7. SUNDAY. 3rd in Advent. Battle of Magerstontein, 1699.

No Room for More!

WHEN THE EARTH WILL BE "FULL OUTSIDE."

The world's population is increasing at such a rate that within a dozen centuries or so the earth will have more people than it can possibly accommodate. It will literally be "full up."

Already parts of it are uncomfortably crowded. Italy has a population of 34 to each square mile, or, roughly, one to every 2½ acres. Germany has nearly 2½ acres for each inhabitant, and Austria-Hungary an acre less. On the other hand, Spain has only ninety-one of her population for each square mile, and European Russia fifty-one.

In Asiatic Russia there is ample elbow-room, for there are 130 acres to each individual. China, on the basis of our own population, has room for at least 600 million more people; and India, with 170 to the square mile, is still less crowded.

To each African we might add forty-three new inhabitants without reaching a population as dense as our own. The Transvaal has ample accommodation for thirty-nine million new colonists. In fact, into South Africa alone could be poured a new population twice as great as that of the British Isles, without over-crowding. There is a limit to the supporting capacity of the earth, and according to scientists this limit will be reached when the earth's population is 6,000 millions. This means that in the year 2,180 there will positively be no room for more; and unless by that time there are facilities for emigrating to other planets some serious steps will have to be taken to restrict the growth of our numbers.

If by any chance it should be possible to surmount the difficulty of support, and if the population continues to increase at present rates, a more difficult problem still will have to be faced in the year 3,160.

In that year the earth's brood will have grown to such proportions that every square yard of solid ground will have its population of three persons, each inhabitant of the earth being thus strictly limited to 3 square feet of land for all purposes of support and domicile.

A Prolific French Novelist.

On Monday, December 5, 1870, Alexandre Dumas died at Puy, near Dieppe, in France—where he was born at Villers-Cotterets, in the Department of Aisne, in 1802. Though the son of a general, he received but a scanty education, and became clerk to a notary or lawyer. In his seventeenth year he began to write plays in conjunction with a friend, and went to Paris about 1823 to seek his fortune. There he obtained a situation as clerk in the service of the Duke of Orleans, which he held for eight years. He read much and continued to write for the stage, his first drama appearing in 1825. His initial success was his prose tragedy of "Henry the Third in Court," which was the first triumph of romances over classics on the stage. He followed this with a long series of plays that brought him an immense reputation and a vast fortune, which, however, he carelessly squandered. In 1844, he published the most celebrated of his novels, "The Three Musketeers," a "Monte Cristo," which occupied twenty volumes. In the same year he was made a Chevalier of the Legion of Honor. The demand for his works was so great that he employed hack writers, and thus had five "Mutilations" of stories, running at the same time. In 1852 he began to publish his memoirs, which filled more than thirty volumes. He accompanied Garibaldi to Naples in 1870 to obtain freedom for Italy, but died on the way, and his remains were brought back to France and buried there.

Riots at Drury Lane Theatre.

In 1743, the actors at Drury Lane Theatre—their salaries being unpaid, and themselves menaced with isolation while the stage was disgraced by most contemptible exhibitions—determined to secede from Fleetwood, and waited upon the Lord Chamberlain in the hope of obtaining a license to open the Haymarket. This was promptly refused, and consequently they had no other alternative than to return to Fleetwood, who consented to take back all the recalcitrants except Macklin, whom he regarded as the ringleader. Garrick offered to pay Macklin £6 a week out of his own pocket until matters could be smoothed over, but the hot-headed Irishman would not listen to any compromise, and on the first night of the season—December 5—with the aid of some friends, conspicuous among whom was Dr. Barrowby, he organized a riot in the theatre. Garrick was hissed and not allowed to speak; pamphlets were rained on both sides; and Fleetwood engaged some thirty "brawlers," headed by the notorious Jack Broughton, to deal with the rioters, who—as usual—chiefly congregated in the pit. For some time the most disgraceful scenes were almost nightly enacted within the walls of the theatre, until Macklin was again engaged, though he did not gain the victory without having to make submission, in a prologue written for the occasion in which he protested—

"No revolution plots are mine again; You see, mark Heaven, the quietest of men."

MINARD'S "KING OF PAIN" LINIMENT FOR RHEUMATISM

Lumbago, Neuralgia, or any other pain, apply Minard's Liniment to the aching spot and get quick relief. Minard's is the remedy your grandmother used. There is nothing to equal it.

FOR SALE EVERYWHERE.

Fishes That Climb Trees.

It seems something of a miracle that a fish should be able to indulge in occasional tree-climbing. On certain parts of the coasts of Asia and Africa, when the tide goes out, a fish known to the natives as the bommi is left behind. Instead of finding dry land uncongenial, this fish enjoys it thoroughly, and makes hunting expeditions among the pools. Its breast fins are like elbow joints, and by means of these it skips and jumps about the shore.

Observation of the antics of this queer specimen has shown that it is apt to retire speedily to a little pool and dip its tail in the water. This is because it has a supplementary breathing apparatus in its tail. This fish has been known to climb a tree in the course of its wanderings.

There are quite a number of species which can live out of water without experiencing any inconvenience. In India certain species of fish can live out of water for a day or two, and on a hot summer's day they may be seen strolling rather clumsily across the fields.

Again, in Africa, there is a fish which has two lungs in addition to gills. For about six months of the year it lives entirely out of water. It forges itself on food, as during the summer it buries itself in mud swamps and lives on its fat.

A Brazilian fish, which spends the summer in the same way, walks about on its fins. When kept in an aquarium, it has been known to approach a keeper and feed out of its hand.

Prisoner Takes Officer "Over the Hill."

Few more thrilling experiences will ever fall to the lot of Officer Farrell of the Niagara Falls, Ontario police than that which he had recently when he was carried down Clifton Hill at terrific speed and across the bridge in an auto, which was brought to a standstill only when it smashed into an international car and tore the vestibule off. Becoming suspicious of the driver of the car, Lawrence Phillips, Farrell searched him, and discovering a revolver in his pocket, he jumped on the running-board of the car and ordered Phillips to drive to the Central Police Station. All went well until Centre Street was reached.

An Incurrable Optimist.

There is no more incurrable optimist in the world than the pinewoods cooper, says Mr. Archibald Rutledge in "Plantation Game Trails." All day long the sturdy chopping of his broad axe to the tuneful tattoo of his mallet can be heard above the shouts of the mule drivers, and the songs of the negroes as they roll the cracking barrels up the gangway of the turpentine still. This negro cooper makes all his own staves and shapes his own barrel heads; then with the help of a frame-vice of his own design he puts the staves together until the roundure of their arrangement makes a barrel. Forthwith, then, he hammers on the hoops with surprising skill and despatch. His shop is always litigated with, snowy strips of pine, with slabs of dry bark, with defective staves; and the air is aromatic and resinous there. The splinter of scents are exhaled from the shipping vats. It is said that a pine woods cooper lives longer than any of his fellows; and he might well be immortal, with his wholesome, clean work to do, and such delicious air to breathe. His profession must affect his character, for Mr. Rutledge says he has never known a cooper who was not merry. He is always singing and whistling, keeping time with his axe, his hammer, or his mallet. And he interprets very well the liberty, the airiness, the joyous freedom that abide in spacious forests of yellow pine.

Our line of Overcoatings have to be sold, made in the most stylish manner, or any style you want, at practically your own price. SPURRELL the Tailor. eod, lf

Fashion Plates.

A NEW AND ATTRACTIVE UNDER GARMENT.

Pattern 3777 is here illustrated. It is a style correctly simple and very comfortable. Each, \$6.98

PHIL. MURPHY,

317 Water Street.

STORE OPEN EVERY NIGHT.

Look! Look! Look! BOYS AND GIRLS

Somebody will be ten dollars richer on Thursday, Dec. 1st. Perhaps you will be lucky one, but unfortunately there will be many of you who will not win the prize. You who have competed, but without success, we say—keep on saving up the red balls which are on all Lantic Sugar packages. We will soon announce our new competition in which the number of red balls off Lantic Sugar packages will count. In this competition we shall have several prizes, your chances of winning a prize will depend on the number of red balls you will have saved up.

Buy Lantic Sugar and Save the Red Balls. They are Valuable

Get your mother interested in Lantic Sugar in packages, tell her it comes direct from the Refinery to your home unsoiled by contact with any person's hands and it's therefore cleaner sugar. Tell her it's the finest sugar imported and it's therefore, bulk, sweeter sugar. Tell her it's made by machinery and weighed by machinery, every package contains full weight of sugar, therefore she gets the full value of money. All the best shops sell Lantic Sugar in packages.

Colin Campbell, Ltd.

DISTRIBUTORS.

When the prisoner, instead of turning the car toward the station, swerved at the full speed down the steep Clifton Hill which goes to the river. It was impossible for Farrell to make the slightest attempt to check the speed of the car as a wreck would have been the inevitable result. At the upper end of the bridge, the prisoner turned and, shooting past the Customs House at 50 miles an hour, the car crashed into the vestibule. Immediately the car was brought to a standstill Farrell climbed in and seized Phillips, who put up a terrific struggle.

With the assistance of railway men he was captured and taken to the police station. Besides the gun a large quantity of whiskey was found in the car. Although both the automobile and the great car were wrecked, neither Farrell nor his prisoner sustained any injury.
