers to use tubs only, and also should advise using the larger sized tubs during July and August, retaining the small sized tubs for the months of September and October. Butter made during the early months of the season will be exported to a large extent, while Fall made Butter will be consumed locally, and the small tubs are always in demand during the fall and winter months. We have a very large trade locally and also export largely, having every facility for handling great quantities.

We solicit your shipments to this market and can guarantee prompt and satisfactory returns.

Our Ammonia System of Cold Storage is the finest West of Montreal, and we will be pleased to quote rates for the storage of Butter and Cheese.

All enquiries, either by mail or wire, answered promptly.
