

The Herald.

WEDNESDAY, NOV. 14, 1894.

THE MINISTERS IN THE PROVINCES.

When in September last the Rt. Hon. Sir John Thompson and Hon. Sir Charles Hibbert Tupper visited this province steps were taken to have them address meetings on the Island and banqueting them in this county, but owing to the press of urgent public business the ministers were unable to undertake those appointments at the time and the pleasure on the political distinguished statesmen on the political premises has been called to England, but Sir Charles Hibbert in response to invitations from several constituencies in the provinces of New Brunswick and Nova Scotia, has come down accompanied by the Hon. Mr. Oulmet, minister of Public Works, Hon. Mr. Wallace, comptroller of customs, Messrs. Bergeron and Girouard, M.A.'s, and other distinguished upper province Canadians, all of whom are enthusiastic in their praise of the hospitality of the people they have met and speak in the highest terms of the warmth of their reception.

Their tour has been an unqualified success. They have addressed public assemblies at Moncton, Truro and Gaysboro, been banqueted at Halifax, visited the coal fields and steel and iron works of Pictou, and intend spending some days in the western section of the province. Everywhere they have had crowded audiences and received striking proof of the devotion of the people to the principles of the Liberal Conservative party.

There is a genuineness in the ring of their speeches. Faith in our common country, in its institutions and capabilities stands out prominently in them and in striking contrast with the wranglings of the Grit blue-ribbon pilgrims, Laurier, Fraser & Co., in their wanderings throughout the western provinces.

They have not one set of speeches for Quebec, another for Ontario, and yet another for Nova Scotia. Theirs is not to set one province against another, to stir up racial and religious differences. They stand before the people of this Dominion as the direct descendants of the fathers of Confederation. Separation has no place in their platform. The policy of the government on the tariff question was shown to be in line with the requirements of the country. In accordance with Sir John's promise in assuming the reins of government to "lay off the mauling branches" a thorough revision of the tariff was undertaken last session and reductions thereof were made here and there, but underlying these changes will be found the principles of moderate protection, and encouragement of the agricultural, manufacturing, fishing and mining industries, as the circumstances of the country from time to time demanded. The fast Atlantic line, the great public works of the country, the sound financial condition of the Dominion, having recently floated a loan on terms almost as favourable as the mother country could have secured, were all dealt with as became statements of broad and clear views. They showed that the confidence of the people in the government was amply justified. While we regret that it was not possible for the ministers to come down to Cape Breton where they would have received a welcome they should long remember, we rejoice that the electorate in other parts of the province have had such undoubted assurances from leaders of public opinion in Quebec and Ontario, of the confidence reposed in the leadership, and high regard for the personality of our leader, the premier of whom we are so justly proud.

THE UNITED STATES ELECTIONS. The elections in the neighboring republic on Tuesday of last week resulted in an overwhelming defeat for the Democratic party. In the last congress the Democratic vote was 219 and the Republican 127. Last week's elections reversed this order of things by giving the Republicans a voting strength of 250 against the Democratic vote of 98. For the first time the "solid south" has been broken so that there are but five states that do not send one or more Republican representatives to Washington. To show that the tariff was the issue which brought about the change, the great coal and iron state of Pennsylvania elected 29 Republican protectionists out of a total of 30 congressmen. The change which was brought about by Tuesday's elections was expected, as the people across the border were becoming sick at the tinkering with the tariff by the Democratic administration. The new tariff has been in operation for several months, long enough for some of these great benefits which the Democratic free traders promised the people would follow its adoption. That result has been that instead of a revival of business, depression has continued in all branches of trade and the laboring man has had to work for a reduction of wages. Besides there has been greater freedom under the new tariff for foreign manufacturers to enter the United States and come into competition with the home manufacturers, thus causing a reduction in wages to the laborer, and this has been done without American manufacturers gaining any advantage in foreign markets. It is further contended that instead of the new tariff enlarging the American market it has restricted it. Had the American people disregarded the Democratic policy of free trade as announced at the Chicago convention previous to the last presidential election, instead of a wave of depression passing over the country during the past two years there would have been continued prosperity as prevailed under the former protective policy. The adoption of the free trade policy of the democratic party at the following presidential election

EDITORIAL NOTES.

ACCORDING to Sir A. P. Caron's statement Mr. Laurier at the next elections will be beaten east of Three Rivers as he never was before. Sir Adolphe apparently knows what he is talking about.

It looks as if the Goodridge government in Newfoundland was doomed. The five seats in St. John's were carried on Monday last by the Liberal party. The parties are even now in the house and judging from the way in which the bye-elections are going the government will be in a most precarious position. The public sentiment in Newfoundland appears to be in favor of the Whiteway party.

MR. LAURIER and other leaders of his party are credited with trying to force the free-trade, Tarle, out of federal politics. Tarle is asked to go into the Quebec legislature and assume the leadership there of the opposition. But there is a strong element in the local Grit ranks who will not accept Tarle's leadership. It is assumed that the Ontario Liberals are kicking against Mr. Tarle's campaigning methods.

A MOVEMENT is on foot in Sir Richard Cartwright's constituency—South Oxford, Ontario—to oust him. His political friends have taken alarm at the prospect of his losing his seat for the Grit franchise. While the people of South Oxford deserve much sympathy in their present predicament, it is hoped by the Conservatives that the Knight of the Useful Commonwealth will continue a member of the House of Commons.

THE FRENCH Treaty adopted last session by the Canadian parliament has not yet come into force. The treaty is now before the French chamber and telegrams indicate that it will pass there. This news will be received with satisfaction by the Canadian government, and especially the Hon. Mr. Laurier. The leader of the opposition was so pleased with the terms of the treaty that he voted in parliament against its ratification to show his satisfaction with it.

NEW GLASGOW, Nov. 8.—The session of the New Glasgow church decided last night not to allow Sir C. H. Tupper to give his lecture in the church Friday night. Possibly his decision was arrived at on account of Mr. Tupper being a member of the present corrupt administration at Ottawa—Halifax Chronicle.

THE CHRONICLE continues to publish news and articles on the tariff question. The London Standard says, by Mr. Laurier, Sir Charles Tupper delivered a lecture in New St. Andrew's church, New Glasgow, on Friday evening to a large audience. Further comment is unnecessary.

IT WOULD appear from upper province papers that the notorious Ned Farrer has been down to these provinces on his return to the land for the Grit party. On his return to Montreal he reported to the Grit headquarters in Montreal that he had shot a miracle which prevented Mr. Laurier from being snuffed under at the next election in the maritime provinces. Farrer is now editor of the New York Sun, and is yet engaged in helping the Canadian opposition.

THE hopes of our friends of the Grit persuasion of success at the next Dominion elections were admittedly based on the idea that the free trade ideas of the Democrats in the United States would spread over into the Dominion. Whatever influence the Democrats' tariff muddling may have had in Canada may be left to be taken care of by the sympathetic effect of the free trade rebuff of Tuesday week. Canada will settle its affairs on the basis of its own experience, says the Montreal Gazette, which is a good recovery of a plot to assassinate his successor. The Russian throne is never likely to be occupied by a descendant of the Romanovs.

A SETTLEMENT is talked of between Japan and China. Japan will demand as the terms of peace the cession to her of the island of Formosa and the payment of an indemnity of \$200,000,000 or \$400,000,000. Municipal elections were lately held throughout England. The returns from 143 boroughs show that the Conservatives secured 30 seats, the Liberals 8, the Ministerials 28, Labour 15, Independents 6, and Socialists 3.

THE Norwegian barque Ethiopea which was abandoned by her crew from St. Thomas, Canada, to Cork, has been seen fifteen miles from Fayal. A tug has been sent to search for her and tow her to port if found.

PETER JACKSON has arrived in London, and his manager has issued a challenge on behalf of Jackson offering to wager \$5,000 for Jackson to fight with the world's best pugilist, the National sporting club will offer a purse so that the winner can scoop in about \$45,000.

HARBOR FACILITIES WANTED.

FISHING INTERESTS HAMPERED AT CAPE NORTH.

Why Was the Petition to the Government not Presented? To the Editor of The Herald: Sir—Will you kindly allow me a corner in THE HERALD while I express the great inconvenience to which the people of Cape North are subjected for want of a proper entrance into their harbor. Aspy Bay, in which the fishermen of Cape North ply their calling every summer and fall, is about nine miles wide from Moon Point to White Point, and about five miles to the beach which separates it from the three harbors Cape North. The beach has several small entrances—one into each harbor—but that into the North harbor is the main entrance. It is from five to 100 feet wide, and the water is shallow. The bank of the main entrance North and Middle harbor, on the north is a sand bar which is continually shifting, and forming a shoal before the entrance which at low water is only a very small boat pass way, and then it is not safe for any boat as the sea breaks on the bar. It was on this bar that poor Mr. McInnis lost his life last summer, and the wonder is that more lives were not lost on it. Owing to the shallow water the entrance into the harbors is a great hardship and inconvenience. They must go out before the water is too low to enter and stay out till next high tide, or come back before the water is too low to enter. If they can get into the harbor which they can get into or come in, they are out so that they are neither able to stand nor get into the harbor what are they to do? There is no place of shelter nearer than Ingonish or St. Ann's. If piles were driven on the north side of this entrance extending a few hundred feet out the beach would soon fill behind and form a bulkhead that would stand there for ages. The ice in winter would not interfere as it jumbles between Moon Point and White Point before it reaches the shore. The only danger there would be in a north-easterly storm in the fall of the year, but these would heap up more sand behind the bulkhead and make it more permanent. Those who were brought up on the shore tell me that they never see the entrance filling from the south—always from the north side. The harbor inside is good, safe and commodious.

It is pretty generally acknowledged now that the tariff changes of last session were in the right direction. Members of the government took the right course in visiting the various sections of the country and gathering suggestions from all classes. The changes made in the tariff were in the interest of the country. Canadians are well able to make their own tariff, and know what suits them, but they do not want any other country to dictate to them what their tariff should be, much less a country that is not only hostile to Canada's trade interests.

FOREIGN NEWS. A Chicago woman has brought suit for a divorce on the ground that her husband is a fool.

A woman claiming to be 132 years old is being, in and near London, England. She says her mother died in Scotland at the age of 140.

FRANK STARVO, the Australian heavy-weight, is still looking for another chance at Peter Jackson. He has challenged Jackson to fight for \$2,500 or \$5,000 a side.

THE London Standard says that there is little hope of a settlement with the Grits in response to the Grits' appeal to them to intervene to bring about a peace between her and Japan.

NO sooner is the death of the Czar announced than the news comes of the discovery of a plot to assassinate his successor. The Russian throne is never likely to be occupied by a descendant of the Romanovs.

MUNICIPAL elections were lately held throughout England. The returns from 143 boroughs show that the Conservatives secured 30 seats, the Liberals 8, the Ministerials 28, Labour 15, Independents 6, and Socialists 3.

THE Norwegian barque Ethiopea which was abandoned by her crew from St. Thomas, Canada, to Cork, has been seen fifteen miles from Fayal. A tug has been sent to search for her and tow her to port if found.

PETER JACKSON has arrived in London, and his manager has issued a challenge on behalf of Jackson offering to wager \$5,000 for Jackson to fight with the world's best pugilist, the National sporting club will offer a purse so that the winner can scoop in about \$45,000.

THE report is made that the domestic difficulty in the Vanderbilt family is to be settled out of court by a peaceable separation and division of property between the late W. K. Vanderbilt to his wife. He is one of the richest men in the world. Besides, the Vanderbilt family does not scandal.

Babies

and rapidly growing children derive more benefit from Scott's Emulsion, than all the rest of the food they eat.

Scott's Emulsion stimulates the appetite, enriches the blood, overcomes wasting and gives strength to all who take it. For Coughs, Colds, Sore Throat, Bronchitis, Weak Lungs, Emaciation, Consumption, Blood Diseases and all Forms of Wasting. Scott's Emulsion, 40c. Scott & Bowne, 60 N. 2nd St., N. Y. C.
