

**CALCOTT'S PATENT
SCREW RAISING, METALLIC, POST GATE.**

PATENTED Dec'r. 4th, 1868.

THIS is the best method of hanging and raising Gates, as they swing either way and are easily raised, by means of a screw, above the obstruction of snow. They are cheap, durable, strong and simple in construction; the frost cannot move the posts as in the old system. Farmers would do well to examine this patent, if they wish to erect a really good, cheap and efficient gate, as any blacksmith can make them if they have the patent.

Parties wishing to secure County Townships as firm right can now do so by sending to

J. & C. CALCOTT,
St. Thomas P.O., Ont.

Woodbridge Agricultural Works,

ABELL'S

CELEBRATED

IMPROVED GRAIN CRUSHER

NO APOLOGY is necessary for this class of machinery, nor is the value and importance of crushing, bruising, or splitting all kinds of grain, before it is given to horses, cattle, or pigs, a disputed question. These mills are prepared with a view to economy. They are strong, simple, useful, and thoroughly good, both in principle and workmanship, and are capable of crushing oats, barley, peas, or small grain of any kind. They have two rollers, finely grooved by machinery; one roller travelling faster than the other, causing a grinding motion. They are set to grind coarse or fine by means of an adjusting screw. The feed roller is exactly adapted to supply the crushing rollers, and is easily arranged to give the rollers full work without the fear of being choked. Their action is perfect and the arrangement most convenient. With the aid of improved machinery, for Letters Patent, I have been enabled to considerably reduce the price of this machine: in so doing, however, their high character for material and workmanship is maintained. Capacity, from 40 to 60 bushels per hour. I manufacture three sizes of the Grain Crusher, prices are \$30 \$35 \$40. For other information send for my illustrated catalogue.
