A Million Voted.

The remainder of the afternoon and the evening were spent in supply about a million dollars of public estimates being passed. Discussion was brisk on every item, but in good spirit and with no appearance of unreasonable obstruction.

The Changes in Tactics. We seem, therefore, to be in the third stage of the blockade: 1. The Opposition obstructed and declared they would continue to obstruct.

The Government Condemned for Relieving as They Did. The manner of relief extended Mr. Foster considered criminal and atrocious in the eyes of the circumstances existing. He said: "Now, was the condition sufficiently grave to justify the use of the government? There ought to have been a very grave situation without doubt to justify the government at all in thinking of breaking the law."

What I find fault with is the statement in the minutes report to committee that he is making a technical departure from the law. The law is absolute. It is not a mere technicality to be evaded by any means.

What He Would Have Done. Mr. Foster's contention was that the government should have delayed matters and come to parliament for permission to relieve the situation.

FOSTER'S REAL FEELING FOR WESTERN CANADA. Ottawa, June 19.—Mr. Foster again gave proof of his concern in western affairs by bitterly opposing Mr. Fielding's amendment to the Banking Act, the purpose of which is to permit the banks to issue additional currency for the three months of the year when the grain rush is on.

Mr. Foster's Consistency. Yesterday Mr. Foster headed an assault on the government for having broken the law to relieve the wheat situation. He was in the absence of Mr. Borden, led the party into the breach.

CANKER WORM IN NOVA SCOTIA

Has Attacked Fruit Region, Causing Enormous Loss. Halifax, June 29.—The canker worm has suddenly attacked the fruit region of Nova Scotia and caused immense loss. Blossoming was exceedingly promising and the outlook for a great crop was very hopeful. This has been evaded within a week, and today many orchards are badly scorched and many others are hard hit by this pest, though in lesser degree. In some cases the foliage on nearly all of the trees has been completely withered. The effect on the whole crop cannot be exactly predicted at this time, but individual losses will be very heavy. The theory is that June rains washed the spray off the trees, so that the protection from poison was absent when the attack of the worms came. It is many years since Nova Scotia orchards were similarly affected.
