## Go Ahead, Councilor Mullaly.

A fortnight ago we expressed the opinion that Mr. Mullaly had something tangible behind his notice of motion for an audit but that an audit was not his proper course, and suggested that so far his objects were reasonable and proper he should pursue them.

After reading the report of the debate on Friday night we are confirmed in this opinion, and we believe that Mr. Mullaly will be doing the public a good service in following up the matter of arrears and over-expenditures.

Take arrears. Mr. Mullaly quoted from a statement submitted on Friday that \$70,000 was the amount of arrears on December 31st. He expressed the opinion after looking through the arrears that many of the debtors were able to pay. Mr. Mullaly was quite justified in going into the question and he will do good work in following this matter up strenuously. We understand that the only details of arrears available for last Friday's meeting were the amounts owed by Municipal debtors of Water St. and Duckworth St.

If nothing else resulted from Mr. Mullaly's action than the collection of what is collectable from these arrears, Mr. Mullaly would have justified his election to the Council Board.

This was the chief charge made by Mr. Mullaly. The next in importance was the expenditure of \$1,200 on the making of a road on which an estimate of \$500 had been made.

It seems to us perfectly reasonable for Mr. Mullaly and his colleagues to inquire into this matter. Now, as the Mayor expressed his willingness to support the appointment of a committee of investigation, as Councilor Cooker was willing to support an inquiry, and as Councilors Ryan and Channing supported the motion for an audit, there are clearly at least five out of the seven members willing to do something in the way of investigation.

Under these circumstances Councilor Mullaly is justified in expecting a unanimous or almost unanimous action on the part of the Council in passing a motion for investigating all cases where a ground for investigation has been laid, as has been done in the matter of arrears and in a specific case of expenditure being 240 per cent. of the estimate.

The Annual Garden Party at Portage Cove will be held on the whole holiday, on August 31st—aug. 21.

## Excellent Road Work.

The material being taken out of the foundation being dug for the extension of St. Mary's Church, on the South Side, is being used by the Council for repairing the South Side road, and is excellently adapted for the purpose. The work is being supervised by Inspector Bambrick who is noted for constructing good roads, and this piece extending from Long Bridge to Browning's will be solid and durable.

## Steam Roller Case.

Saturday afternoon the Telegram reported the fact that the steam roller had collided with Mr. W. J. Clouston's house on Queen's Road. When it struck the house the inmates received a terrible shock as the building shook with the impact. Mrs. Clouston was prostrated with fright for hours afterwards and several hundred dollars worth of damage was done. The wonder is that the ponderous machine did not go clean through the front of the building. Had it done so Mr. Clouston's two little girls would have been killed as they were in the window at the time. Mr. Clouston is determined that the Council shall make good the damage done.

## Crippen Hard Up.

Special to Evening Telegram.  
LONDON, July 30.  
A special despatch from Brussels asked that after purchasing his steamship tickets at Antwerp, Dr. Crippen had less than \$20 left and that prior to sailing he vainly sought to find a loan office.

## Trouble in Thibet.

Special Evening Telegram.  
SIMLA, British India, July 30.  
The unrest in Thibet due to the continued activity of the Chinese has assumed so threatening a form that the Indian Government has ordered a considerable force of Indian troops to be held in readiness on the Thibetan frontier.

## Archbishop Coming by S. S. Siberian.

BIRKENHEAD, To-Day.  
Leaving by Siberian Saturday—Archbishop Howley, Revs. St. John and Greene and Messrs. Bishop, Baird, Ayre, Atkinson and Knight.

A freight train with a consignment of cattle arrived here at 4 p.m. yesterday.

## Swimming Pools for the Boys.

Saturday forenoon Mayor Ellis accompanied by Engineer Ryan, went down to Quidi Vidi and visited Sandy Bottom opposite Bennett's Grove a place which boys frequent during the summer months in large numbers. Immediately there will be put there a submerged platform, 85 feet long by 30 wide and 4 ft. 6 in. in depth. Saturday evening there was a meeting of the Municipal Council and the members of the Assembly for St. John's east and west and the matter of proper places for boys to swim in was fully discussed. The recent drowning accidents were deprecated and the assembly men promised to contribute on behalf of the Government one half of the cost of the erection at Quidi Vidi. On being asked if they would also do the same for a place in the west end they agreed to do so and the Council's Committee will meet the members for the west end to-day and select a site for the erection of the second swimming pool while it is not improbable that two other pools will be provided so that all the boys of the city can go to these places and bathe without going to the ponds and lakes and run the risk of being drowned. It may be determined at the meeting held that a man who is an expert will be stationed at these pools or baths for the two principal summer months, July and August, so that boys may be taught how to swim and the man will also look after them and take every precaution to prevent accidents. Ellis and those concerned with this movement will have the thanks of the whole community for acting so promptly in this matter. It may be remembered that swimming pools on these lines were advocated in the Evening Telegram last week, and we said that a number of gentlemen had intimated their intention of giving a guarantee towards carrying the scheme out should the Municipal Council have found it impossible to do so. The Council however did act promptly and invited the co-operation of the city members of the House of Assembly. All honour is theirs.

## Narrow Escape.

While Wm. King was distributing religious literature on the harbor front yesterday, and while on Balise Johnston's premises he noticed a man the worse for liquor try to get to the wharf from an old unused schooner moored there. King reached him in time and he was hoisted and fell overboard, almost bringing him also in the water. The man was so far gone with drink that he could not help himself and went to the bottom twice. King lowered himself over the side of the vessel and grasped him, when others about got a boat hook and hauled him in an exhausted state up on the wharf. The man's coat was ruined with the boat hook. If no person had been around he would have drowned.

The Olive, Capt. T. Doyle, arrived from Sydney to-day. She brought a cargo of coal for A. Goodridge & Son.

The Grace arrived at Oporto Friday, from St. John's, 26 days out. She left again to-day for St. John's.

He is foreman of the Southern New England Telephone Co. of Hartford, and for several years served in the old electric light station here before going to the States. **STOLEN BEER.**—Mrs. Fleming, of Baxter's Hill, brews excellent spruce beer which she bottles and puts in a cellar underneath her house where it keeps cool. ## Auto Causes Loss.

Saturday afternoon a man driving an auto turned the corner of Duckworth Street very sharply and collided with Mrs. Power's express, of Middle Cove, upsetting it and spilling a week's provisions around the street, including molasses, sugar, etc. Most of the goods were lost to the woman. The driver of the auto continued at a quick pace up King's Road, never enquiring what damage was wrought and bystanders were indignant. Mrs. Power's little boy had just left the express and had a narrow escape from serious injury, if not death.

## The Telconia.

The cable ship Telconia, Capt. Hood, which arrived here yesterday, is at work for the Western Union and Direct United States Cable Co. Her work is to repair and lay shore ends. She leaves to-morrow morning for Bay Roberts to lay the shore end of a cable there. She is a fine ship of 1,000 tons gross, 439 net and can do 10 1/2 knots. She was launched 12 months ago and is splendidly fitted up, being lit with electric light and has a most modern wireless plant on board. She was built by Wynne and Hunter, the same firm which constructed the Mauretania. She has a crew of 54 men. The officers on board say the Telconia should be at Harbor Grace in a day or so.

## Visited the Churches.

Lord Brassey accompanied by the officers and crew of the Sunbeam yesterday forenoon visited the R. C. Cathedral. Mr. Tasker Cook brought the party to the church and Councilor C. Ryan who was present showed them through it and later introduced Lord Brassey and those with him to St. Rev. Monsignor Roche who gave them some interesting details about the edifice. The party then went to see the Anglican Cathedral, the beautiful interior of which they inspected. Lord Brassey and those with him were present at the 11 o'clock service there. His Lordship occupying the pew in which His Excellency the Governor sits. He was delighted with both the churches.

No fish was taken at Petty Har. last week with hook and line until Friday and Saturday when the boats had 4, 7, or 8 qtls on squid which is very scarce. Some of the traps are still out but are doing nothing. Traps range from 200 to 250 and a couple have as high as 400 qtls, while still a few others have only 30 to 40 qtls to-date. There is plenty of fish on the ground if bait were procurable.
