

DECLINE IN TRADE IS NOW CHECKED

increase in loadings encourages constructive activity in Industrials.

Associated Press Despatch.
New York, April 22.—Over extension of short accounts, indicated by the unprecedented number of 34 issues recently "flat" provided the basis for technical rallies in stocks which recently have been subjected to selling pressure. At the same time an increase in loadings taken to mean that the decline in trade has been checked, encouraged a resumption of constructive activities throughout the industrial list. Under the leadership of Tide-water, which moved up 1 1/2 points, virtually all oil shares made brisk recoveries, with sugar, steel, motor, accessory, independent steel and specialty stocks averaging gains of 1 to 3 points. Mexican Seaboard displayed strength on prospects that dividends would be resumed in common stock. Fischelmann with a two-point gain reached a new high level at 53.4. Call money opened at four per cent.
