

The Royal Bride.

The marriage of Princess Margaret of Connaught to the grandson and heir-presumptive of King Oscar of Sweden, acquires an added interest from the fact that she is the first British princess, since the late Empress Frederick became the bride of the Prince of Prussia, to leave Britain to take her place among the future queens of Europe.

Princess Margaret is the eldest daughter of the Duke and Duchess of Connaught, her father being the third son of Queen Victoria. Her birth was hailed with rejoicing, especially as her parents had been married nearly three years when she appeared on the scene. She was born Jan. 15, 1882, at Baginbode Park, an estate within easy reach of London and Windsor. During the sojourn of the Duke and Duchess in India, Princess Margaret, with her brother and sister, was under the care of her grandmother, Queen Victoria, and this circumstance, no doubt, to a certain extent moulded the character of the young princess, who is so soon to assume the responsibilities of consort to an heir-presumptive to a throne.

The royal bride-elect was brought up in a sensible fashion. She was nearly twenty before she was much seen in London society. When the Duke was commander of the forces in Ireland his daughters used to be present at the stately functions in Dublin Castle, and the eldest was often called upon to help her mother to doing the honors on occasions.

The princess is described as high-spirited and clever, an exceptionally good musician and an amateur artist. Those who have met her in the country houses where she and her sister sometimes stay, declare her to be well-read, a graceful horsewoman, and a good skater—which is fortunate in view of the part skating plays in the national life of Sweden.

Princess Margaret first met her future husband when she was travelling with her parents in the east. The Duke of Schonen, to give him his official title, was travelling in Egypt, when he met the Duke of Connaught's family, and was able to make the acquaintance of the princess in a much less formal manner than is usually permitted to a royal suitor. The engagement was made known to the British public on Feb. 26. A great ball was given at Cairo to celebrate the event.

The royal family of Sweden has many beautiful residences, and Princess Margaret will have a choice of homes. It is said that the young couple are to live in Christiania for a portion of every year, but they will naturally be a good deal in Stockholm, where the royal palace has been described as a second Versailles. There, in the wonderful apartment known as the Victoriastuen, is an exquisite inlaid table which belonged to Marie Antoinette, and other relics of the last Queen of France. The great receptions given in honor of the royal marriage will take place in the hall of which the name signifies the White Sea, one of the most magnificent of royal rooms.

WHERE THE PERFUMES ARE MADE.

Mediterranean Coast of France is Where the Flower Industry Thrives.

In the southern part of France, which borders on the Mediterranean and extends between the Alps and the Pyrenees, the culture of flowers has developed into a great industry for the manufacture of perfumes. "In the department of the Alpes-Maritimes the perfume industry has probably made greater strides than in any other portion of France," says Georges Cayes in the *Monde Moderne*, of Paris. "Here are more than sixty factories, the total product of which is valued at more than \$4,000,000 a year, and over 150,000 persons are constantly employed, without counting the multitude of harvest hands."

"The more important harvests are those of the rose, 4,000,000 pounds; the orange flower, 5,000,000 pounds; the violet 600,000 pounds; the jasmine, 1,200,000 pounds; the tuberose, 300,000 pounds; the geranium, 70,000 pounds; and the cassia, 300,000 pounds. If it is considered that all of these flowers are weighed without their stems it is evident that the quantity is enormous, and this fact will be still better appreciated when it is explained that in order to obtain two pounds of rose leaves no less than a thousand flowers are required, while a thousand bunches of violets, each with a diameter of more than a foot, furnish only forty pounds of flowers."

Flowers all go through a preliminary treatment of being placed in a cold room, and plants, such as lavender, thyme, spike, mint, roots such as orris, fruits and woods, are passed through cutting and macerating machines. After this has been done the perfume is extracted, the principal methods being distillation, maceration, enfleurage and by the use of solvents. Distillation is only heat or steam. In this case the flowers and water are put in a great alembic and heated. After the water begins to boil it disorganizes the vegetable cells containing the perfume and this is carried by the steam through the worm and condensed.

There is thus obtained a mixture of water and perfume and it is merely necessary now to separate the two. The process of distillation, however, has the great disadvantage of frequently altering the perfumes obtained, and, therefore, when it is desired to obtain finer extracts, recourse must be had to other methods.

For maceration the flowers are thrown into a mass of fat melted and raised to a temperature of 65 degrees centigrade and completely submerged, after several hours the perfume being incorporated with the fat. The mass is then strained to get rid of the flowers, after which the latter are soaked in boiling water and compressed hydraulically. In this way all of the perfume is extracted.

In the enfleurage method frames are used the bottoms of which are glass. The frames are placed one above the other, small space being left between the glass plates. The fatty substance is spread on the glass and the flowers are placed in direct contact with the fat. At the end of a certain time, which varies with the flowers, the perfumes are absorbed by the fat, after which the flowers are removed and the pomade is of the desired strength.

A third method is that of volatile solvents. In general the dissolvent em-

ployed is an ether of refined petroleum. The apparatus used are of extractor, into which the flowers are placed cold with the dissolvent, a decanter where the water contained in the flowers is separated from the mixture, a distilling through the flowers, and a certain number of reservoirs in which the dissolvent is kept in a pure state or charged with the perfume. The dissolvent after being charged with the perfume evaporates and leaves behind the essential oil. This method is by far the best. In the single department of the Alpes-Maritimes the annual production is 800,000 pounds of pomade and 4,000,000 quarts of extracts.

ARRANGE YOUR VACATION ACCORDINGLY

The popular time for a trip to New York will be about the time of the West Shore or New York Central excursion on August 14th and August 24th, respectively.

Louis Drago, at 694 Yonge street, Toronto, will gladly furnish particulars on application.

Mobs and Monuments.

That the disturbances in Russia are not marked by the overthrow of monuments is due to the care exercised by the police in guarding the column of Alexander I. and other historic monuments.

The police had learned through experience that these public monuments are the first objects of a mob's attack, and they profited by the happenings in other lands.

When the Commune gained control in Paris its first action was the overthrow of the Vendome column, while even the historic Nelson column, in London, has been mined, though in that instance the detonator failed to explode.

The statue of William III. in Dublin has withstood many an attack, the recurrent anniversaries of the Battle of the Boyne stirring hatred afresh. The old statue is battered and time worn, but no serious harm has yet been done.

America has few memorials to attract or invite mob violence. Possibly the Hay market memorial, in Chicago, may some day be blown up by those who regard the anarchists executed for the crime as martyrs, but the only recent attempt to blow up a statue was the unsuccessful effort to destroy the monument to Frederick the Great at Washington.

European memorials incur the dislike of the lawless because of their associations rather than because of their lack of artistic value. Were the latter defect an incentive to crime the park police would be kept busy here.

Women Postal Clerks.

Germany, in spite of smaller territory, employs a greater number of women postal clerks than the United States, having no fewer than 242,000 in the combined postal and telegraph system. In America there are only 239,000 women thus employed and Great Britain finds a place for but 184,000 women in the post and telegraph offices.

In France there are 81,000, and in Austria 50,000, Russia, Japan and British India each give work to some 60,000, but in other countries in the post-office Union women are not largely employed.

Were the number of women telegraph operators in the United States to be added to the postal clerks, this country would at once take first place, since this is the only important member of the Postal Union not combining the postal and telegraph services under one direction.

ENGLISH SPAVIN LINIMENT

Removes all hard, soft or calloused lumps and blemishes from horses, blood spavin, curbs, splints, ringbone, swellings, stifles, sprains, sore and swollen throat, coughs, etc. Warranted the most wonderful Blemish Cure ever known.

Banking Opportunities.

An interesting article on "How Banks are Boomed" in this month's Profitable Advertising says that Pittsburgh banks and trust companies advertise more widely than those of any other city in the world, and that their deposits have been increased many millions of dollars by the systematic publicity given to their savings departments. What is good for Pittsburgh banks ought to be good for Philadelphia banks. There is plenty of idle money in the possession of frugal householders and intending house-buyers of this City of Homes which would find its way into the savings departments of our trust companies if they were fully alive to their opportunities.

Lever's V-Z (Wise Head) Disinfectant Soap Powder dusted in the bath, softens the water and disinfects.

Fighting Editor.

The wild western editor of fiction, whose duty it was to act as reception committee in case of an invasion of the office, finds a parallel in fact, not in the West, but in far Belgrade.

There the editor of the *Pravda* recently advertised for an editorial assistant "who is by nature courageous and not entirely ignorant of the use of firearms."

The *Pravda* is a liberal paper, not in sympathy with the military, and the assistant is to take the place of a young man who was killed in a duel with an officer who demanded either retraction of an editorial or a meeting on the field of honor.

Retractions not being in order, the military man gained satisfaction for his affronted dignity by shooting a man whose only connection with the matter arose from his having been retained to answer precisely such complaints.

Chinese papers employ editors whose duty it is to pose as the responsible party in libel cases and serve out the sentence of imprisonment, but the fighting editor is more rare save in isolated sections.

The Elephant's Milk.

A schoolmaster had just finished a lesson on food when a little boy put up his hand; on being asked what he wanted, he replied: "Please, sir, Jones said he knew a baby that was brought up on elephant's milk, and it gained ten pounds in weight every day." "What do you mean to tell me such rubbish," said the master; then, addressing Jones, he said: "Tell me whose baby was brought up on elephant's milk." To which Jones hesitatingly replied, "Please, sir, it was the elephant's baby."

SUPPORT

SCOTT'S EMULSION serves as a bridge to carry the weakened and starved system along until it can find firm support in ordinary food.

SCOTT & BOWNE, Chemists, Toronto, Ont. and 4100 St. George St., New York.

Idleness a Cause of Divorce.

In the shocking cases of perfidy and of unfaithfulness to the marriage vow among our wealthier classes, the root of the matter lies, as in some many other sorts of sin, in idleness. The absence of strenuous compulsory occupation is in itself a temptation to crime. The idle man or woman whose sole interest in life is the pursuit of pleasure inevitably becomes sated with its different forms. All of the ingenuity which can be expended upon inventions of new sorts of amusements, really avails little. After all is said and done a banquet is only a banquet, a cotillion is only a cotillion, and even opera and theatres after a few years begin to seem strangely and dully alike. A new emotion, a new sensation—something which money can not buy—this becomes the only fresh and desirable thing on earth.—Leslie's Weekly.

EVERY PLACE ON THE PRAIRIES

Has its Cures Credited to Dodd's Kidney Pills.

John White Could get Nothing to Help his Rheumatism Till he Tried the Great Canadian Kidney Remedy.

Yellow Grass, Assa., N. W. T., June 26.—(Special.)—No place on the prairies but can furnish some proof of the splendid work Dodd's Kidney Pills are doing in wiping out the kidney ailments of the west. It was near here that little Edith Harris was so wonderfully cured of Dropsy, and now Mr. John White is giving an experience almost as remarkable.

"I think," Mr. White says, "I should let the public know of the benefit I got from Dodd's Kidney Pills. I had Rheumatism for years, and neither doctors nor medicines did me a bit of good till they did me a great deal of good. I feel like recommending Dodd's Kidney Pills even stronger than I talk."

Dodd's Kidney Pills cure the kidneys. Sound kidneys strain all seeds of disease out of the blood. They tone up the body to its highest standard of health and energy.

When the Power's Off.

Just so long as the frenzied financier of Boston was able to direct newspaper attention to his magazine diatribes, and just so long as he continued to loom up large in the advertising columns of the dailies, he was an all-important factor in the speculative world. As he has gradually receded from the centre of the newspaper stage his influence upon stock market quotations has diminished. In some respects he furnishes an interesting example for the merchant who wants to direct public attention to his business. If interest in any enterprise is to be sustained the advertising thereof must be continuous. It is not necessary or even advisable to be spectacular, but it is necessary to be persistent. When the motive power of advertising is shut off the wheels of business cannot be expected to revolve.

BABY HUMORS.—Dr. Agnew's Ointment soothes, quiets and affects quick and effective cures in all skin eruptions common to baby during teething time. It is harmless to the hair in cases of Scald Head, and cures Eczema, Salt Rheum and all Skin Diseases of older people. 35 cents.—65

Resting the Heart.

"Rest your heart now and then during the day," said an instructor in gymnastics.

"But the heart can't be rested," a pupil objected. "It works incessantly from birth to death."

"It rests the heart to lie down," said the instructor. "Every night's sleep of nine hours saves the heart the lifting of 32,400 ounces of blood. Considerable rest, then, eh?"

"When we lie down, you see, the heart's action becomes slower—slower by ten strokes a minute. Thus in an hour 600 strokes are saved, and in nine hours 5,400 strokes. Each stroke pumps six ounces of blood, and therefore in nine hours the heart is saved the labor of pumping 54,000 ounces."

"The heart often requires a rest,"—Philadelphia Bulletin.

Made a Good Catch.

(Philadelphia Ledger.)

"You were out fishing with someone yesterday, weren't you?" asked the first summer girl.

"Yes," replied the other; "Mr. Softy."

"Catch anything?"

"Yes; Mr. Softy."

WILSON'S FLY PADS

WILL CLEAR THEM OUT

Beware of Substitutes

Fate of Men Who Shot a Spy.

"While with the British army in South Africa," said Major Barchard, an attaché of the British Consulate, "I was allotted on one occasion the stern task of commanding a firing party of ten men who executed a Boer officer who had broken his parole and afterward been condemned as a spy. He had assumed the uniform of an English soldier and penetrated our lines after having levanted when on his parole."

"Every member of that firing party has come to fatal or serious grief since that Friday morning, when in the grey dawn we shot the spy. Sudden death or a bad accident has befallen each one."

"My turn has come, as you see," and the soldier who had fought in half-dozen campaigns pointed to his left arm, which was in splints, having been fractured in a street car accident.—San Francisco Chronicle.

HARD ON THE CAT.

Have you ever seen a cat get mixed up with a sheet of sticky fly paper? If not you have missed one of the real signs of this life. The terrified, jumping, spitting, mewling creature presents a most ludicrous spectacle to all onlookers and causes an immense amount of laughter and fun, but when the frantic and maddened pet becomes almost smothered by the sticky stuff, and the damage to carpets, curtains, etc., etc., begins to be realized, the housewife falls to appreciating the funny side of the episode, and then and there decides that in future she must use only Wilson's Fly Pads, which are three hundred times more effective and cannot damage carpets and furniture. All druggists and storekeepers sell Wilson's Fly Pads. Avoid worthless imitations.

The Vacation Problem.

There are hundreds of summer resort proprietors within a half-day's journey of Philadelphia who wish to fill their houses with desirable guests during the season just opening. There are tens of thousands of perplexed men and women within the territory covered by "The Record's" circulation who have determined to go away for the summer, or a part of the summer, but do not know where they can find suitable accommodations. It is one of the functions of "The Record" to bring the hotel men and the pleasure seekers together, to their mutual profit. It is important to the resort proprietors to be represented in the advertising columns as it is to undecided readers to be the aid of these columns in selecting their vacation quarters.

Useful Hints.

Among the laxatives are figs, prunes, dates, nectarines, oranges and mulberries. The astringents are blackberries, dewberries, raspberries, pomegranates, quinces, pears, wild cherries, cranberries and medlars.

The kinds of fruits used for diuretics are grapes, black currants, peaches, whortleberries and prickly pears. The refrigerants are red and white currants, gooseberries, lemons, limes and apples. Apples are useful as a stomach sedative and will relieve nausea and even seasickness.

For improving shabby leather chairs take a pint of linseed oil and let it stand till nearly cold, then stir in half a pint of vinegar. Stir thoroughly mixed, then bottle for use. When required shake the bottle well, pour a very little on the soft flannel cloth rub thoroughly into the leather, turning the flannel as it is used. Rub with a soft duster till the polish of the leather is restored. This polish softens the leather and prevents it from cracking.

BRIGHT'S DISEASE—INSIDIOUS! DECEPTIVE! RELENTLESS! Has followed hundreds of trials by medical science to stem the tide of its ravages—and not until South American Kidney Cure proved beyond a doubt its power to turn back the tide, was there a gleam of anything but despair for the victims of this dread form of kidney disease.—54

Late Baron de Rothschild's Prediction.

(London Truth.)

Baron Alphonse took a pessimistic view for some years of the prospects of the enormously wealthy class. He said at Dinard when last staying there that the man worth \$5,000 a year would be thought enviable only by the rich before the twentieth century was well on toward middle age. His annual speech as chairman of the Northern Railway was a warning. He said, being put on railways, which they could not bear. He meant that the French Government played too much into the hands of railway servants, who want shorter hours and higher wages than can be afforded.

Little's Fit Cure for Epilepsy and Mental Affections is the only successful remedy for Epilepsy, Fits, St. Vitus's Dance, and all other Nervous Disorders. It is recommended by the best physicians and hospitals in Europe and America. It is a pure, safe, and reliable remedy. Write for a free trial bottle and full particulars. The Liebig Co., 179 King St. W., Toronto.

A Plant That Goes for Water.

There grows in the east a wonderful plant called the Rose of Jericho. It springs up in all sorts of forlorn and unexpected crannies, much as the unappreciated little dandelion does in our land. But the places which the Rose of Jericho strives to make more cheerful are so destitute of moisture that the plant cannot bring forth its seed.

So what does this marvelous rose do but wither up, collapse into a ball, fall off the place to which it is rooted, and allow the winds to carry it toward the sea. After many hard knocks and falls by devious paths across the desert it is at last brought to the shore.

Here, brittle and parched, it falls on the bosom of old ocean. The welcome moisture penetrates it, it flings out its crimped arms, and the little seeds burst from their prison walls. Then the wind changes and blows the other way. So the little seeds are carried back across the desert. Although the mother plant lies dead upon the seashore, they know nothing about it, and bloom cheerfully upon a house-top or between stones on a dusty camel path.

Mercy Shown on the Beach.

(Cleveland Plain Dealer.)

"Judge, I wish you'd make my sentence as light as possible."

"Thirty days."

"But, judge, I'm the man who writes all the hot weather advice for the syndicate papers and the newspapers."

"Three months."

Sunlight Soap will not burn the nap off woollens nor the surface off linens.

Proposed Change Welcome.

"There will come a time," says a student of modern life, "when living in cities will be entirely given up and it will be a place maintained solely for the transaction of business. All people will go and come as a few do now, living in the country, with such transportation facilities as will throw open a much larger area for such living."

"The idea of going to bed and trying to rest in such a place of noise, heat and disease as the modern big city is will strike the future man as something idiotic. All that is now needed is swifter transit, such developments along that line as have come in other lines. Of course, there are some features of city life which it will be hard to transplant to the country, such as amusements and large meetings, but such difficulties will be overcome when we can travel faster."

SEARCHED EUROPE

For the Latest Novelties for Diamond Hall, Toronto.

Amongst the passengers who arrived by the Caronia on her last trip was Mr. James Ryrie, who just returned after a protracted visit to Europe in search of the latest novelties for Diamond Hall, Toronto. During his absence Mr. Ryrie visited Italy, Switzerland, Austria, Germany, Holland, France and England, and made selections in each country, thus gathering one of the choicest collections of precious stones, silverware and art goods that has ever entered Canada. These goods, it is expected, will arrive in time for the opening of the new premises now being prepared for the Ryrie Bros., Limited. This building, which is situated some three or four doors above their present premises, will be ready for occupation toward the end of July, and when completed will be one of the largest and most palatial establishments on the continent, even rivaling anything that New York or Chicago has to show.

Hang On.

(Chicago Chronicle.)

If you have a paying job, unless you are a chump or a slob, Hang on.

If you begin a task to do, Stick to it till the task is through. Don't start, but never tackle it easier, Hang on.

If you are some Chicago chap, And get your mitts upon a strap, Hang on.

The car may jerk around a curve And you from side to side may swerve, But don't give up or lose your nerve, Hang on.

LITTLE BUT SEARCHING.—Dr. Von

Stan's Pineapple Tablets are not big nauseous doses that contain injurious drugs or narcotics—they are the pure vegetable peppermint extract from this luscious fruit, and the tablets are prepared in as palatable form as the fruit itself. They cure indigestion. 60 in a box, 35 cents—66

Torture Before Gallows Death.

(Springfield, Mass., Republican.)

It is had enough for the State to hold a person within the shadow of the gallows for a considerable period of time, compelling him as it were, to die a thousand deaths in advance of the real one. But it is worse to subject one to a succession of death sentences and reprieves and stays and re-sentences. There is a refinement of cruelty here which passes the utmost of savage ingenuity—yet our civilization tolerates its infliction with every death sentence imposed.

FREE! LADIES, send name and address and you will receive a COMFOUR PENNYROYAL TEA.

Every woman and lady should use it. Used successfully by thousands of ladies. It is a healthy, refreshing, and delicious beverage. Write for a free trial bottle and full particulars. The Liebig Co., 179 King St. W., Toronto.

Making a Cheerless Prediction.

"Do you think that our country will ever succeed in getting rid of graft?"

"Yes," answered Senator Sorghum. "There will be a time when grafters are unheard of. But it will be due to the change that is constantly going on in our vocabulary. There will be a new word that means the same thing."

R. & D. Montreal Line

Steamers Belleville, Hamilton and Pictou Leave Toronto at 3 p. m. daily, except Sundays. From July 1 daily, Rochester, Thousand Islands Rapids, St. Lawrence, Montreal, Quebec and Murray Bay, Tadoussac, Saguenay River.

For information apply to R. A. Rogers or write H. Foster Chaffee, Western Passenger Agent, Toronto.

Spring Prose.

Officially speaking, gentle spring, whose feathered harbingers have been with us a week or more, arrived at the unseasonable hour of three minutes of two on Tuesday morning. But no man can say on what day or at what hour she will make her actual presence manifest by compelling the complete abandonment of winter garb and winter habits and enforcing a resort to the raincoat and the costume appropriate to her reign. It suffices the alert merchant to know that an urgent demand for new supplies all along the line is to be momentarily expected, and that the tide of purchasers will turn toward the stores that advertise.

PACIFIC COAST EXCURSIONS.

During June, July, August and September the Chicago and North Western Railway will sell from Chicago round trip excursion tickets to San Francisco, Los Angeles, Portland, Ore., (Lewis and Clarke Exposition), Seattle, Victoria, and Vancouver, at very low rates, commencing June 1, 1905, showing an increase of 100,000 over the previous year. The complete Bible is now published in 100 languages. The New Testament in ninety-four and one book of Scripture in 196 more. Some 350,000 copies of the Russian and Japanese Scriptures have been distributed among the heathen in the far east.

Circulation of the Bible.

(New York Sun.)

In spite of the general lament that the Bible is no more read and studied as formerly, the British and Foreign Bible Society reports in May that 6,000,000 copies of the Bible have been issued in 1905, showing an increase of 100,000 over the previous year. The complete Bible is now published in 100 languages. The New Testament in ninety-four and one book of Scripture in 196 more. Some 350,000 copies of the Russian and Japanese Scriptures have been distributed among the heathen in the far east.

THE STOMACH'S "WEAL OR WOE!"

"The stomach is the centre from which, from the standpoint of health, flows 'weal or woe.' A healthy stomach means perfect digestion—perfect digestion means strong and steady nerve centres—strong nerve centres mean good circulation, rich blood and good health. South American Nervine makes and keeps the stomach right—52

Husband of the Future.

(New York Globe.)

First Clubwoman (a few years hence)—Men are enough to drive a woman crazy. Second Clubwoman—Indeed they are. Clubwoman—You think so? First Clubwoman—Only think. For five nights last week I remained at the club terribly late, and yet when I went home I found my husband waiting at the top of the stairs to upbraid me for neglect. The heartless brute was in bed, sleeping like a top, and actually snoring in his dreams.

Hint for Psychical Researchers.

Howell—That's one of those thought transfer fellows.

Howell—That's so?

Howell—Yes; he is a letter carrier.

ORANGE BLOSSOMS

That precious remedy, is a positive cure for all female diseases. Write for description circular and free sample. R. S. McCall, Elmwood, Ont.
