S. MILLEY.

The Old Black Punt to the Fore.

Editor Evening Telegram:

Dear Sir,—Allow me space in your valuable paper to make a few remarks again relative to the motor ferry and other public matters. Some time ago I pointed out the utter unsuitability of the motor ferry for the ice and tide conditions of Placentia Gut and the unsatisfactory service she was giving owing to her breaking down almost daily. A few days ago she broke down and went out of service altogether, and the despised "black punt" has taken her place. Though she is shabby, dirty and slimy, yet the people would prefer her to the motor boat, as their lives are not jeopardized by the possibility of an explosion. As Mr. Jas. Murphy's doggerels were utilized at the last election for the purpose of decrying the old "black punt," I think it would be in order now if that poetical genius would give us a few lines on the passing of the motor ferry.

There is a funny story told in connection with the motor ferry, and it seems so comical to me that I cannot refrain from giving it publicity. It is said that there are two J. P.'s here, who by the way bear a striking resemblance to each other, and who visit daily the motor ferry now lying on the beach and weep as bitterly over her failure as David wept over Absalom, while they intone the following lines:—

"St. Vincent! oh, St. Vincent! thou liest upon the beach;
Another sad finale of a Tory masterpiece."

In my former letter I referred to the large expenditure on public works at Placentia, for which I have been severely criticised by some of my friends. Now, sir, I don't begrudge these large amounts to Placentia, but I submit it is a cavil centia, but I submit it is a cavil against the lion's share of the public monies for this district, whilst other places which contribute their quota towards the revenue of the Colony cannot get a decent road. Placentia must not think that it is the "only pebble on the beach," and that other portions of this district are to be neglected and deprived of their just share of the public grants.

Messrs. Howley and Devereaux are no doubt carrying out the promises made to Placentia after the demonstration given in their honor at the closing of the poll. My friend Uncle Rodger, who make what your correspondent, Tim Shanahan, calls wood-

MINARD'S LINIMENT CURES DISTEMPER

en poetry, describes the event in the following lines:—

"Oh, boys, it was a circus—
The same well'n'er repeat—
The day we hauled Dick Devereaux
And Will Howley through the street."

We harnessed all the heebers
To that old car, don't you know;
And headed off the cortege
With 'The Man from Fogo.'

After the parading
The "pullet" rose with glee
And thanked us all sincerely
For our tomfoolery.

He said, an Eldorado
Your town will surely be,
Outrivaling Moore's Utopia,
Since you elected me.

"I'll make the Ancient Capital
Blossom as the rose,
And shower the choicest blessings
On friends as well as foes."

"As my title is already too lengthy,
I shall reserve my remarks re Mr. Devereaux and the distribution of the seed potatoes till my next.

Yours truly,
WILLIE FOGOTA,
Jersey Side, Placentia, Sept. 27, '10.

Another X-Ray Martyr

Career Ended After Four Years Suffering.

After six operations another pioneer X-rays worker has been obliged to give up his life's work. Mr. Ernest Allison, for twelve years radiographer to the London Hospital, on Thursday underwent a serious operation which perforce will end his career.

Of the three men who a dozen years ago began the experimental work with the rays which has led up to the present splendidly equipped X-rays department only one is now able to continue his work. A short time ago the senior operator was obliged to retire after he had lost a number of fingers from X-rays dermatitis, and now Mr. Wilson's injuries from the same source, culminating in last week's two hours' operation, which almost cost him his life, have forced him to give up also.

Whatever other general effects the X-rays may have, they certainly have no depressing action on the spirits. Swathed in bandages and still weak from the shock of his operation, Mr. Wilson yesterday cheerfully described the sufferings he had borne owing to exposure to the rays in the days before their danger was realized.

"I have paid my fee for learning," he explained, "on the instalment plan. In 1906 I had two small operations on my hands. In 1908 two more. Early this year I had a finger removed. Then last week I made what I hope is the final payment, when the surgeon dissected out a whole set of glands about the armpit which had become affected by the rays. I shall never do any more X-rays work. When I can get about again I shall go to some quiet place in the country where I hope the sun's rays will be able to undo some of the harm done by the X-rays."—Daily Mail, Sept. 14.

LARACY'S have just got in Men's Work Shirts, all Black, Black and White Stripe, and Fancy, from 60c. each Blue Denim and White Duck Overalls, Men's Tweed Pants, from \$3.00 a pair. At LARACY'S, 245 & 347 Water Street, opposite the Post Office.—aug10,1f.

Do You Know Your Ailment

Or is it a complication which can be reached only by DR. CHASE'S KIDNEY-LIVER PILLS. There is only one medicine that can prove thoroughly satisfactory in complicated ailments of the liver and kidneys, and that is Dr. Chase's Kidney-Liver Pills. They begin by regulating the bowels and awakening the action of the liver, thereby effecting a thorough cleansing of the excretory system. By thus removing the poisons from the system they lighten the work of the kidneys and gradually restore them to health. Nobody who once learns of the definite and certain action of Dr. Chase's Kidney-Liver Pills in regulating and invigorating the kidneys, liver and bowels, is willing to take chances by experimenting with other medicines. Such ailments as biliousness, constipation, chronic indigestion, liver complaint and kidney disease yield readily to this treatment. Dr. Chase's Kidney-Liver Pills, one pill a dose, 25 cts. a box, at all dealers, or Edmanson, Bates & Co., Toronto, or write for a free copy of Dr. Chase's Recipes.

ago began the experimental work with the rays which has led up to the present splendidly equipped X-rays department only one is now able to continue his work. Surely Settles Upset Stomachs.

Indigestion, Gas, Heartburn or Dyspepsia vanish in five minutes.

Every year regularly more than a million stomach sufferers in the United States, England and Canada take Pape's Diapiesin, and realize not only immediate, but lasting relief.

This harmless preparation will digest anything you eat and overcome a sour, gassy, out-of-order stomach five minutes afterwards.

If your meals don't fit comfortably, or what you eat lies like a lump of lead in your stomach, or if you have heartburn, that is a sign of Indigestion.

Get from your Pharmacist a 50-cent case of Pape's Diapiesin and take a dose just as soon as you can. There will be no more sour risings, no belching of undigested food mixed with acid, no stomach gas or heartburn, fullness or heavy feeling in the stomach. Nausea, Debilitating Headaches, Dizziness or Intestinal griping. This will all go, and, besides, there will be no sour food left over in the stomach to poison your breath with nauseous odors.

Pape's Diapiesin is a certain cure for out-of-order stomachs, because it takes hold of your food just the same as if your stomach wasn't there.

Relief in five minutes from all stomach misery is waiting for you at any drug store.

These large 50-cent cases contain more than sufficient to thoroughly cure almost any case of Dyspepsia, Indigestion or any other stomach disorder.

Philadelphia, Pa., Sept. 17.—Tightly wedged in the pilot of a Royal Blue Express train on the Baltimore and Ohio road, the bodies of two men, badly mangled and supposed to be those of Winfield D. Cullin and Jesse Cullin, of Balcamp, Md., were found early this morning when the train arrived in this city. In addition to the bodies, parts of which were missing, a piece of horse blanket and a portion of what is believed to have been a carriage wheel were also found on the locomotive. In the pocket of the clothing on the bodies were found letters containing the name and address of above given. These letters are the only clues the railway people have to the identity of the men. The fact that the men were killed by the train was not known until the train reached the city.

Potato Canker.

Agricultural Society Wires Board and Premier—Urges Immediate Steps to Stamp Out Plague—Potato Crop Failure Will be Worse Than Labrador Fishery Failure.

At Wednesday's meeting of the Harbor Grace Agricultural Society, Messrs. W. Parsons and G. Davis, drivers, who had been appointed at last meeting to make a visitation to the different potato cultivators from Riverhead to Keefe's Grove, gave in their report. They reported nine gardens infected.

It was decided to wire the Board of Agriculture and the Premier, urging strongly that steps be at once taken to destroy the infected tubers and take all other steps necessary to prevent the spread of this terrible plague. Great alarm was expressed over the prospect of its spread. We may say here that we regret to state that the warning we in public and private have uttered respecting the danger of delay in grappling with this evil as it should be grappled with has not been heeded. It is not enough to warn and advise people. That is good so far as it goes. But it does not go far enough, as experience here and elsewhere shows. The spread of the disease shows this. Last year the pest was confined mainly to a section of Placentia Bay District, though one of the potato-growers here interviewed by the men sent around by the Society stated that this crop was similarly affected last year, but only to a very small extent. This year the damage done is far more widespread. We are not certain that all the cases of disease are regarded as canker are really so; but it matters not so much after all. It is enough that a virulent potato disease is spreading, and that the people cannot cope with it unaided. The authorities—better late than never—should at once adopt measures to root out the disease.

Competent men, men who know what canker is, should be commissioned to go around to find out what areas are infected, to destroy such crops, stalks and tubers, to treat the ground with lime or other destroyers of the germs, and to take such other steps as the Board will think necessary. We have no doubt the people will heartily co-operate. That will cost a good deal, it will be granted. But to stamp out the disease will cost ten times more if steps are delayed for another season; and the plague will likely obtain such a foothold that it will be impossible to prevent its spread, and we all know what disaster, and we may almost say distress, it will mean to our people to have no potato crop.

Indeed legislation is necessary, as it proved to be in the Old Country and elsewhere, to deal with the evil. For one thing, it should be severely punishable to do as some are doing now, namely, taking diseased potatoes around, or to sell them. There were no doubt many that laughed at the notion that we expressed to summon the Legislature to grant the Government power to cope with the plague. We trust it will not turn out that we were right. At all events we could not have been wrong in urging the authorities to take immediate steps to do what lay in their power. We trust the Society's action will have the desired effect.—Hr. Grace Standard, Sept. 23rd.

At T. A. Hall.

There was a large attendance at the T. A. Theatre last night on the occasion of the production of the drama "October," in aid of St. Patrick's Church Repairs Fund. The different characters were admirably portrayed by those who took part, as was quite evident by the frequent rounds of applause which greeted them. This drama was always a great favourite with St. John's theatre-goers of the old school, and the younger generation seems also to like it well. Mr. James Vey took a flash light photo.

Father Roe Very Ill.

We regret to say that Rev. Father Roe, the beloved pastor of St. Main, is now in a very weak condition and unless a change for the better sets in he cannot hold out much longer. Yesterday Rev. Fr. Sheehan of Holyrood was called to Harbor Main to administer the last Sacraments. There is a gloom over the whole district amongst his people at the prospect of losing their "Soggarth Aroon," who sympathised with them in all their joys and sorrows and held such a warm place in their affections.

REMOVED FROM HOSPITAL.—Mrs. Dooley, of Rossiter's Lane, who had been in hospital the past week, being treated for heart disease, was taken back to her home last evening in the ambulance.

"Stanley" Tools!

Many tools, which in the past have been too expensive to find their way into every "tool kit," are now being made by such improved methods and in such quantity that it is possible to sell them at a price that makes them available to all.

Nfld. and Cape Breton

Make a Little Commercial and Industrial World of Their Own Says Dr. Robertson.

SYDNEY, Sept. 17.—Dr. J. W. Robertson, C. M. G., ex-president of the Royal Commission on Technical Education who was in the city last evening en route from Newfoundland to Montreal, expressed the opinion after visiting Newfoundland that the Island and Cape Breton would eventually form a sort of commercial world of their own, able one with the other to apply themselves with almost anything they need, and to rear by a combination of their resources, a vast and greater manufacturing structure upon their present foundations. Newfoundland, with her immense wealth of pulp forests, and Cape Breton with her great steel and coal mining industries, should, he thought, be able to make themselves almost independent of the rest of the world. It was of great importance that the spirit of intercourse and commercial operations between the two islands should be fostered to the limit of their possibilities. "Properly taken care of," said Dr. Robertson, "the forests of Newfoundland are a perennial asset. The mills at Grand Falls, the products of which are rated very high, are turning out some 100 tons of paper per day. About 5 square miles of timber is consumed per annum and the growth is renewed about every 30 years, so the supply is practically inexhaustible. The mills of Lord Northcliffe and his associates are most thoroughly equipped and up-to-date, experts having chosen the machinery from the best types to be found in every country where the manufacture of paper is being carried on. The industry is well retained within the island, for the shipments are made direct to Europe.

"A feature for congratulation lies in the fact that 92 per cent. of the men employed in the mills are Newfoundland bred. None better could be found for they display a capability which only the risk-braving life which they have led could breed into them. I was greatly pleased with the audience at Grand Falls when Earl Grey, Premier Morris and myself addressed the meeting there."

Mr. J. Hicks Dead.

A message came from Magistrate Milfin, of Greenspond, last night, to Deputy Minister of Justice, saying that J. Hicks, who was a passenger on the S. S. Fogota from St. John's to Musgrave Harbor, died there last evening. Apparently Hicks had been sick the past ten days and without medical advice. The Magistrate is holding a post mortem examination.

Puzzled

Hard Work, Sometimes, to Raise Children.

Children's taste is oftentimes more accurate, in selecting the right kind of food to fit the body, than that of adults. Nature works more accurately through the children.

A Brooklyn lady says: "Our little boy had long been troubled with weak digestion. We could never persuade him to take more than one taste of any kind of cereal food. He was a weak little chap and we were puzzled to know what to feed him on."

"One lucky day we tried Grape-Nuts. Well, you never saw a child eat with such a relish, and it did me good to see him. From that day on it seemed as though we could almost see him grow. He would eat Grape-Nuts for breakfast and supper, and I think he would have liked the food for dinner."

"The difference in his appearance is something wonderful. My husband had never fancied cereal foods of any kind, but he became very fond of Grape-Nuts and has been much improved in health since using it."

"We are now a healthy family and naturally believe in Grape-Nuts."

"A friend has two children who were formerly afflicted with rickets. I was satisfied that the disease was caused by lack of proper nourishment. They showed it. So I urged her to use Grape-Nuts as an experiment and the result was almost magical."

"They continued the food and to-day both children are well and strong as any children in the city, and, of course, my friend is a firm believer in Grape-Nuts, for she has the evidence before her eyes every day."

The Highlanders' Dance

The first annual dance to be given by the Warrant and Non-Commissioned Officers of the Newfoundland Highlanders took place last night at Smithville, there being about 70 persons present. To the music of Professor Power's orchestra a most enjoyable programme of dances was engaged in, and not till 2.30 this morning did the festivities conclude. The catering was done by the Misses Furlong and, earned for them the good opinions of the revellers.

Tinsmiths Hold Meeting

Last night the Tinsmiths met in the Mechanics Hall to deliberate on the matter of the strike, report of which exclusively appeared in the Telegram recently. The pros and cons of the whole question were fully considered, and it was determined that the men would quit work in the different shops in Monday if their request was not granted. The men who have been getting \$9.50 per week ask for \$12. There are now about 28 tinsmiths working in the union shops of the city.

Obituary.

There passed away after a long and painful illness, on Friday last, Mr. Benjamin Scott. During the past four years the deceased had been subject to a growth in the stomach, and year by year the growth increased until he had to give up all work and take to his bed. On August last he was taken to the hospital where he remained until this past three weeks, when he was sent home to die. He lingered until Friday last when he passed into that great eternity, leaving two sons and two daughters to mourn their sad loss.

Upper Gullies, Sept. 26, 1910.

Agricultural Exhibits.

The Board of Agriculture has sent out circulars to the outports saying that the Government will be responsible for all freight on Agricultural exhibits coming to St. John's next month by steamers or trains, and that the purveyors and conductors will be ordered accordingly.

Fire in a Garage.

A lighted match thrown on the floor at Mr. Reid's garage set the gasoline that was spattered on the floor ablaze last night. A hose was quickly coupled on to a water tap there and the fire was quickly put out.

Marine Notes.

The S. S. Durango sailed at daylight this morning for Liverpool taking a large cargo of fish, oil, salmon, etc. Messrs. John Higgins and Lowther went as passengers by the ship.

The S. S. Thyra left Bell Island on Tuesday for Philadelphia, taking 6,250 tons ore, shipped by the N. S. S. Co. The S. S. Shenandoah will leave London for this port on the 13th October.

SMASHING THE FURNITURE. The police were called last night to the residence of a West Endor who, when they arrived, was busily engaged smashing the furniture. The man was arrested Saturday night for a similar offence, but was treated leniently in court. It is now likely he will be severely punished for his conduct.

Caplin Still in Conception Bay.

Passengers by last night's train say that the Port Saunders captured two whales in Conception Bay, Tuesday. There was a school of the big fish up in the waters of Holyrood yesterday, and passengers by the train could see them sporting themselves in the Bay. It is quite evident, as the Telegram has already observed, that caplin are still out in the deeper waters of the Bay, for one of the fish taken on Tuesday when brought to the factory at Harbor Grace and opened was found to have 7 barrels of perfectly fresh caplin in its stomach. The mammals are after these little fish all the time.

Carterhall, Nfld. Minard's Liniment Co., Limited.

Dear Sirs,—While in the country last summer I was badly bitten by mosquitoes, so badly that I thought I would be disfigured for a couple of weeks. I was advised to try your Liniment to allay the irritation, and did so. The effect was more than I expected, a few applications completely curing the irritation, and preventing the bites from becoming sore. MINARD'S LINIMENT is also a good article to keep off the mosquitoes.

Yours truly,
W. A. V. R.
